

## Index

Notes are indexed only when they significantly amplify the main text. They are identified by N preceding the page number to which they refer, and can be found between pages 385 and 416.

- Acquired characters. *See* Inheritance of acquired characters
- Adoption, 187–188. *See also* Foster parents
- Agency, 208–209, 224, 231. *See also* Reproducer
- Aging, 130
- Agriculture, 237, 296–297, 363, 366–367, N237
- Aisner, R., 170
- Alarm calls, 34–35, 54, 159, 194, 196
- Alleles 24–25. *See also* Gene metastable, N332
- Alternative splicing, 65–67
- Altruism, 34–5, 187
- Amplification of DNA, 69–70
- Animal traditions. *See also* Behavioral inheritance; Cultural evolution; Lifestyle evolution
- in birds and whales, 172–173
- in black rats, 170–171
- in chimpanzees, 177, 183, 313, 368
- complexity of, 178, 180
- and conservation practices, 190, 370
- and cumulative evolution, 176–180, 220, 335
- in insects, 189–190
- in macaques, 178–180, 183, 188, 207, 220
- origins of, 333–336
- prevalence of, 177
- stability of, 179, 182–185
- in tarbutniks, 158–159
- in tits, 169–170
- Antirrhinum*, 141
- Aphids, 83–84
- Arabidopsis*, 268–269, 270
- Ascaris*, 68–69, 83, N68
- Asexual reproduction
- and epigenetic inheritance, 114–118, 138, 148, 250, 275, 277–278, 346
- and sexual reproduction, compared, 82–84, 103, 346
- Asimov, Isaac, 78
- Assimilate-stretch principle, 290–292, 308–309, 309–310
- Avital, E., 156, 291
- Bacillus*, 138
- Bacteria, 237, 328–329
- epigenetic inheritance in, 119, 138, 332
- genetic systems of, 30, 85, 233
- mutation in, 79–80, 88, 93–98, 105, 106, 322–323, 345–347, 364

- Baldwin, J. M., 289, 293
- Baldwin effect, 289–290, 310–311, N289. *See also* Genetic assimilation
- Bateson, P. P. G., 186
- Bateson, W., 23–24
- Beaver dam, 237
- Behavioral imprinting
- in ducks, 218
  - filial, 167–168
  - on habitat, 181, 184–185
  - on helpers and adopters, 186–187
  - in insects, 190, 240, 367
  - on parasite's hosts, 185, 240
  - sexual, 168, 181, 185–6
  - song, 172–173, 185
- Behavioral inheritance
- through behavior affecting substances, 161–165, 182, 189–190, 334, 367
  - through imitation, 172–175
  - through nonimitative social learning, 157–161, 166–172, 181, 189–190
  - origins of, 333–336
  - stability of, 181–184
- Belyaev, D. K., 259–260, 272, 347–348
- Biotechnology, 58, 136–137, 366, 382. *See also* Genetic engineering, by humans
- Birds. *See also* Bowerbirds; Ducks; Mauritius kestrels; Ostriches; Peacocks; Tits
- alarm calls of, 34–35
  - helpers in, 186–187
  - imitation by, 172–174 (*see also* Parrots)
  - imprinting in, 167, 173, 181, 185–187
  - parasitic, 185
  - seed caching by, 183
  - songs of, 54, 161, 172–173, 185, 202, 218, 288, 368
- Blackmore, S., 207–208, 211
- Black rats, 170–171, 176, 178, 237
- Bloom, P., 314
- Bonobos, 304, 337–339, 349–351
- Boojums, 382–383
- Bowerbirds, 169
- Bowler, P. J., 22–23
- Boyd, R., 205
- Brassica nigra*, 98–99
- BSE (bovine spongiform encephalopathy; mad cow disease), 123, 125
- Buss, D. M., 216
- Butler, S., 21
- Butterflies, 83, 190, 240
- Caenorhabditis elegans*, 76, 133, 135, 144, 331, 344–345
- Cairns, J., 79–80, 88
- Canalization, 65. *See also* Genetic assimilation
- of behavioral traits, 290, 311–312
  - of morphological features, 44, 262–265, 267–268, 272–273, 282
  - and plasticity, 78, 312, 377
- Cancer, 86, 372
- diagnosis and treatment, 248, 364–365
  - epigenetic aspects of, 130, 144, 148, 248, 366
- Cannibalism, 124
- Caporale, L. H., 101
- Carroll, Lewis, 382
- Carrot juice, 163–164, 181
- Cassirer, E., 193–194
- Categorization, 172, 175, 291–292, 305–307, 308–309, 314–316
- Cattle
- bovine spongiform encephalopathy (BSE), 123, 125
  - domestication and dairying, 293–296
- Cavalier-Smith, T., 122–3, 328–329
- Cavalli-Sforza, L. L., 205
- Cell division. *See* Mitosis; Meiosis
- Cell heredity. *See* Epigenetic inheritance
- Cell membranes, 122–123, 147, 151, 328–329

- Cell memory, 113–114, 137, 251–254, 325–326, 344–345. *See also* Epigenetic inheritance  
erasing, 138–139, 149, 253–254
- Cell organelles, 32, 33, 329
- Central dogma, 31, 104–105, 152–153, N31
- Chaperones, molecular, 266–270, 273, 347
- Characters, definition of, 390. *See also* Genes, and characters; Traits as units of evolution
- Chickens, 66–67, 153
- Chimpanzees, 124, 173, 193, 337  
cultural traditions in, 177, 183, 313, 368  
genomes of, 76, 83  
and language, 302, 304, 337–339, 349–351
- Cholesterol, 61, 72
- Chomsky, N., 218, 298–303, 313–316
- Chromatin diminution, 68–69
- Chromatin marking, 126–132. *See also* Genomic imprinting
- Chromatin marks, 128, 134, 137, 145, 270, 366, 371  
through DNA methylation, 128–131, 138, 140, 142, 143, 247–248, 329–332, 344–345, 366  
environmental influences on, 144  
evolutionary origins of, 329–332, 352  
and genetic change, 247–250, 344–345  
through histone modification, 131–132  
persistence of, 138–144, 150–151, 256–257, 332, N332  
through proteins, 131, 138, 270, 331–332, 345  
transgenerational transmission of, 137–144, 269–270
- Chromatin structure, 126–128, 246, 270, 329, 351–352. *See also* Chromatin marks
- Chromosomes  
bacterial, 30, 85, 138  
elimination of, 70, 139, 256  
inactivation of, 138, 256–257, 279–280  
and Mendelian genes, 27–28, 29, 81, 85  
number of, 5, 81, 83, 259  
origins of, 342, 343, 351–352  
polyploid, 69  
polytene, 69–70  
sex, 256–258, 278–280  
structure of, 126–128, 246, 351–352  
Weismann's view of, 16–17, 18–19, 68–69
- Ciliates, 121–122, 138, 328
- CJD (Creutzfeldt-Jakob disease), 123, 125, 266, 365
- Clones, 82, 114, 250. *See also* Asexual reproduction
- Cloning, 59, 150, 366–367
- Cnemidophorus uniparens*, 83
- Cockroaches, 190
- Coen, E., 142
- Coevolution, N293  
of genes and culture, 293–298  
of genes and language, 306–310, 315–316
- Cone stripping behavior, 170–171, 176, 178
- Conservation practices, 168, 190, 369–370, 371–372
- Coprophagy, 164
- Copying processes, 234  
content insensitive, 55, 210, 226  
content sensitive, 55, 174–175, 209, 211 (*see also* Reconstruction processes)
- Coronary artery disease, 60–62, 71–72
- Correns, Carl, 24
- Cortical inheritance, 44, 121–122, 328. *See also* Structural inheritance
- Cosmides, L., 216, 231
