Anaphora. See Pronouns (and anaphora); Terms Aristotle/Aristotelianism, 3-4, 6, 10, 15, 33, 34, 35, 48, 69, 85, 109, 130-131, 169, 172, 178, 184, 216 Armstrong, D., 57 Atomicity thesis, 49-50, 215 Austin, J. L., 41 Bare particulars, 6, 228-230 categories and, 194ff., 229 criticism of, 203-206 variable as latter-day version of, 193-194, 228-230 Warnock's criticism of Locke on, 201-202, 229 Berger, A., 218-220 Boole, G., 36

Carroll, L., 206 Category theory, 2–8, 26–32, 194ff. ambiguity, rule for forcing, 30–31 Aristotle on, 3 category tree/hierarchy/ordinary language tree, 3–4 dualism and, 5–6, 31 law of category inclusion, 5, 28–29 natural predicability, 3, 35–36 and phenomenalism, 31 psychological reality of category hierarchy, 8, 32, 68–74

rule against M configurations, 28-30, 72-74, 217 Chesterton, G. K., 183 Chomsky, N., 20, 72, 217 Davidson, D., 18, 41, 212, 214 Deductive competence, 1-2, 8-9, 217-218, 228 De Morgan, A., 36 Descartes, R. (on dualism), 5-6 Descriptions, definite, 90ff., 112-113, 117, 219. See also Terms Dewey, J., 18 Dictum de Omni et Nullo (DDO), 15, 172-173, 178-180, 227 Divisions of linguistic and cognitive labor, 77-80 Dummett, M., 2, 14, 52, 184, 212, 214 Englebretsen, G., 207, 211-214, 227 Essences and kinds, psychological bias toward in children and adults, 74-77 Evans, G., 114-116, 124 Existence. See Realism (Sommers's version of) Facts. See Realism (Sommers's version of) Feynman, R., 137 Four-category ontology, 55ff. See also Modern predicate logic (MPL)

Frege, G., 33, 36, 49ff., 60, 63, 85, 169, 184, 191, 213, 214, 218, 222 and atomicity thesis (see Atomicity thesis) disdain for natural language in logical reckoning, 2 and existence, 17-18, 20, 211-212 on passive transformations, 222 on saturated and unsaturated concepts, 185, 216 Geach, P., 35, 52, 169, 184ff., 191, 216 Goodman, N., 7 Higginbotham, J., 92 Horwich, P., 41 Identity in TFL and MPL, 13-14, 51-53, 63, 170, 215-216 Kant, I., 17, 211 Keil, F. C., 8, 32, 216-218 Kripke, S., 74, 86-89, 96, 219, 220 Laws of thought, 2, 8, 17 Leibniz, G. W. (inc. Leibniz's Law), 15, 34, 36, 52, 91, 93, 207 Lewis, C. I., 212 Liar paradox, 223-224. See also Realism (Sommers's version of) Lindell, S., 224-226 Locke, J., 201, 229. See also Bare particulars Logic/logical syntax and ontology, ch. 3 passim, 183-184, 214-216, 218 Logic and information/computation, ch. 8 passim data storage problem, 137-140

elementary term logic (version of TFL), 155–167 information, mathematical representation of, 140–145 information, models of, 150–155 physical storage of data, 145–150 Logic and psychology, ch. 4 *passim*, 216–218 Lowe, E. J., 197, 214–216, 219

May, R., 92, 94 Modern predicate logic (MPL) and bare particulars, ch. 10 passim (see also Bare particulars) copula, 34, 185ff., 191 deductive competence, 1-2, 8-9, 217-218, 228 elimination of names, 191-192 existence, 17-18 and four-category ontology, 60ff. identity, 13-14, 51-53, 215-216 multiply general sentences (contrast with TFL), 14-16 passive transformations, 222 predication, 10-11 quantification, 185-192, 197 relational inferences, 38 restricted quantification, 189-191 sentence negation vs. term negation, 33, 199-201 singular and general terms treated differently, 34 and subject-predicate form, 49-51 translation of categorical sentences, 184-187 variable, role of, 186, 189ff., 192ff., 202 Montague, R., 132 Moore, G. E., 41 Noah, A., 226–228 Oderberg, D. S., 228-230

Peirce, C. S., 36 Philosophy, implications for empirical research, 80–82, 217–218 Prepositions, syntax and semantics of, ch. 6 passim, 220-222 Pronouns (and anaphora), 16-17, ch. 7 passim, 223-224, 230 A-type, 117, 125 B-type, 115-116, 124 and conjunctions, 130-132 descriptions, 112-113, 117, 219 donkey anaphora, 129-130 E-type, 116-117, 124-125 Gareth Evans on, 114-116 pronouns of laziness, 187 relative pronoun/relative clause, 186-187, 192 Pronouns and reference, 186ff., 230 Purdy, W. C., 223-224 Putnam, H., 17, 18, 74, 77-78, 212, 213, 214 Quine, W. V. O., 41, 169, 170, 183, 184ff., 202, 214, 215, 218, 223, 227, 228-230 on categories, 3 elimination of names, 191-192 existence and predication, 194-196 facts, 18, 212 logical vs. nonlogical expressions, 188-189 pronouns, variables, and reference, 186ff. Ramsey, F., 54 Realism (Sommers's version of) de mundo beliefs, 45 existence, 17-20, 212-214 facts, 18-19, 40-47, 212-214 Liar paradox, 45-47

propositions, 45–47 truth (correspondence theory), 40–47,

213–214 Rigid designation, anaphora, and general terms, ch. 5 *passim*, 218–220 Robinson, J. (method of resolution), 169, 175-180 Rorty, R., 18, 41, 214 Russell, B., 12, 20, 36, 41, 60, 69, 85, 87, 211, 228 and atomicity thesis, 49-50 Ryle, G., 2, 5, 26, 30, 31, 69, 216 Salmon, N., 87, 89 Soames, S., 86, 88-89, 219 Sortal logic, 61-63 Strawson, P. F., 18, 35, 41, 219 Suppes, P., 8, 220-222 Szabolcsi, L., 224-226 Tarski, A., 41, 85 Term logic. See Traditional formal logic/term functor logic (TFL) Terms anaphora, 90, 97ff., 220 (see also Pronouns [and anaphora]) basic account of, 87 buckstoppers, 96-97 copula, 90-91 definite descriptions, 90ff., 219 general, ch. 5 passim mass, 92, 218 negation of, 33, 199-201, 229 second-order, 91–93 singular, 97ff., 120 TFL account of, 96ff., 218 Traditional formal logic/term functor logic (TFL) algebraic character of, 8ff., 171ff. and computation, physical realization, ch. 8 passim, esp. 155-167 Sommers's cancellation technique compared to Robinson's method of resolution, ch. 9 passim (see also Robinson, J. [method of resolution]) central characteristics of, 169-170 copula, 34

Traditional formal logic/term functor logic (TFL) (cont.) Dictum de Omni (see Dictum de Omni et Nullo [DDO]) general form of the proposition in, 12,97 identity, 13-14, 51-53, 98, 170 multiply general sentences, 14-16 numerical quantification, 224-226 passive transformations, 222 plus/minus notation, 171ff., 226-228 predication, 10-11, 35-36 prepositions, 220-222 reference, 220 relational sentences, 14-16, 37-39, 170, 220-222 rules for an adequate system of logical reckoning, 9 sentence logic as branch of, 39-40, 171ff., 203-204 simplicity and naturalness, as opposed to MPL, 8ff., 33ff., 228 singular and general terms treated alike, 34-36 singular terms/sentences, 13-14, 37, 97ff., 120 and subject-predicate form, 49-51 syllogisms in, examples of, 13 syllogistic reckoning (deductive inference) in, 13ff., 36ff., ch. 9 passim syntax and semantics of, including pronouns, 118ff. term negation (vs. sentence negation), 33, 199-201, 229 terms such as 'exists' and 'thing', treatment of, 196-198, 218 wild quantity, 13-14, 98 Truth. See Realism (Sommers's version of) Turing, A., 146, 150 Turing machine, 147

Universals and particulars (and fourcategory ontology), 53ff.

Van Heijenoort, J., 218
