Publications of the Joint Center for Urban Studies

The Joint Center for Urban Studies, a cooperative venture of the Massachusetts Institute of Technology and Harvard University, was founded in 1959 to organize and encourage research on urban and regional problems. Participants have included scholars from the fields of anthropology, architecture, business, city planning, economics, education, engineering, history, law, philosophy, political science, and sociology.

The findings and conclusions of this book are, as with all Joint Center publications, solely the responsibility of the author.
