
Index

- Acute care medicine, 509-516, 518-519, 531, 534
- Aesculapius, 3
- AI (artificial intelligence). *See under* Patient care computing
- Aid to families with dependent children (AFDC) program, 66
- Allocation of scarce medical resources, 125-134
- Allocational effects of medical technology, 499-500, 505
- Alveolar ventilation, 220
- Ancient Greek medicine, 4, 106, 537
- Angiography, 12
- Arrhythmia, 29, 248
- Artificial heart, 192-212
complete artificial heart, 136-137, 161-165
devices, 136-137, 155-166, 175-180
FDA regulations of, 197-208
left ventricular assist devices (LVAD), 136, 156-166
temporary implantation of, 208-211
- Artificial intelligence (AI). *See under* Patient care computing
- Automated patient-monitoring systems, 28-29, 247-249
- Beneficence, 105-108, 114, 125, 129, 192
- Benefit-cost analysis of medical technology, 38, 39, 71-75
discount factor, 80
mechanics of, 78-85
of new cardiac technologies, 166-170
present value, 72-73, 78-85
- Biomedical engineering, definitions, 13
- Cardiac catheterization, 12
- Cardiac monitoring system, 239
cardiac output, 239-240
- Cardiac technology, 136-213
cardiopulmonary bypass, 156
fundamental principles of heart action, 138, 144
heart disease, 136
- Clarke, Barney, 195, 208, 211, 513-514
- Clinical chemistry, 22, 283
- Clinical information system, 300-304
example of, PATIENT LOOKUP system, 301-304
- Clinical microbiology, 22, 283
- College of physicians, establishment of, 7
- Computed tomography (CT), 30-31, 200, 416-473, 503
compared with MRI, 450-451
CT scanners, 31-33, 416-473
scanning gantry, 431-435, 503
- Computer-based technologies, 304-364. *See also* Patient care computing
- effect on employment in health care industry, 334-338
ethical issues, 338-362
liability for negligence, 340-352
privacy and confidentiality, 358-362
rate of adoption, 331-334
strict liability, 340-348, 352-357
tort liability, 339-348
- Computer revolution, 20-23
- Computerized axial tomography (CAT), 30, 416. *See also* Computed tomography
- Computers in health care, 280-364
effect on costs, 322-331

- Computers in health care (*cont.*)
 in the clinical laboratory, 282-285
 instrument level, 285-290
 introduction of, 280
 management level, 290-295
 medical information systems, 281
 microcomputers, 284, 293
 patient care computing systems, 281
- Coulter counters, 285-286, 302
- Crisis care, 127-129
- Critical care medicine, 218-277
 cardiovascular disease and resuscitation techniques, 218-223
- CT. *See* Computed tomography
- Curie, Marie, 372-373
- Death, 109-116
 brain death, 111-112, 265-267
 criterion for determining, 109-112
 definitions of, 265-269
 euthanasia, 112-116
 neocortical death, 111-112 (*see also* Vegetative state)
- Defibrillators, 136-137, 149-155, 170
- Dehumanization of patient care, 533-549, 563
- Descartes, René, 542-543
- DeVries, William, 161-162, 180, 190, 194-195, 197, 202, 208, 211, 514
- Diagnosis-related groups (DRGs), 67, 464-465
- Diagnostic technology, 479-486, 504
- Diagnostic ultrasonography, 397-399, 502
- Diethylstilbestrol (DES), 199
- Digital image-processing systems, 392-393
- Doppler shift techniques, 407-410
- Drinker respirator, 12
- Drug amendments of 1962, 198
- Early medical practice, 2
- ECMO. *See* Extracorporeal membrane oxygenation
- Economics of health care since 1950, 39-52
 demand curve, 44-45, 325
 equilibrium, 48-49, 325
 market price, 48-50
 shortage, 48-49
 supply and demand, 43, 325
 supply curve, 46-47, 325
 surplus, 46
 total expenditures, 43
- Economics of prevention versus cure, 470-475
- Electrocardiogram (ECG), 141-143
- Electrocardiograph (first), 11, 13
- Electroencephalography (EEG), development of, 12
- Employer-subsidized health insurance plans, 61
- Enthoven, William, 11
- Equitable access to medical technologies, 549-561
- Ethics of medical technology, defined 87-88
 consequentialism, 95
 metaethics, 92
 versus morality, 88
 moral judgments, 90-91
 nonnormative judgments, 88-89
 normative judgments, 88-90, 95
 utilitarianism, 96-102
- Euthanasia, 112-116, 261, 267-269
 autonomy, 116
 involuntary and nonvoluntary, 269, 272, 275-276
 legalization of, 274-275
 passive versus active, 269-272, 276
 voluntary, 269, 272, 274-275
- Expenditures on health care, 38
- Extracorporeal membrane oxygenation (ECMO), 227, 229-232
- Federal food, drug, and cosmetic act of 1938, 198-199
- Federal food subsidy programs, 43

- Fourier method, 438, 447
- Galen, 4-5, 537-538
- Gamma camera, 388-393
- Great society legislation, 39, 62
- Gross national product (GNP), 53-55
- Halfway technologies, 511, 519-524, 526-533, 559, 562
allocation of resources with basic research, 519-533, 562
- Health care expenditures, 52-58
defined, 53
percentage by source of payment, 58
versus United Kingdom, Canada, 56
- Health care needs, 551-564
adventitious needs, 553, 564
course-of-life needs, 553-555, 558-560, 564
species-typical normal functioning, 553-555, 558-560
- Health insurance, 59-62
employer-subsidized, 61
supplementary medical insurance (SMI), 65-66
- Health maintenance organizations (HMOs), 68
- Heart disease, diagnoses of congenital and acquired, 12
- Heart implants, 169-175
- Heart-lung bypass machine, 12, 157
- Heart transplants, 136, 155-166, 176
- Hematology, 22, 283
- Hippocrates, 3-4, 546
hippocratic corpus, 106
hippocratic school, 537-539, 547
- HMOs. *See* Health maintenance organizations
- Holistic medicine, 534, 547-548
- Hospes, 6
- Hospital system, emergence of in America, 6, 9
- Human being versus person, concepts of, 263-264
- Human experimentation, 180
defined, 182
therapeutic versus nontherapeutic, 181-184
versus therapy, 182
- ICUs. *See* Intensive care units
- Imaging devices, 461-465
optimal distribution of, 465-468
- Infectious disease, 521-522
- Information systems, medical. *See* Clinical information system; Computers in health care; Patient medical record data base
- Intensive care units, 17, 26, 239-260, 276
cost of, 250-251
economic issues, 249-250
overuse of, 252-260
- Iron lung, 523-526, 529-531
- Jarvik 7, 161-166, 180, 190, 194-195, 211, 513-514
- Johns Hopkins Hospital, 9
- Kantianism, 102-105, 186, 191-192, 517-518
and traditional medical morality, 108-112
- Life expectancy, 40, 41
- Living will, 273
- Lung capacity, defined, 221
- Ludditism, 334
- Magnetic resonance imaging (MRI) systems, 33, 445-456, 464-465, 467-468, 475, 502
compared with CT, 450-451
economics of, 455-456
future perspectives, 451-455
- Medicaid program, 38, 62-64, 66, 76, 334
- Medical device amendments, 199-200

- Medical imaging, 369-505
Medical price index, 53-54
Medicare program, 38, 62-66, 68-69, 76, 334
Mortality and morbidity, reductions in, 42, 509, 516
MRI. *See* Magnetic resonance imaging
Multiphasic screening systems, 34
Multiphasic testing, 295-296
automated multiphasic health testing (AMHT), 296-297, 300
Myocardium, 139
- National Institutes of Health (NIH), 39, 69
National Science Foundation (NSF), 39, 69
Nonmaleficence, 105-108, 114, 125, 129, 192
Nuclear medicine, 17, 371-401, 502
detection of radiation, 382-388
elementary particles, 373-376
measuring radiation, 378-382
radioactivity, 371-397
radionuclide production and decay, 376-378
- Open heart operations, 227
Operating room charges, 14
Oscilloscope, 237, 247
- Pacemakers, 136-137, 144-149, 166, 169-175. *See also* Heart implants
bradycardia, 144
heart block, 148
Patient care computing, 304-364. *See also* Computer-based technologies; Computers in health care
artificial intelligence, 304-321, 363
economic issues, 321-331
expert systems, 305-321, 339, 363
inference engine, 307, 315-316
- Patient medical record data base, 295-300, 332-335
Patient monitoring, essential components of, 233-239
Patient record management system, 25-27. *See also* Automated patient-monitoring systems
Patient selection standards, 129-132
randomization, 130-132
social worth criteria, 130-132
Penicillin, introduction of, 12
Person versus human being, concepts of, 263-264
Personal disposable income, 57, 59
Phoenix heart, 203-208, 211
Placebo effect, 494-499
Population effects of medical technology, 500-501, 505
Practice/research dichotomy, 182-183
Preventive medicine
defined, 127
versus rescue medicine, 126-129, 509-516, 519, 559, 561
Price elasticity of demand, 324
Prospective payments mechanisms, 67-68, 76
Prosthetic devices, 42
- Quality of life, 487-488
Quinlan, Karen Ann, 206, 276
- Radioactive tracers, 393, 396-397
Randomized clinical trials (RCTs), 493, 495-499, 504-505
Rescue medicine, defined, 126
versus preventive medicine, 126-129, 509-516, 518-519, 561 (*see also* Acute care medicine; Crisis care)
Research expenditures, 70
Research/practice dichotomy, 182-183
Respiratory therapy, 223-227
Roentgen, W. K., 11, 369, 371-373, 417

- Roman Catholic Church, 5-6
Roman empire, 4, 106
- Salk polio vaccine, 523-526, 529
Scintillation detection system, 382-388, 390
- Sepsis, 229, 231
- Sequential multiple analyzer plus computer (SMAC), 23-24, 287-289, 302
- Social security act (1965), 39-40, 62
amendments to, 63
Medicare legislation, 64
title XIX, 66
- Somoscope, 400
- Sulfanilamide, introduction of, 12
- Tax equity and fiscal responsibility act of 1982, 67
- Technological assessment, 493-499
natural history method, 494-495, 501, 504
randomized clinical trials, 495-499, 501, 504
