*Italicized numbers refer to illustrations*

- Absoluteness, of space, 27
- Accumulator model, of quantitative development, 217–18
- Acredolo, L. P., 40, 42, 44, 46, 47, 48, 50, 52, 101, 103, 105, 166
- Adams, A., 103
- Adults
- spatial location abilities of, 88
  - talk about space of, 181–97
- Aerial photographs, ability to interpret, 157
- Age
- and competence in scaling, 160–61
  - and element-to-element correspondence, 153, 154, 155
  - and spatial information, 137
- Alignment
- children's understanding of, 173–74
  - in competent map use, 151, 162–66
- Allen, G. L., 74
- Allocentric coding. *See also* Egocentric to allocentric shift
- defined, 39
  - of infants, 11
- Andreasen, G., 103
- Animal models, spatial coding in, 20
- Anooshian, L. J., 100
- A-not-B studies, 39, 53, 211
- evidence of, 55–57
  - and infant location choices, 68
  - infant response in, 63–65
  - limitations of, 78
  - and location memory, 61
  - solving problem of, 71
- Antell, S. E., 92
- Asymmetry effects
- predictions about, 29
  - size of, 30
- Autism, children with, 221
- Bailenson, J. N., 169
- Baillargeon, R., 57, 78, 82, 92, 128, 130, 132
- Banich, M. T., 24
- Baron-Cohen, S., 220
- Bartsch, K., 55, 130, 131, 132
- Bayesian procedures, 24, 93
- Behavioral development. *See* Cognitive development
- Behl-Chadha, G., 92
- Bias
- in grammar comprehension, 223
  - in spatial learning, 24, 25
- Blaut, A. S., 157
- Blaut, J. M., 157, 175
- Blind children, spatial inference of, 7, 112–13, 115–16
- Blindfolded children, spatial inference of, 115–16
- Blind individuals, spatial representation of, 114
- Bluestein, N., 166
- Borke, H., 122, 123
- Bowerman, M., 197, 198, 199
- Brain. *See also* Left hemisphere; Right hemisphere
- and behavioral development, 53
  - and visuospatial functioning, 33
- Brain damage
- patterns of dissociation in, 33
  - and spatial coding, 16
  - and spatial deficit, 3

- Bremner, G. J., 40, 42, 44, 46, 47, 48, 103
- Bridge task, in conservation of distance, 128–30, 132
- Brown, A. L., 85, 86
- Brown, R., 198
- Bruner, J., 146
- Bryant, D. J., 40, 42, 44, 46, 47, 48
- Burgund, E. D., 37
