# Subject Index

- Absorption, 287
- Allis diagram, 302, 322, 324, 327
- Ambipolar equations, solutions of, 101
- Ambipolar transition, 89
- Amplification factor for an electron beam in a plasma, 277
- Angle distribution of scattered electrons, 43
- Appearance of the high frequency discharge, 243
- Attenuation, variation between cutoff and resonance, 162
- Attenuation of a right-hand polarized wave transmitted through a plasma, 286
- Breakdown, initial avalanche in, 420
- Breakdown of helium, 239
  - in parallel electric and magnetic fields, 238
  - in transverse electric and magnetic fields, 231, 232
  - theory of, 421
- Breakdown voltage for hydrogen, 262
- Čerenkov waves radiated by an electron, 157
- Comparison between theoretically predicted threshold voltages and the experimental points, 436
- Coupling between electromagnetic and electron waves, 317
- Debye sphere, 183
- Diamagnetism, variation with  $\mathbf{B}$ , 337
- Diamagnetism of a cylindrical plasma, 333
- Difference between the transport and guiding-center variables, 349
- Diffusion coefficient, effective, 80, 84
  - as a function of magnetic field, 218
- Dispersion, extraordinary waves, 312
  - parallel to  $\mathbf{B}$ , 298
  - perpendicular to  $\mathbf{B}$ , 299
- Dispersion in a plasma, 296
- Dispersion relation for beam excitation, 276
- Distribution, in random velocity of electrons, 115
  - in velocity for elastic collisions, 109
- Distribution functions for hydrogen, 259
- Effective field resonance in magnetic field, 229
- Elastic cross section of helium, 44
- Electric field, 251
- Electron, wave theory of, 5
- Electron density, variation of, 251
- Electron diffusion and mobility, 51
- Electron drift in magnetic field, 58
- Electron plasma oscillations, 269
- Electron-waves in Compton effect, 14
- Emission of microwaves from a plasma, 287
- Hall coefficient vs. magnetic field, 178
- Hall mobility, as a function of magnetic field, 175
- High frequency breakdown, 252
- High frequency discharge in the presence of plasma resonance, 242
- Ionization rate, 251
- Loss constants, as a function of mirror ratio, 395
- Magnetic field, effect on breakdown, 225
- Magnetic mirror, effective length of, 408, 409
- Magneto-resistance, 206
  - vs. magnetic field, 178
- Mean energy, equivalent single excitation potential, as functions of  $p/E_e$ , 264
- Nomenclature, modes, 298
- Normal wave surfaces, 288, 289

- Number of collisions per electron lifetime, 263
- Number of excitations and ionizations per electron lifetime, 262
- Observations of electron density and oscillation intensity, 278
- Phase shifts, for helium, 42
  - for hydrogen, 41
- Plasma theory, 127
- Plasmas, cold, 300
- Polarization, due to bound and free electrons, 281
  - principal waves, 283
  - six principles of, 308
- Propagation constants in a magnetic field, 284
- Propagation of waves in a plasma in a magnetic field, 280
- Relation between the transport and the orbit models for a plasma, 339
- Resonance and cutoff lines, 158
- Scattering, effect of exchange, 36
  - of slow electrons, 19
- Scattering loss from magnetic mirror, 360, 399
- Steady-state speed distribution of ions in a magnetic mirror system, 394
- Theoretical threshold voltages, 432
- Thermonuclear efficiency, relative, 414
- Transition from free to ambipolar diffusion, 63
- Transverse mobility, as a function of magnetic field, 175
- Vlasov dispersion relation, 271
- Wave in a non-uniform plasma, 277
- Wave normal surfaces in a plasma in a magnetic field, 159, 284
  - showing the effect of ions, 161
- Wave surfaces near the plasma frequency, 160
- Waves in hydrogen atom, 11
- Waves in plasmas, theory of, 290
