Peter André is a Ph.D. Student in the Faculty of Environmental Studies at York University in Toronto, Canada. His dissertation is tentatively entitled “The Global Politics of Agricultural Biotechnology: Canada and the Cartagena Protocol on Biosafety.” His research interests include agricultural sustainability, community economic development, and environmental politics. Peter currently teaches in the Environmental and Resource Studies Department at Trent University in Peterborough, Canada.

Jennifer Clapp is Associate Professor in the International Development and Environmental and Resource Studies Programs at Trent University, Canada. She is author of *Adjustment and Agriculture in Africa: Farmers, the State, and the World Bank in Guinea* (London: Macmillan Press, 1997) and *Toxic Exports: The Transfer of Hazardous Wastes from Rich to Poor Countries* (Ithaca: Cornell University Press, 2001). Jennifer is an associate editor of the journal, *Global Environmental Politics*.

David Coen is Senior Lecturer in Public Policy and Director of the MSc in Public Policy in the School of Public Policy at University College London. Prior to joining UCL he was Research Fellow (1997–2001) at the London Business School, where he codirected an Anglo-German study with the Max Planck Group in Bonn on Business Perspectives to Utility Regulation. He is currently editor of the UCL Public Policy Working Paper Series, serves on the editorial board of *Business Strategy Review*, and is the Chair of the Business and Government Research Network of the International Political Studies Association. David has published extensively and consults on European public policy, business-government relations, and regulatory reform.

Peter Dauvergne is a Canada Research Chair in Global Environmental Politics and Associate Professor of Political Science, University of British Columbia. His research focuses on the international political economy of sustainable development, environmental ethics, and the politics of environmental management in the Asia-Pacific. His most recent book is *Loggers and Degradation in the Asia-Pacific* (Cambridge University Press, 2001). Peter is a member of the Publications Board of the UBC Press and the founding and current editor of the MIT journal *Global Environmental Politics*.

Robert Falkner is lecturer in international relations at the London School of Economics and associate fellow of the Sustainable Development Program at the Royal Institute of International Affairs. Before joining the LSE in 2002, he taught international relations at the universities of Munich, Oxford, Kent, and Essex. His research interests are in IPE and global environmental politics. Robert is co-editor of *The Cartagena Protocol on Biosafety: Reconciling Trade in Biotechnology with Environment and Development?* (2002).

Matthias Finger, Ph.D., Political Science, Ph.D., Adult Education (both University of Geneva) is currently Chair and Professor of Management of Network Industries as well as Dean of the School of Continuing Education at the Swiss Federal Institute of Technology (EPFL). His work focuses on the liberalization of the main network industry sectors—postal services, telecommunications, energy, public transport, water, and air transport—and on issues of regulation and public service.

Lucy Ford is Senior Lecturer in International Relations at Oxford Brookes University. Her research interests are in the areas of International Relations Theory and International Political Economy with particular regard to, on the one hand, governance, civil society and social movements, and on the other, to the political economy of sustainable development. Lucy has published various articles including a coauthored piece with Marc Williams (1999) “The WTO, Social Movements and Global Environmental Management” in *Environmental Politics* 8:1.

Sverker C. Jagers is lecturer and researcher at the Department of Political Science, Gothenburg University. He is also directing its interdisciplinary masters program in social environmental science. Sverker’s areas of specialization are green political theory, international environmental politics, and interdisciplinary research methodology. Currently, he is leading a research project on “Public opinions of climate change-related measures and policies.”

David Levy is Professor of Management at the University of Massachusetts, Boston. His research examines the intersection of business strategy, technology, and politics in the international arena. In the last few years, he has studied the engagement of U.S. and European multinationals with the emerging climate change regime. He has undertaken research projects in cooperation with the OECD, the UN Center for Transnational Corporations, and the U.S. EPA. David is currently researching the potential of the renewable energy business cluster in Massachusetts.

Peter Newell is a Fellow at the Institute of Development Studies University of Sussex. He is author of *Climate for Change: Non-State Actors and the Global Politics of the Greenhouse* (CUP 2000), coauthor of *The Effectiveness of EU Environmental Policy* (MacMillan 2000), coeditor of *Development and the Challenge of Globalization* (ITDG 2002), and author of many journal articles and book chapters on the political economy of environmental politics.

Matthew Paterson has research interests in the politics of global warming, ecological perspectives in International Relations theory, and the political economy of global environmental change. His main publications are *Global Warming and Global Politics* (1996) and *Understanding Global Environmental Politics: Domination, Accumulation, Resistance* (2000). He is currently working on a book on the political economy and cultural politics of the car in relation to global environmental politics. Matthew is Senior Lecturer in International Relations at Keele University, United Kingdom.

Johannes Stripple holds a licentiate of Philosophy in Environmental Science from Kalmar University, Sweden, and is now a Ph.D. student in Political Science at Lund University, Sweden. Johannes' research concerns the intersection of global environmental change and international relations, in particular questions regarding security, territory, and authority. Johannes' main publications are "Climate Change as a Security Issue" (in E. Page and M. Redclift, *Human Security and the Environment*, Edward Elgar 2002), and *Climate Governance beyond the State* (Global Governance 9, 2003, with Sverker Jagers).
