

INDEX

- Absolute instability, 5, 9-10
 criteria for, 20-21, 30-31
 criteria of Fainberg, Kurliko, and
 Shapiro for, 139-142
 physical interpretation of, 31-32
- Acoustic power, 67-68
- Adler, R. B., 183
- Akhiezer, A. I., 3, 178, 179
- Alexander, G. C., 115, 183
- Alfvén speed (u_q), 82
- Alfvén wave, 81
- Alfvén wave instability, 81-83
- Allen, M. A., 98, 180
- Allis, W. P., 182
- Amplification rate, general lower bound, 28
 general upper bound, 29
- Amplifying waves, definition of, 5, 10-11
 connection with convective instability, 27-29
 criteria for, 19, 29
 Polovin's criteria for, 36
 in presence of absolute instabilities, 30-31, 38, 167
- Backward-wave amplifier, 37-38
- Backward-wave oscillator, 37, 41, 89, 122
 starting length for, 90, 96
 three-wave dispersion equation of, 89
- Bailey, V. A., 3
- Bers, A., 29, 182
- Bessel function, small-argument expansions of, 99, 102
 Wronskian of, 100, 101, 106
- Birdsall, C. K., 4, 179
- Bobroff, D. L., 181
- Bogdanov, E. V., 4, 180
- Bohm, D., 3, 178
- Boltzmann-Vlasov equation, 6, 48, 119, 148
- Boyd, G. D., 3, 179
- Branch lines, of dispersion equation of warm plasma, 50, 143-147
 of $F(\omega, z)$, 18, 38
 of Green's function, 16
- Brewer, G. R., 4, 179
- Briggs, R. J., 182, 183
- Buchsbaum, S. J., 182
- Buneman, O., 36, 182
- Chodorow, M., 89, 180
- Chorney, P., 2, 4, 55, 120, 178, 180, 181
- Chu, L. J., 4, 179, 183
- C contour, definition of, 18, 19
 poles merging through, 20
- C parameter, of backward-wave oscillator, 89
 in beam-plasma interactions, 89, 91-92, 101, 122-123
- Circular polarization, 72, 150-151
- Circularly polarized components, 72, 150-151
- Convective instability, 5, 9-10
 connection with amplifying waves, 27-29
 criteria for, 20-21, 30-31
- Coupling of modes, see Weak-coupling dispersion equations
- Crawford, F. W., 179
- Cyclotron damping, 73, 79
- Cyclotron waves, of finite beam, 87
 of one-dimensional beam, 74-76
 of thin (filamentary) beam, 103
- Dawson, J. M., 144, 183
- Debye wavelength, definition of, 67
- Debye wave number, 63, 120
- Derfler, H., 21, 143, 145, 146, 182
- Dispersion equation, for longitudinal waves, 50
 for transverse waves, 73
- Distribution functions, nonrelativistic
 Maxwellian, 50
 resonance, 51
 square, 51
- Distribution functions, relativistic
 Maxwellian, 70
- Doppler-shifted frequency, 160, 162
- Double-stream interaction of counterflowing beams, 42-46
see also Longitudinal interactions,
 Reactive-medium amplification,
 Resistive-medium amplification

- Easitron amplifier, 55
 Edson, J., 89, 180
 Electrostatic instabilities, see Longitudinal interactions, Reactive-medium amplification, Resistive-medium amplification
 Energy (negative small signal), 41
 general condition for, 161
 of transverse waves, 74-76
 Essential singularity of $\tilde{F}(\omega, z)$, 22, 33
 Evanescent waves, definition of, 5, 10, 11
 criteria for, 19, 29
 Fainberg, Ya. B., 3, 35, 139, 141, 178, 179, 181
 Fano, R. M., 183
 Feshbach, H., 182
 Field, L. M., 3, 179
 Fourier contour, definition of, 13
 Fourier transformation, definition of, 13
 Freire, G. F., 183
 Frequency-wave-number transformation, 160
 $F(\omega, z)$, definition of, 15, 18
 analytic continuation of, 17-18
 branch lines of, 18, 38
 branch pole of, 21
 essential singularity of, 22-23
 $\tilde{F}(\omega, z)$, see $F(\omega, z)$
 Gerchberg, R., 5, 103, 181
 Getty, W. D., 5, 180
 Gould, R. W., 2, 3, 178, 179, 182
 Green's function, general, 12
 Gross, E. P., 3, 178
 Group velocity, in unstable systems, 33-34
 see also Propagation velocity of unstable waves
 $G(\omega, k)$, definition of, 14
 Haeff, A. V., 2, 4, 178, 179
 Harrison, E. R., 181
 Haus, H. A., 181
 Hebenstreit, W. B., 178
 Helmholtz equation, 85
 solution in circular system, 86
 Imre, K., 70, 182
 Instability, definition of, 9
 condition for in lossless systems, 158-159
 Instability criteria, see Absolute instability, Amplifying waves, Convective instability
 Ion cyclotron frequency instability, in finite systems, 94-95
 in one-dimensional system, 76-81
 Ion plasma frequency instability in hot plasmas, in finite systems, 118-138
 in one-dimensional system, 57-71
 Johnson, H. R., 182
 Kinetic power, 67-68, 111, 130
 Kino, G. S., 5, 89, 98, 103, 179, 180, 181
 Kislov, J. J., 4, 180
 Kitsenko, A. B., 3, 179
 Kovner, M. S., 179
 Kurilkov, V. I., 35, 139, 141, 181
 Kusse, B. R., 143, 183
 Landau, L. D., 5, 9, 35, 50, 51, 139, 144, 181, 182
 Landau damping, 51-52, 54-59, 123
 Langmuir, I., 2, 178
 Laplace contour, definition of, 13
 Laplace transformation, definition of, 13
 Laplacian operator, transverse, 85
 Lifshitz, E. M., 5, 9, 35, 139, 181
 Longitudinal beam waves, 49, 87
 Longitudinal interactions, cold beam-plasma, 32, 48-49
 warm plasma, 53-70
 see also Reactive-medium amplification, Resistive-medium amplification
 Longitudinal mass, 71
 Louisell, W. H., 182
 Mapping of $\omega(k)$, 30
 Maxum, B. J., 98, 183
 Maxwellian distribution function, non-relativistic, 50
 relativistic, 70
 Morse, D. L., 5, 96, 180
 Morse, P. M., 182
 Nergaard, L. S., 178
 Neufeld, J., 179
 Nonconvective instability, see Absolute instability
 Normal modes, definition of, 11
 continuum of, 16
 response expressed as, 16, 17
 Nunnink, H. J. C. A., 4, 180
 Perveance, 101-102, 111-112, 116-117
 Pierce, J. R., 2, 3, 90, 110, 178, 181, 182, 183
 Plasma wave, quasi-static, approximation for in waveguide, 86-87
 in hot-electron plasma, 120-121
 Polarization of transverse waves, 72, 150-151
 Polovin, R. V., 36, 139, 181

- Power, acoustic, 67-68
 small-signal kinetic, 67-68, 111, 130
 see also Energy, negative small-signal
Propagation velocity of unstable waves, 23-27, 38
Pulse, spatial, on unstable system, 9, 23-29, 35
Puri, S., 124, 133, 137, 183
QC (space-charge parameter), 89-90, 92
Quasi-static approximation, for beam-plasma dispersion equations, 85-86, 97, 162-164
 for plasma waves, 86-87
 validity of, 84-85
Reactive-medium amplification (instability) in finite system,
 in filled waveguide, 88-89
 in hot-electron plasma, 122-123
 with thin beam, 99-100
 of transverse mode, 103-106
Reactive-medium amplification (instability) in one-dimensional system, 54-57
 condition for 60-62
 with infinite growth rate, 63-67
Relativistic mass, longitudinal, 71
 transverse, 74
Residue evaluation of $F(\omega, z)$, 17
Resistive-medium amplification (instability), 4
 in finite system, 123-124
 one-dimensional longitudinal, 55, 57-59
 one-dimensional transverse, 79-81
Resonance distribution, 51, 72
Rukhadze, A. A., 3, 179

Saddle point of $\omega(k)$, 30-31
Serafim, P., 181
Shapiro, V. D., 35, 139, 141, 181
Shimabukuro, F., 179
Siegman, A. E., 182
Smullin, L. D., 2, 4, 47, 55, 120, 178
Space-charge parameter QC, 89-90, 92
Space-charge waves, of finite system, 49
 of one-dimensional system, 87
Spalter, J., 180
Square distribution, 51
Starting length for oscillation, general, 37
 of backward-wave oscillator, 90
 of cyclotron waves, 96
 of space-charge waves, 91-92, 101
Stepanov, K. N., 3, 179
Stix, T. H., 4, 78, 148, 180
Stover, H., 180
Sturrock, P. A., 5, 9, 11, 24, 35, 36, 160, 167, 181, 183
Sumi, M., 3, 179
Surface charge, 163
Synchronous beam waves, 103

Tchernov, Z. S., 4, 180
Temperature, 50
 in relativistic plasma, 70
Transformation of frequency-wave number, 160
Transformation of small-signal energy and power, 160-161
Transverse beam waves, 73-75, 160-161
Transverse interactions, at ion cyclotron frequency, 75-81
 at very low frequencies, 81-83
Transverse mass, 74
Transverse waves in cold plasma, 73
Traveling-wave-tube amplifier, 37, 41, 68
 analogy with beam-plasma system, 92, 122
Trivelpiece, A. W., 2, 178, 180, 182
Twiss, R. Q., 3, 5, 9, 178, 181

Unstable wave, definition of, 9

Valun, J., 181
Van Kampen, N. G., 16, 144, 182
Van Kampen modes, 16, 144
Velocity, average thermal, 50
Vlaardingerbroek, M. T., 4, 180, 181
Vlasov equation, 6, 48, 119, 148

Walker, L. R., 55, 182
Weak-coupling dispersion equations, 39-42
Weimer, K. R. U., 4, 180, 181
Wright, H., 179
Wronskian relation for Bessel functions, 100, 101, 106
