
Subject Index

- Acoustic phonetics
 formant, 99, 182, 185, 187–188, 207
 landmark, 221–222
 voice onset time (VOT), 184
- Acquisition, 6–7, 133, 140, 169, 173, 184–185, 188, 194, 205, 213–214, 221, 264, 279, 291, 310. *See also* Bootstrapping
- Active/passive distinction, 317–323, 325–328, 331–332, 334
- Adaptive dispersion theory, 209–210
- Adjunct. *See* Argument, adjunct distinction
- Admissible history, 350, 351, 358
- Adverb
 frequency, 9, 344–346, 349, 351, 353–359, 378
 sentence level, 152–153
- Agent-based simulation, 156, 163, 167, 172–173, 175
- Agent/patient distinction, 63, 66–67, 82, 85–86, 88, 318, 321–325, 328, 334, 340–341
- Allophones, 2, 109, 177, 179, 188, 194, 195, 210–212, 219, 226–227
- Ambiguity
 lexical, 3, 13, 47–48, 50–51, 53, 62, 85, 367–368
 morphological, 265, 268, 273
 resolution of, 9, 18, 40, 48, 53–72, 75, 80, 89, 95, 291, 307, 330, 336
 semantic, 40, 328
 spurious, 28
 syntactic, 20, 40, 48, 54–55, 59–60, 70, 72, 78, 80–82, 85, 89, 153, 155–156, 162, 169–170, 172, 315, 328, 330
- Analogical Modeling of Language (AML), 95, 181, 244, 257–258, 260–265
- Analysis of Variance (ANOVA), 106
- Approachability in the limit, 311
- Arabic, 192, 197–199
- Argument
 adjunct distinction, 6, 298, 302–303, 305–306, 336, 339
 frame, 6, 305, 308, 338
 of verb, 56–57, 82, 88, 92, 297, 304
- Articulatory effort, 126, 157–158
- Articulatory Phonology, 221
- As least as*, 292–296
- Bayesian Belief Network, 70, 79–82, 85, 94, 339
- Bayesian Reasoning, 12, 16, 35, 40–42, 70, 80, 89, 366
- Bayes' Rule, 16–17, 41–42, 71, 166, 362, 381
- Beam search, 73–74, 78, 84
- Belief net. *See* Bayesian Belief Network
- Berber, 199
- Bigram, 17, 31, 51, 53, 59, 62, 72, 266, 381.
 See also N-gram, Trigram
- Bimodal distribution, 187
- Binary response variable, 333–355
- Binomial, 14, 110, 132, 137, 144, 335, 381
- Bootstrapping, 221, 228, 230. *See also* Acquisition
- Branching time, 350
- Brown Corpus. *See* Corpus
- Butterfly collecting, 296, 299
- Cardinal reading, 367–370
- CART. *See* Classification and Regression Tree
- Categorical grammar, 6, 24, 321–322, 340
- Categorical rule. *See* Categoricity
- Categoricity, 1, 4–7, 10–11, 97–98, 100–102, 106–108, 133, 178, 219, 227, 289–292, 296–298, 300, 306, 308, 312, 315–316, 319–336
- Categorization, 40, 68–69, 133, 185–187, 205, 221

- Category
 lexical, 47–48, 53, 57–59, 70–72, 74–75, 162, 175
 morphological, 62, 240–242
 phonemic, 4, 185–186, 201, 207, 209–211, 226–227
 syntactic, 48–49, 62, 74, 152, 315
- CELEX. *See* Corpus
- Chain rule. *See* Product rule
- Chi-square, 106, 332, 382
- Classification and Regression Tree (CART), 41, 97–98, 123, 128–129, 132
- Class, socioeconomic, 101–102, 295
- Coarticulation, 135, 172–173, 176, 184–185, 188, 228
- COBUILD. *See* Corpus
- Coda. *See* Syllable
- Cognitive science, 2, 263, 265, 290
- Collinearity, 117, 128
- Communities of practice, 98
- Competence, 1–2, 99, 185, 297, 308, 316–317. *See also* Performance
- Complement. *See* Sentential complement
- Conditional
 distribution (*see* Distribution)
 expectation, 373, 375–376, 382
 independence, 80–81, 94, 382
 probability (*see* Probability, conditional)
 quantification, 376
- Conditionals, 359–363
- Connectionism, 35, 89–90, 95, 150, 159, 162, 173, 231–233, 263–265, 268, 286–287, 309, 324, 336
- Constant rate hypothesis, 148–150
- Constraint
 faithfulness, 163–166
 interaction, 63, 316, 324–325, 330, 332
 markedness, 163, 323–324, 332
 ordering, 107, 318, 324–325, 327
 ranking, 155, 163, 165–166, 176, 222–225, 308, 322–325, 327–329, 332, 341
 soft/hard, 297, 310, 313, 316–317, 319, 322, 324–328, 336, 340
 violation, 223, 256, 318, 321–323, 325, 329, 332, 335, 340
- Context-free grammar, 18, 24, 31–32, 36, 42, 59, 70, 72–74, 77–78, 266, 304, 309
 probabilistic (PCFG, SCFG), 18, 21, 23–26, 28–30, 32–36, 42, 59–60, 70, 72–74, 76, 78–82, 266, 304, 315, 330
- Contingency, 353–354, 359
- Contingency table, 135, 142, 146, 382
- Corpus
 Brown, 43, 45, 48, 54, 73, 91, 230
 CELEX, 44, 117, 121–122, 125, 189, 192, 198, 201, 204, 213, 215, 223–224, 247, 251, 267, 275–276, 279, 282
 COBUILD/Birmingham, 121
 New York Times, 293, 295, 299–301, 338
 Penn Treebank, 77, 315, 337
 Switchboard, 46, 50, 325–326
 Wall Street Journal, 91, 338
Cunnan, 161
- Data-Oriented Parsing (DOP), 3, 26, 28, 30–33, 35–37, 42, 193, 213, 266, 312
- Density estimation, 307
- Devoicing, 181, 211, 243, 250–252, 254–256, 258, 260–262, 264
- Diachronic, 45, 101, 103, 172–173, 175, 194
- Dialect contact, 172, 176
- Dialectology, 103, 109, 174
- Diphone, 192, 214–218, 221–222, 228
- Discourse, 41, 80, 91–92, 98, 105, 106, 110, 113, 128, 136–137, 158, 224, 307, 317, 318, 322–324, 328, 340
- Discrete versus continuous categories, 1, 98, 108, 115, 122, 129, 132–133, 137, 290, 313, 332, 340
