Agreements
associated with social contracts, 214
coordinating on an equilibrium, 214–215
failure of one side to carry out, 215–216

Akaike Information Criterion, 111
Akerlof, G., 93
Aristotle, 155
Arrow-Debreu model, 17, 27

Bargaining game, multiagent, 206–208
Bargaining process, evolutionary model of, 193–194

Behavior. See also Norms
conformist, 134
generating positive externalities, 136–137
punishment for deviations in, 93
taste-based preferences in, 93–94

Behavior, aggregate
in economic environments, 29–30
emergence of individual interactions, 30

Behavior, individual
distributions across populations, 16
in models of local interactions, 94–100

Beliefs
endogenous, 194–196
heterogeneous, 27

Bernheim, D., 93
Boehm, Christopher, 159
Brock-Durlauf model, 4–5

Classes, conditions for emergence of, 192–193
Coleman, James S., 67–68
Conformity
dynamic model of, 134–140
dynamic model with idiosyncratic shocks, 140–143
informational, 135
instrumental, 135
pure versus imitative, 135

Decision making, in interactions-based models, 17–20

Discriminatory norm
in class formation model, 194–195
conditions for emergence of, 192–193
governing distribution of property, 191

Durlauf, S., 86, 87

Egalitarianism, effect on within-group selection, 179
Ellison, Glenn, 91, 143
Equity norms
conditions for emergence of, 192–193, 196–198
in distribution of property, 191
stochastic stability of, 199
time taken to achieve, 199–201, 204–205

Erdal, D., 223
Errors-in-variables problem, 60–63
Externalities, 17–19, 90–91, 146

Fairness, as coordinating device, 224
First Welfare Theorem of Economics, 28, 33
Folk theorem, 216, 223, 227
Fractious state
conditions for emergence of, 192–193, 198–199
transition time to equity norm from, 199–201, 204–205

Fudenberg, D., 91
