Balladur, Edouard, 37
Belguim, 4
Benchmark economy, 91–96
funded pensions in, 245–247
government in, 91–94, 96–106
households in, 91, 93
and life expectancy, 105
market in, 92–93
nontaxable pensions and, 99–101
parameterization of, 93–96
Ramsey problem, 101–103
social security in, 217–218
Beveridgean system, 141–143, 146–155
Bismarckian system, 141–143, 146–148, 151, 155
Bush (George W.) administration, 211
Caisse Nationale d’Assurance Vieillesse (CNAV), 40, 44–45, 63, 73
Canada, 38
Capital, return on, 257–261
“Capital crowding-out” effect, 214
Capital integration, 159
Cohort effects
and benefits age, 129
of demographic shock, 88–90, 101, 109–110
Dutch funded pensions, 251–252
French pension reform of 1993, 42–43, 53–54
Condorcet winner, 126
Constant relative risk aversion (CCRA), 282
Defined-benefit (DB) pension plans, 172, 174, 239
Defined-contribution (DC) pension plans, 173–175, 189
Delayed retirement credit (DRC), 27–36
labor disutility, 29–30
and longevity, 34–35
model, 28–29
self-selection, 27–28, 30–33
Demographic shock
cohort effects of, 88–90, 101, 109–110
and dependency ratio, 2, 7–8, 87, 104–105, 119
predictability of, 87–88
strategies for absorbing, 89–90, 111–112
and taxation, 90, 102–104
transitory, 104–106
Dependency ratio, 2, 7–8, 87, 119
and pivotal voting age, 121
and transitory demographic shock, 104–105
Difference-in-difference methodology, 47–69, 194–195
baseline estimates, 55–58
common-trend assumption, 202
disclosure effects, 59–60, 62–63, 78–80
elasticity, 55
quasi-difference-in-differences, 197–199
response coefficients, 55, 58
sources of bias, 58–60
Disability pensions, 60–62
Distortionary taxation, 90
Dynastic model, 214
Early retirement
in Canada, 38
in France, 67–74
and PAYG systems, 6
Échantillon Interrégime de Retraité (EIR), 43–44, 63–67, 73
Europe
demographic shock in, 8
mandatory contributions in, 141
PAYG in, 1–2
population aging in, 132
sustainability of social security, 122–123, 132, 136
European Union (EU), 141
Family Resource Survey (FRS), 191–192
Financial numeracy, 169–170
First pillar system, 141
France, 4. See also French pension reform of 1993
complementary schemes in, 77–78
PAYG reform in, 6–7
pension system in, 40–41, 74–78
population aging in, 132
and U.K. system, 151–152, 155–156
Free choice model, 144–147
intertemporal wealth, 145, 147
liquidity constraints, 145
proofs of propositions, 161–164
rate of return, 147, 152
stationary equilibrium, 149–150
Free choice systems, 141–164
and capital integration, 159
comparing, 148–152
efficiency in, 155–156, 160–161
equilibrium under, 143, 149–160
income and, 152–155
myopic expectations, 159–160
national, 147–148
redistribution in, 142–143, 148, 151, 155
French pension reform of 1993, 37–80
cohort effects, 42–43, 53–54
contribution length, 41–42, 47, 49–59, 69–70
disability pensions, 60–62
labor-supply elasticity, 37, 70–71
objections to, 37–38
and pension rate, 75–76
proportionality coefficient, 76
reference wage, 42, 69, 77
replacement rate, 43, 50, 69, 73
retirement age, 45–47, 50–51, 67–74
unemployment, 67–70, 74
unpopularity of postponing retirement, 71–73
Funded occupational pensions in Netherlands, 13–15, 239–270
and aging, 239–240, 254–257, 265–266
average-wage, 250–253
and Dutch economy, 240, 264–266
