

## **Preface to the Paperback Edition**

MIT Press encouraged me to mention a couple of important updates in this preface for the paperback edition. First, my mother now has e-mail. Second, many readers have asked if my statement in the original prologue that “my employer ... the World Bank ... encourages gadflies like me to exercise intellectual freedom” was really accurate. Well almost. It should be modified slightly to “the World Bank ... encourages gadflies like me to find another job.” I am now happily ensconced in the Center for Global Development, a new think tank founded by Ed Scott, Fred Bergsten, and Nancy Birdsall, and at the Institute for International Economics (both in Washington D.C.). In January of 2003, I will join the economics faculty at New York University.
