  rationalism of, 18
  syllogisms of, 24, 31, 65, 133, 169, 202–203
INDEX

Aristotle (continued)
Topics, 3
traditions of, 152, 165

Arithmetic
binary, 189
formalized, 72, 79, 118, 249, 258, 264
numerical, 60, 99, 101, 134
operations, 74, 80, 100, 178, 198
ordinary, 83, 201
rules of, 66, 119, 177, 183, 198, 200-201, 264-265
substantive, 279-280

Arnauld, A., 106
Ars Cogitandi, 106
Ars Magna, 52, 54, 62, 71

Art
of invention, 100
of notation, 70
symbolic, 117, 128

Asceticism, 11

Assertion and negation
principles of, 9, 245, 271

Association
concept of, 108
disjunction and conjunction of, 226
laws of, 134, 179, 192-193

Astronomy and astronomers, 56, 80, 112, 162, 217-218, 221

Atomism, 14, 18

Averroës, 8, 12, 21
Avicenna, 8, 21, 33

Axiomatization
Curry's, 225
deductive, 9-10, 91, 222, 224
forms of, 51, 57, 133, 181, 217, 245, 264, 276, 281

Lukasiewicz's, 270-271
Peano's, 278-280
Poretsky's, 224-225
Wolf's, 99

Axioms, 72-73, 99, 214, 224, 227-230, 262, 265, 270-271, 278

Bacon, Francis, 51, 57
Bacon, Roger, 17, 19-20

Barbara
mode, 126, 155
syllogism, 122, 135
Basel, Switzerland, 93-94, 113
Baumgarten, A. G., 100
Beck, Jakob Sigmund, 130
Becker, Oskar, 232

Beaufilschrift, 265-266, 271

Being
quantitative evaluation of, 19
rational, 185
study of, 114

Belobodsky, Andrei Khristoforovich, 54

Bentham, George, 148, 150, 152-153

Berlin Academy of Science, 96, 104, 114, 134

Bernoulli, Johann, 63, 93-95, 111

Bernoulli, Jakob, 78, 93, 95, 101, 111

Bertholdi, G. W., 131

Bezobrazova, M. V., 54

Binary symmetric operations, 87, 106-107, 212, 223, 279

Birkhoff, Garrett, 202, 262

Biryukov, Vladimirovich, 264

Blake, Archie, 216, 238-240

Bobynin, V. V., 162

Bochenski, J., 21, 44

Body and soul
relationship between, 59

Boehner, Philotheus, 15-16, 29

Boethius, A. M. T. S., 2-4, 22

Bolzano, Bernard, 143-147

Boniface VIII, Pope, 15

Boole, George
absorption principle of, 251-252
antiformalistic views, 176
calculus of classes, 156, 170, 177, 179, 181, 190-191, 197, 202, 255, 258, 260
Boole, George (continued)
and chemistry, 176
critics of, 189
definition of inclusion, 191, 211
development law of, 208
disjunction theories of, 178, 205, 233, 258, 268
elimination problems of, 182, 196, 221
on equations, 120, 179, 183, 216, 234
followers of, 191, 202–203, 216, 271
group invariances, 214
idempotence laws of, 119
interpretative logical rules of, 110, 122, 177, 187, 196, 208, 284
*Mathematical Analysis of Logic*, 162
methodological ideas of, 4, 174, 211
as natural materialist, 175
operations and problems of, 178, 186, 190, 197, 210, 227
scientific interests, 171
and subjectivism, 175
union, 248–249
Boole, John, 170–171
Bourbaki, N., 266–267
Bradwardine, Thomas, 21
Brody, Benjamin, 176–177
Brooke, William, 170
Bruno, Giordano, 12, 51–52, 67, 70–71
Bunitskiy, Evgeniy Leonidovich, 216, 247–251, 253
Burali-Forti, Cesare, 280–282
Buridan, John, 20–21, 25, 35–36, 43–48
Burleigh, Walter, 20–21
Byzantine Renaissance, 2
Cabbalistic works, 68
Calculus
Castillon’s, 134
differential, 63, 71, 77, 173, 181
do equations, 243–244, 246
Frege’s, 266
intensional, 127, 134
Lambert’s, 115, 116, 119
language of, 116, 122
Leibniz’, 82, 88, 104, 116
literal, 22, 60, 101
logical, 60, 65, 77, 88, 128, 168, 175, 180, 183, 188, 195, 197, 199–200, 208, 266
Maimon’s, 131–133
mathematical, 58, 66, 72, 100–101, 117, 134
Ploucquet’s, 107, 110–111, 115
Poretskiy’s, 223–225, 229, 232
of predicates, 35, 213, 261, 265
of probabilities, 78
of relations, 111, 161–162
Segner’s, 102
*Cambridge and Dublin Mathematical Journal, The*, 173
Cambridge Philosophical Society, 162, 174
