Bucovetsky, S., 290
Buettner, T., 289
Cambodia, 87
Cameroon, 79, 81
Campbell, H., 43, 80, 137
Canada, 91, 273
corporate income tax revenues in, 246
equalization grants, 241, 255
foreign tax credit system, 194
marginal cost of public funds from public sector borrowing in, 233–37
marginal distortionary cost of taxes on labor income in, 137, 139
marginal distortionary cost of taxes on return to capital, 200
marginal distortionary cost of taxing commodities in, 79, 80
marginal effective tax rate in, 189
optimal capital tax rates in, 173
public debt to capital ratio, 210–11
tax incentives for R&D, 276–82
Capital
crowding-out effect on, 207–208
elasticity of demand for, 267
foreign tax credit system, 192–97
marginal cost of public funds from taxing return to, 184–89
marginal distortionary cost from taxing return to, 199–202
mobility between subnational governments, 248–52
optimal tax rates on, 171–80
ratio, sustainable debt to, 210–11
switching to consumption tax from tax on, 181–84
Carter Commission, 194
Caselli, F., 238
Cassing, J., 257
Chandoevwit, W., 87
Chennells, L. A., 107
Cnossen, S., 97
Cobb-Douglas production function, 172, 188–89, 210, 215–16, 219
Commodities
addiction/self-control problems and, 75–77
environmental externalities and, 63–65
imperfect competition and, 66
marginal distortionary cost of taxing, 78–82
monopoly and, 67–70
multiple tax bases and, 55–57
optimal taxation, 58–62
smuggling, 53, 77–78, 98
taxes imposed on different, 51–52
taxes in Thailand, 87–88
Compensated demand function, 14, 17, 48
Compensating variation (CV), 11, 16
Competition
imperfect, 52–53, 66, 97–98
monopoly and, 67–70
perfect, 48–49
Consumer surplus (CS), 11, 18
based measure of excess burden, 33
Consumption
income opportunity curve and, 161–62, 167–70
private, 223–24
taxes, 35–36, 89–91, 174–84
Cooley, T., 237
Corlett and Hague rule, 52, 60–62, 171, 176–77
Corporate income tax (CIT), 173–74, 189–99
foreign tax credit system and, 192–95
marginal cost of public funds for, 190–99
wage tax rates and optimal, 198–99
Cost–benefit analysis, 46–47, 150–59
Cournot duopoly, 73
