

INDEX

- Abatement activities, 34–35, 84–87
Abrams, Lawrence W., 226n2
Administrative costs, 96
 estimates of, 190, 219n10 (*See also*
 Regulatory costs)
Air quality
 benefit-effective, 152
 legal standards for, 103–104, 152, 155
 optimal, 11, 215
 as a public good, 10
Air Quality Implementation Planning
 Program, 109, 220n4, 221n12,
 227n1
Airshed planning, 1–3, 215
Allowable emission flows, 69, 103
Anderson, Robert J., Jr., 92
Atkinson, Scott E., 22, 77, 92, 109, 116,
 123, 141, 188
Aucamp, Donald C., 224n14, 226n1
Automobile pollutants, 69, 114, 152,
 164, 227n2
Ayres, Robert U., 93

Babcock, Lyndon R., Jr., 223n8
Barr, James L., 226n2
Barry, E. V., 221n6
Baumol, William J., 67, 157, 226nn2,5
Benefit-cost analysis
 benefit-effectiveness, 149
 marginal benefit, 10, 129, 144
 marginal cost, 129, 144
 nonconvexity, 157
 pollution damage, 141
Beneke, Raymond R., 218n4
Benzo(a)pyrene, 75, 228n2
Berglas, Eitan, 228n4
Blemel, K. G., 220n4
Bower, Blair T., 136
Box formula, 99–100
Brownstein, Alan B., 202
Burlingame, Donald E., 150
Burton, Ellison S., 92, 109
Bus transportation, 176

Cement production
 neighborhood effect, 92
 in numerical example, 71
Chicago Project, 136, 139
Clarke, J. F., 221n7
Coal burning
 conversion to gas, 3, 84–85, 94–95,
 176–181, 206, 218n2, 219nn7,9,
 227nn2,18
 low sulfur, 84–85, 179, 220n15, 227n18
Cohen, Alan S., 136
Composite good, 130, 133, 145
Concentration. *See* Pollutant concen-
 tration
Consumer's surplus, 23, 177–178
Continuous Air Monitoring Program
 (CAMP) station, 100, 139
 multiple receptors, 144
Control methods, 38–65
Cooper, Leon, 218n8
Corner optima, 160–162
Cost-benefit. *See* Benefit-cost analysis
Cost of abatement
 accounting costs, 67, 175, 191–193
 capital investment, 67
 depreciation, 67
 increasing marginal cost, 67
 opportunity cost of capital, 66
 proportional to activity, 67, 87
Crocker, Thomas D., 92
Croke, E. J., 220n6
Croke, Kevin, 136, 150–151

Damage
 hospital duration, 150
 morbidity, 150
 mortality, 153
 particulates, 136, 139, 141
 sulfur dioxide, 136, 139
Danielson, John A., 217
Data for the Linear Programming
 Model, 38–65, 69
 aggregation of, 71, 98
 disaggregation of, 71
 rounding out of, 70
 uncertainties in, 70

- Deacon, Robert, 222n1
Decision variables. *See* Control methods
DeNardo, J. W., 221n6
Deweese, Donald N., 189, 218, 224n8, 225n6
Dick, Daniel T., 6
Diffusion formula
 area source, 111, 114
 calibration, 113
 compass sectors, 108, 110
 diffusion factors, 111
 point source, 111
 stack height, 108, 111
Distribution of income
 and marginal benefits, 133
 and welfare optimum, 7 (*See also* Equity)
Divisibility
 and disaggregation, 97
 integer programming, 97
 limitation of, 97
 and multiple optima, 96–97
 and Pigouvian fees, 13, 162
 in the solution, 142, 162, 225n1
Dorfman, Nancy S., 226n10
Dorfman, Robert, 6, 144, 204–205, 226n10
Downing, Paul B., 208
Dual values. *See* Shadow prices
Dwyer, Paul S., 25
Dynamic programming, 222n20

Economic activities, 169, 191–193
Economic efficiency, 6–7, 214–216
Ehrenfeld, John, 77, 96, 208
Elasticity of demand. *See* Feedback on pollution source levels
Emerson, M. Jarvin, 227n15
Emission flows
 allowable, 69
 annual, 68, 91, 99, 170–173
 base-year, 34, 70
 and outputs of goods, 169
 in 1985, 125, 211
Emission inventories, 2, 71, 209
Emission standards
 and least-cost solution, 95, 187
 prohibitive, 187
 and Pure Abatement model, 27, 28
Employment impact
 job loss, 206–207
 new jobs, 207

Energy inputs, 178–179
Enforcement costs. *See* Regulatory costs
Episode control, 108
Equiproportional abatement, 89–90
Equity
 benefit theory of, 204
 as a constraint, 208
 of current programs, 204
 and enforcement costs, 208
 between firms, 92, 208, 210
 and job displacement, 206–208
 in the objective function, 207–208
 and prices, 205
 trade-off for efficiency, 2, 207–208
 (*See also* Lump sum transfers)

Feedback on pollution source levels
 abatement costs, 174–179, 211
 change in the basis, 185
 cross-elasticities, 177
 elasticity of demand, 175–177
 excess abatement, 177
 feedback coefficient, 175–176
 inputs for abatement, 180–185, 214
Ferejohn, John, 224n11
Ferrar, Terry A., 202
Fishelson, Gideon, 136
Fisher, Anthony C., 116
Flue gas desulfurization
 cost of, 87, 98, 181, 227n2
 joint-wastes from, 93
 reduced cost test for, 88
Forecasting abatement, 108, 220n6
Foster, Edward, 191
Freas, Warren, 219n12
Freeman, A. Myrick, 226n11
