INDEX OF TERMS

Acute 29
Affricate 24
Analytic transcription 43, compressed 44
Anti-resonance (zero) 17
Assonance 42
Attenuation 35
Attributes 13
Audibility 38
Auto-correlation 23
Back 30
Bi-lingual speech 12
Bi-polar 10
Border mark 14
Bracketing 45
Center of area 4
Centralized 36
Ceteris paribus 1
Checked 23
Chromaticity 32, 46
Close 27
Co-existing phonemic systems 11
Colored hearing 32
Common denominator 7
Commutation 1
Compact 27, 58-59
Complementary distribution 6
Completeness 15
Configurational feature 14
Conjugate distinctions 10
Consecutive stages: articulatory, acoustical, aural, perceptual 12
Consonant 19
Consonant harmony 42
Consonantal 19, 46
Constrictive 21
Contextual variants 5
Continuant 21
Contradictories 29
Contraries 29
Decoding 12
Dentals 30: sibilant (hissing) and non-sibilant 24
Dichotomous scale 9
Diffuse 27, 58-59
Dimensions 13
Discreteness 11, 45
Distinction: minimal, duple 2
Distinctive feature 3, 14
Distinctiveness 9
Distribution 12
Emphasis 15
Emphatic softening 35
Emptiness 14
Envelope: smooth and rough 21
Expressive feature 15
Extraction of redundancies 11, 45
Flap 21
Flat 31
Formant region: central 27, non-central 27, 29
Formants: first 27, 30, second 30, upper 27, 30
Front 30
Glide 19
Glottal catch 19, 23
Glottalized 23
Grading gamut 15
Grave 29
Identification 12
Implementation 7
Implication 41
Information 9
Inherent 13
Intermittent 19
Interrupted (discontinuous) 21
Invariance 4
Labials 30: labio-dental and bilabial 24
Lateral 19
Lax 36, 57-61
Liquid 19
Long 14, 59
Loudness 13
Mean proportional 10
Meaningful entity 1
Mellow 23
Modulation 13
Morpheme 14
Muffling 25
Murmured vowels 26
Mutilation 42

Nasal (nasalized) 39
Nasal murmur 39
Network analysis 16
Neutral position 18
Noise 25
Non-compact 29
Non-consonantal 19
Non-diffuse 29
Non-uniqueness 7
Non-vocalic 18
One-to-one correspondence (isomorphism) 5, 7
Open 27
Operational autonomy 42
Opposition 3
Optimal distinction 10, 46
Oral (non-nasalized) 40
Overlapping 5
Palatalized 31
Palatals 27, 30: sibilant (hushing) and non-sibilant 24
Pharyngealized (emphatic) 31, 34
Phase 24
Phoneme 3
Phoneme boundaries 18
Phonemic pattern 4
Phonemic proportion 1, 10
Phonemic (broad) transcription VI
Phonetic power 28
Phonetic (narrow) transcription VI
Pitch 13
Plain 31
Polarity 11
Poles 17
Predictability 12
Prominence 13
Prosodic 13
Received Pronunciation (RP) V
Receiver (decoder) 8
Redundancy 8, 15
Resonance 26
Retroflex 34
Rounded 31
Running frequency analysis 16
Semantic load 14
Sender (encoder) 8
Sequence 3
Sharp 31
Short 14
Significant unit 1
Source 16
Speech wave 16
Spiritus: asper and lenis 39
Square pattern 33, 34
Stop 21
Stratification 41
Stress 13
Stricture 27
Strident 23
Strident lateral 26
Strident (sibilant) trill 25
Strong: position and phoneme (fortis) 5, 36
Superposition 3
Suprasegmental 4
Switching code 11
Syllabicity 13
Symbolism 28, 32
Tempo 14
Tense 36, 57-61
Threshold of perceptibility 11
Tonality 29
Transfer function 16
Transient effects 17
Triangular pattern 33, 34
Trill 21
Two-choice (binary) selection 2, 9
Unchecked 23
Variables 13
Velars 27, 30: uvular and velar proper 24
Vocal tract 16
Vocalic 18, 46
Voiced (buzz) 26
Voiceless (hiss) 26
Vowel 19
Vowel harmony 41
Weak: position and phoneme (lenis) 5, 36
Zero phoneme 39
