

Index

- Aggregation
 - demand estimation in, 169–70
 - multilateral resistance and, 176–81
 - openness and growth regressions, 185–89
 - over products, 183–85
 - over trading partners, 176–83
 - simulation models, 170–74
 - trade costs and, 174–85
- Agriculture
 - effective protection in US, 241–46
 - trade policy restrictiveness in Mexican, 212–15
- Antidumping duties, 219–21
- Armington assumption, 278

- Balance-of-payments equilibrium, 32–33, 47
- Balance-of-trade function, 47–48, 53–54
 - in external scale economies, 153–56
 - in large countries, 148–53
 - monopolistic competition and, 159–60
 - in two-country models, 163
- Boorstein and Feenstra index, 140–44

- CES-CET model, 278, 294–303
- Coefficient of resource utilization (CRU), 256–57
- Coefficient of trade utilization (CTU), 249
 - duality between TRI and, 253–56
 - Multi-Fibre Agreement and, 258–70
 - and the TRI, 250–53
- Competition, monopolistic, 156–62
- Computable general equilibrium (CGE) models, 241–42
 - operationalizing, 277–81
- Concertina reform, 34–37, 41, 84–87
- Constant elasticity of substitution (CES), 278
 - CES-CET model, 294–97
 - cost and product functions, 299–302
 - expenditure and distorted expenditure functions, 297–99
 - general equilibrium, 302–303
 - preferences, 101–104
- Constant elasticity of transformation (CET), 278, 294–97
 - cost and product functions, 299–302
 - general equilibrium, 302–303
- Consumers
 - cost-of-living index and, 20, 45–47
 - domestic distortions and, 204–10
 - expenditure and distance functions in theory of, 253–56
 - interactions between firms and, 27–30
 - trade expenditure function and, 30–31, 108–109
- Corden index, 144–45, 199
- Costs
 - of protection, 58–59
 - total and variable functions, 299–301
 - trade, 174–85

- Dairy quotas, US, 270–73
- Demand estimation, 169–70
- Discriminatory trade policies, 222–23
- Dispersion, tariff, 13–15, 75–76, 84–87, 97–101
- Distortions
 - computable generalized equilibrium (CGE) model, 278–79
 - consumer distortion index and, 206–207
 - export, 201–204
 - factor market, 210–11, 215–18
 - MTRI of, 208
 - nontraded goods market, 208–10
 - producer distortion index and, 205–206
 - trade expenditure function, 108–10, 126, 131–35, 297–99
 - TRI of, 204–205, 207–208
 - true consumer and producer subsidy equivalents and, 205

- Elasticities, sensitivity analysis of, 293–94
- Employment targets and protection, 247–48
- Endogenous trade policy, 218
- Endowments, exogenous, 32

- Equilibrium simulation models, 170–74
 Equi-restrictive quotas, 135–36
 Estimation bias, 184–85
 European Community, 107
 Exports
 antidumping duties on, 219–21
 distortions to, 201–204
 voluntary restraints on, 107, 258–59
 External scale economies, 153–56
- Factor market distortions, 210–11, 215–18
 Free-trade import volumes, 12–13
- General Agreement on Tariffs and Trade (GATT), 84, 107
 General-equilibrium effective protection, 234–39
 Generalized tariff moments, 76–80, 101–104
 Gravity model, 174–80, 189–93
 Gross domestic product (GDP), 29–30
 distorted function, 279–80
 factor market distortions and, 216
 function with many sectors, 217–18
 and joint product functions, 301–302
 monopolistic competition and, 156–58
 trade expenditure function and, 30–31
 Growth regressions and openness, 185–89
- Hatta normality term, 33
 Hicksian import demand vector, 66, 72
 Hong Kong–US trade, 258–70
 Households. *See* Consumers
- Ideal indexes, 183–84
 Implicit separability, 69–70, 118–19, 121–22, 124, 126–29
 Import volume functions, 62–64, 66–73
 Imports
 effects of tariff reform on, 92–97
 Marshallian demand functions, 72–73, 137
 observable vs. generalized tariff moments and, 101–104
 subsidies and export distortions, 201–204
 tariff moments and effects of tariff changes on volume of, 88–92
 volume-equivalent uniform tariff, 21, 72–73
- Konüs index, xvi, 20, 45–47
- Large countries, trade restrictiveness in, 148–53
 Leamer index, 145–46
- Marginal cost of tariffs, 31–34, 48
 Marshallian import demand function, 72–73, 137
- Mercantilist Trade Restrictiveness Index (MTRI), 21
 calculation of, 62–64, 275–76
 compared to multilateral resistance (MR), 180
 with complex trade policies, 221–22
 Corden index and, 144–45
 definition of, 61–62
 of domestic distortions, 208
 multicountry, 164–67, 285–91
 partial equilibrium antecedents of, 139–40
 quantity analogue of, 253
 quotas and, 137–38
 tariff dispersion and changes in TRI and, 97–101
 TRI relationship to, 64–67, 71–72, 105
 trade-weighted average tariff and, 62–64, 68–71
- Mexican agricultural policy trade restrictiveness, 212–15
 Monopolistic competition, 156–62
 Multi-Fibre Arrangement, 249–50, 252, 258–70
 Multilateral resistance (MR), 176–81, 189–93
- Nash bargaining model, 124–25
 Net substitutability, 116–17, 119–21, 124
 Nontariff barriers (NTBs), 276–77
 coverage ratio, 290
 in computable general-equilibrium (CGE) model, 277–81
 data and data compromises, 283–84
 quota policy and, 281–83
 Trade Restrictiveness Index (TRI) and, 291–93
- Nontraded goods, 127, 295–96
 distortions in markets for, 208–10
 North American Free Trade Agreement (NAFTA), 107
- Observable tariff moments, 101–104
 Openness and growth regressions, 185–89
 Output supply functions, 216–17
- Paasche price index, 142
 Partial-equilibrium effective protection, 229–34
 Partial-equilibrium trade indexes, 139–40
 Partners, trading, 176
 Political economy and effective protection, 225–26, 239–41
 Prices, cost-of-living index and, 20, 45–47
 Producer distortion index, 205–206
 Production targets and protection, 247
 Protection, effective
 computable general equilibrium (CGE) models of, 241–42

- definition of, 229–32
 - employment targets and, 247–48
 - existence and uniqueness of rate of, 232–34
 - general-equilibrium, 234–39
 - objectives of, 246–48
 - partial-equilibrium, 229–34
 - political economy and, 225–26, 239–41
 - production targets and, 247
 - rates of (ERPs), 242–43
 - rent and, 239–41
 - sector-specific income and, 225–29
 - sensitivity analysis, 243–46
 - in US, 241–46
- Quantity aggregates, 249–73
- coefficient of resource utilization (CRU) and, 256–58
 - duality and, 253–56
 - Multi-Fibre Agreement, 258–70
- Quotas
- and Boorstein and Feenstra index, 140–44
 - coexisting with tariffs, 107
 - dairy, 270–73
 - equi-restrictive, 135–36
 - following changes in exogenous variables, 135–36
 - implicit separability and, 118–19, 121–22, 124, 128–29
 - and MRTI, 137–38
 - net substitutability and, 119–21
 - neutral growth and the restrictiveness of, 138–39
 - reform, 119–22
 - rent-sharing and, 124–25
 - tariff, 218–19
 - tariff reform in the presence of, 122–24
 - trade expenditure function and, 108–10
 - and trade reform without restrictions on trade expenditure function, 112–15
 - TRI and, 131–35
 - virtual prices of, 110, 131
 - welfare cost of, 110–12
- Radial reductions in tariffs, 34–37, 40, 86–87, 92–94
- Reform, trade policy. *See also* Trade policy
