Index

Page numbers in italics indicate tables or figures.

Alchian, A., 14, 15, 139
Altruism, genetic basis of, 201–202
n10
Aoki, M., 150, 151
Archibald, G., 74
d’Aspremont, C., 72
Asymmetry
cost entry barriers and, 100–107
initial, hypothesis of, 121
in oligopolies, 67–75
in products, 74–77
Stackelberg’s model of, 68–70
Axelrod, R., 81
Baumol, W., 18–19, 21, 24–25, 99
Becker, G., 184, 185
Bertrand’s model of price competition, 66–68
Bioeconomy, 182–191
Biological analogies, and economics, 12–13
De Bondt, R., 104
Boulding, K., 33
Bourguignon, F., 104
Bowley, A., 59
Boyer, M., 71, 155
Braudel, F., 197
Bresnahan, T., 62
Cartel, stability in, 72–74, 73
Caves, R., 120
Chamberlin’s equilibrium, and entry, 99
Chandler, A., 139, 141, 144–145
Chiappori, P. A., 16–17
Clarck, J. B., 127
Collusion, concentration and, equations for, 60
Competition, dynamic biological models of, 77–81
equilibrium and, 77–81
Comte, A., 190
Concentration and collusion, 60
endogenous nature of, 60
entropy measure of, 51–53
Herfindhal’s index of, 51
indexes of, 50–53
industrial, Herfindhal’s measure of, 56–57
Lerner indexes and, 56–59
monopoly power and, 56–59
Conjectural variation, 59–60
Control theory, 129 n1, 130 n7
Cooter, R., 188
Correction mechanism(s)
exit, 179–180
industrial policy and, 179–182
voice, 179–180
Cost, as entry barrier, 114–116
Cost asymmetry, entry barriers and, 100–107
Cost function
average, 19–22, 20
economies of scale and, 21–23
economies of scope and, 40
Cost function (cont.)
  subadditivity of, 19, 20–21
Coughlan, A., 178
Cournot-Nash equilibrium,
  defined, 53, 55
Cowling, K., 60
Curry, B., 57
Curzon-Price, V., 169
Dawkins, R., 183–184
de Allesi, L., 159
Demsetz, H., 53, 139, 159, 183
Dixit, A., 61
Domination, 121–129, 123
Economics, biological analogies
  and, 12–13
Economies of scale
  and cost function, 21–23
  and entry, 98–100
  and forms of organization(s),
    144–146
  and sunk costs, 101–102
Economies of scope, subadditivity
  and, 40 n15
Encaoua, D., 57, 104
Enke, S., 15
Entry
  alternative equilibria in, 109
  Chamberlin’s equilibrium and, 99
  dominant firm and, 95–97
  economies of scale and, 98–100
  variables affecting, 114–120
Entry, barriers to, 94–129
  and barriers to mobility, 120
  cost, 114–116
  and cost asymmetry, 100–107
  creation of, 107–114
  domination, 121–129, 123
  example of, 107–110
  and exit, 118–119
  fixed expenses, 104–107
  limit price, 102–103
  and maximization of profits, 108
  and price, 116–117
  price equation for, 117
Entry, free
  and competitive equilibrium, 95–100
  Gaskin’s model of, 95–98
Entry game, 112
Equilibrium
  in absence of sunk costs, 102
  aspects of, in perfectly contestable market, 26–28
  Chamberlin’s, and entry, 99
  competitive, free entry and, 95–100
  and dynamic competition, 77–81
  perfect, 111
  “rational conjectural variation”
    of, 63–64
  selection of, 62–65
  sustainable, 41 n20
Equilibrium analysis, 24–29
Equilibrium configuration, in perfectly contestable market, 25–28
Ergaz, H., 180
Exit, 118–119
Exit game, 118
Export(s), promotion of as import protection, 173
Feenstra, R., 34
Feichtinger, G., 75
Fischer, D., 18
Flaherty, M. T., 110, 178
Friedman, M., 13
Frisch, R., 59
Gabszewicz, J., 76
Gaskin, D., 95
  model of free entry, 95–98
Gene, defined, 200–201 n9
George, K., 57
Geroski, P., 122
Ghiselin, M., 183, 184
Hannah, L., 50
Hart. P., 76
Herfindhal’s index. See Concentration
Hirschman, O., 179
Hirshleifer, J., 35, 184, 185, 187
Hollander, A., 189
Import(s), protection of, as export promotion, 173
Industrial demography, and population models, 35
Industrial organization, approaches to, 1–11
Industrial organization, classical, 1–5
shortcomings of, 3–5
Industrial organization, new, 5–9
methodological aspects of, 5–6
Industrial policy, 167–199
and conflict between two national welfares, 172–174
and correction mechanism(s), 179–182
Japanese, 170–171
and market mechanism(s), 168–182
post-entry trade, 174–179, 175
and price flexibility, 168–170
in semiconductor industry, 176–179
Industrial strategy(ies), and product life cycle, 196
Innovation, diffusion processes of, 34–35
Jacquemin, A., 57, 104, 122, 155, 192
Kamien, M., 104
Kay, J., 50
Koopmans, T., 13
Kornhauser, L., 188
Kreps, D., 118

Labor
competitive, 43 n30
cooperative, 43 n30
division of, and mutualism, 35
Ladriere, J., 7
Laitner, J., 62
Lancaster, K., 74
Lane, W., 76
Lee, W., 104
Legal evolution, economic theories of, 187–189
Leibenstein, H., 152
Lerner index
and concentration, 56–59
defined, 55
Lesourne, J., 126
Lévi-Strauss, C., 195, 197–198

Limit price
defined, 96
as entry barrier, 102–103

M-form, of organization(s), 139–146, 143
MacKaay, E., 189
Market mechanism(s), industrial policy and, 168–182
Market power, oligopolies and, 48–81
Market processes, selective, 12–36
Market strategies
forms of organization(s) and, 151–160
and profit maximization, 152
vertical integration, 155
Marris, R., 159
Marshak, J., 139
Marshall, A., 12–13
McGee, J., 18
Mill, J. S., 190
Mobility barrier to entry, 120
Monopoly power, and concentration, 56–59
Moreaux, M., 71
Mueller, D., 159

Nash equilibrium
static, defined, 54
dynamic, defined, 84 n19
Natural selection
criticisms of, 15–17
maximization of profits and, 13–17
mechanism for, 23–29
technological determinism and, 18–29
Nelson, R., 127, 129
Novshek, W., 23, 58
Nozick, R., 186

Oligopolies
asymmetric, 67–75
and market power, 48–81
and price competition, 66–77
product asymmetry in, 74–77
and quantity competition, 53–65
Optimal control, model of, 75
Organization(s), channels of communication in, 140
Organization(s), forms of, 138–160
economies of scale and, 144–146
interfirm relations, 147
and market power, 48–81
and market strategies, 151–160
and market strategies, profit maximization, 152
and market strategies, vertical integration, 155
M-form, 139–146, 143
polymorphism of, 146–151
quasi-disintegration, 150–151
and types of corporate action, 157
V-form, 141–142
Output vector, Cournot-Nash equilibrium and, 55

Panzar, J., 148
Perfectly contestable market
defined, 25
equilibrium configuration in, 25–28
Picard, E., 186
Popper, K., 189–190, 194
Population, growth in, equations for, 29–30
Porter, M., 120
Posner, R., 187
Post-entry trade, in industrial policy, 174–179, 175
Price, as entry barrier, 116–117
Price competition
Bertrand’s model of, 66–68
oligopolies and, 66–77
Price flexibility, industrial policy and, 168–170
Product life cycle
industrial strategy(ies) and, 196
theory of, 34
Profit(s), maximization of, 152
criticisms of, 15–17
as entry barrier, 108
market strategies and, 152
and natural selection, 13–17
Quantity competition, oligopolies and, 53–65
Quasi-disintegration, 150–151

RAC. See Ray average cost
Radner, R., 126, 139
Rational conjectural variation, 63–64
Rationality, limits of, 121–129
Rawls, J., 186
Ray average cost, 21
defined, 40 n13
Rothschild, W., 126
Salm, S., 116
Scheffman, D., 116
Schelling, T., 70–71, 107
Scherer, F., 98
Schumpeter, J., 5, 126–127
Schwartz, N., 104
Selection
generic, 205 n26
process of, 203–204 n17
Selection criterion, 19–23
defined, 18
equation for, 19
Selection mechanism, 23–29
defined, 18
Walras’s tâtonnement process for, 23–25
Salop, S., 116
Sethi, S., 104
Smith, J. Maynard, 77–78
Society, industrial, selection in, 191–199
Sombart, W., 127
Sonnenschein, H., 23
Species, relations between, 30–34, 31, 32
analogies to economic conditions and, 34–36
Stackelberg’s model of asymmetry, 68–70
Stern, N., 61
Stigler, G., 100
Subadditivity, of average cost function, 20–21
equation for, 19
Index

Subadditivity, and economies of scope, 40 n15
Sunk costs
defined, 100
economies of scale and, 101–102
equilibrium in absence of, 102
Survival mechanisms, biological interactions and, 29–36
Sutton, J., 76
Sylos-Labini, A., 101

Tâtonnement process, Walras’s, 23–25
Taubman, P., 184
Technological determinism, and natural selection, 18–29
Teece, D., 148
Theil, H., 51
Thisse, J., 76, 104
Thuillier, P., 181
Tilton, J., 177
Toynbee, A., 190

U-form, of organization(s), 141–142
Ulph, D., 62

van Duijn, J. J., 197
Vertical integration, 155
Vico, G., 190
Volterra, V., 33

Walras, L., 24
tâtonnement process, 23–25
Waterson, M., 60
Weber, M., 127
