## **INDEX**

ADOPTION OF IT 106–8	in teleshopping 213
Alvey programme 1, 2, 197	theories 254–255
applications model 217–9	collaboration 184
approaches to IT 251-8	commercial spin-offs 238–240
arousal 58	see also cost-benefit, economic factor
artificial intelligence 5	communication 155–156
see also expert systems	channels 38
Attitudes to 17 26, 112, 118–119, 140,	disabled 149–150
193–210	doctor-patient 118
and behaviour 194	compatibility
change 195, 196, 202, 203	cognitive 74–76
dimensions of 200	movement 74
employees 201–202	spatial 74
experience 204	computer-based learning 167, 168
managers 203, 252	impact 169–176
measurement 195	motivation 169–171
nature of 194–196	computer crime 207
public 197–198, 204	computer integrated manufacturing
trade unions 198-199, 203-204	47-48
unemployed 199–200	computerized numerical control 47,
automation 5, 45-64	48-49, 51-60, 201
autonomy 111	consumer products 256
awareness 197, 251	cost-benefit of IT 232, 233, 257
aa.ee.e.e.e.e.e.e.e.e.e.e.e.e.e.e	see also economic factors
BANKING 212	curriculum development 170, 227
bar code scanners 80	,
benefits of IT 24–25	data entry 70–71
for the disabled 149-166	decision making
for education 167-190	medical 107
for home-based systems 231–249	rules 131
for organizations 24–25	demographic changes 244
blindness 153, 161–162	design aids 97–98
block interaction model 224–226	deskilling 25, 52, 61, 202
braille 160	development of
	attitudes
CADUCEOUS 142	т 251–252
CASNET 141	disabled 149-166, 256
centralization 25	muscular strength 152
change	domestic IT
attitude 195, 196, 202, 203	see home-based applications
technological 29–34, 48–51	drill-and-practice 170, 177
character shape 69	drug interaction critic 142–143
choices	DVLC 4
medical 116–117	Dvorak keyboard 77
see also options	
classroom interaction 171, 172	
clinical effectiveness 117–118	EDUCATION 104, 144–145, 167–190
Cockroft report 170	
cognition	development 159–160
development 171–173, 176–181	handicapped 156–158
acterophicity x/ x-1/0, 1/0 10x	technology 167

employment effects 163-164, 199-200	INFORMATION FLOW 87
see also job losses	innovation cycle 30–34
equipment control 227	input devices 76–82
ergonomics 1–19, 65–69, 215, 245,	interface design 92–100, 156
255–256	see also ergonomics, human factors
philosophy 66–67	introducing 1T 38–41
see also human factors	107 024 027 020
errors 2, 4, 8	JAPAN 197, 236, 237, 239
ESPRIT programme 96	job design 25
evaluation	job loss 197, 199, 201, 206
of CBL 173–176, 178	see also employment effects
techniques 37–38	joysticks 80
of usability model 221–226 expert advice 94–95	KEYPO A DDC 76 151
expert advice 94-95 expert advisers 35–37, 50, 56	KEYBOARDS 76, 151
expert systems 8, 113, 129–147	alphabetic 76–78 chord 78–79
design 139–140	Dvorak 77
structure 131–134	numeric 78
expertise 182–184, 232, 233	keypads 78
exploitation of it 2	
eye movements 72, 73–74	knowledge acquisition 136–139 knowledge engineering 8
cyc movements 72, 75 71	knowledge engineering o
	LANGUAGE DISABILITY 158–159
	layout of information 71-73
FACTORY AUTOMATION SYSTEMS 46–49,	levers 80
51–60	lightpens 80, 98
fifth generation computers 237, 239	LOGO 158-159, 181, 183, 184
flexible manufacturing systems 47, 49,	
199–204	MANAGEMENT
frames 134	aids 108-109, 110
function 241	information systems 39, 108-109,
future predictions 25–26, 60–62, 124,	110–111, 121–124
145–146	of IT 27-29
	managerial
	control 121
CAMPS 222	decision making 35–38, 107
GAMES 233	planning 50
goals 89, 90, 91, 168, 256–257	marketing 13
GOMS 90	mathematics teaching 173, 179, 180,
government policy 196–197 guidelines 95–96	184
see also handbooks	medical
GUIDON 144–146	consultation 115
Genza III IIO	data collection 144
	diagnosis 141–143
HANDBOOKS 9, 13–14	model 110–113
HEADMED 145	memory 220 mental health 58
health care 105-127, 129-147	models
health hazards of VDUs 91	applications 217–219
hearing 153	approaches 88
hobbyists 232, 233	block interaction 224–226
home-based applications 226-228,	medical 110–113
231–249	organizational 29–34
home services 211–230	psychological 254–259
human factors 60, 99–100, 150	of usability 214–226
see also ergonomics	of use 29–34

of user behaviour 89-92	SACCADES <b>72</b> , <b>73–74</b>
motivation 58, 169–171	screen vs paper 70
Mouse 80–81, 98	semantic networks 133–134
muscle strength 152	shopping
MYCIN 135–136, 144–145	see teleshopping
MICH 133 130, 111 113	skill acquisition 219–220
NAVIGATION TEACHING 175	social
networking 205, 206, 211–229	choice 202, 205
networking 200, 200, 211–229	of homebased it 242–243
OFFICE SYSTEMS 85–102	
office work 86, 88–89, 205	of teleshopping 212
	interaction 181–185
operator control 53–54, 56–57, 58	perception 112
options for IT 29–34, 35–38	psychology 18, 90–91, 112
organizational	relationships 255, 256, 257
change 26, 37–38	sociotechnical perspective 51
choices 29–34, 55, 67–68	span of perception 73
decision making 28	speech 243
impact 25, 28–29	standards 10, 11, 13, 96-97
objectives 40	surveillance 227, 252
politics 39	symbiosis 67
psychology 2, 21–22, 23–36	TAGE CLASSIFICATION 70, 72
structure 25–26	TASK CLASSIFICATION 70–73
	teaching
participation 36	mathematics 173, 179, 180, 184
patients' needs 112–113	navigation 175
PATREC 144	see also computer-based learning
PEC 143	technological
perceptual organization 72	change 29–34, 48–51
personal expression 159–160	determinism 202
PIP 144	teleshopping 211–230
population stereotypes 74	teletext 212
Prestel 212, 213–214, 221–226, 233, 234	theory model 219–220
problem solving 88, 170	threat 183
procedures 88	Three Mile Island 4
production rules 131–132	time allocation 86–87
programmed instruction 169	tools 65
privacy 207	touch displays 79–80
psychiatric diagnosis 117	trade union attitudes to IT
psychology	see attitudes
applied 7, 65–81	training 50, 55
