

## INDEX

- Abramovitz, Moses, 428  
Acceleration coefficient, 241  
Acceleration principle, 229, 230, 341, 346  
Accounting, 285, 287–289  
Aggregate demand function, 393–394  
Aggregation, 169–170, 315, 328–331, 365, 402, 445, 451  
Agricultural problems, 399–403  
Akerman, Gustav, 296, 298, 386n  
Allais, Maurice, 272n, 297, 298  
Allen, H. V., 386  
Allen, R. G. D., 77n, 417n  
Andronow, A. A., 238n, 240  
Arrow, Kenneth J., 384n, 428, 438  
Asset-substitution equations, 78, 81  
Assets  
    demand for money as, 106–110  
    disadvantages of nonmoney, 246  
    and efficiency and interest rates, 287–289  
    and entrepreneurial decisions, 107  
    income-uncertainty of, 246–250  
    initial, 80–81, 82, 84, 246–250  
    marginal efficiency of, 116n  
    monetary, 246–250, 479, 483, 488  
    plasticity of, 86  
    preference for type of, 248  
    theory of, 74–88
- Bailey, M. J., 360  
Balance of trade, 244  
Balanced growth, 301–312, 464, 490, 497–498  
Banach, Stefan, 275n  
Bank money, 65  
Baran, Paul A., 366n  
Baumol, W. J., 392n, 414  
Bear hoards, 252, 262  
Beckmann, M., 360  
Bellman, R., 419n, 439n  
Belz, M. H., 90, 378  
Bernoullian differential equations, 373, 376  
Bills, 247–249  
Block, H. D., 384n  
Böhm-Bawerk, Eugen von, 296, 298  
Bonds, 84, 108, 146, 247–249, 257, 260  
Boom, 230, 233, 234, 236, 237  
Bossoms, J. D., 402  
Boulding, Kenneth, 298  
Brems, Hans, 364  
Buchanan, N. S., 386n  
Budget, 147–154, 484–485, 488  
Buffer stocks, 405–429  
Burns, Arthur F., 429  
Business cycles, 1–18, 20, 241–243, 381, 399, 412. *See also Cycles*  
Cambridge quantity equation, 62  
Capital  
    behavior of, 436–437  
    and ex ante substitution possibilities, 372–374, 377–381  
    marginal efficiency of, 70  
    marginal product of, 379–481, 484, 485  
    optimal consumption policy for, 439, 441  
    optimum amount of, 294–296  
    real, 287–289  
    shrinkage in, 368–369, 372  
    two concepts of, 287  
    unemployed, 164  
    valuation of, 370, 371  
Capital accumulation, 155–167, 234, 264–300, 370, 376, 414, 435–448, 479, 491  
Capital coefficient, 364  
Capital decumulation, 352n, 353–354, 355–358, 436  
Capital deepening, 480, 481, 486  
Capital expansion, 155–167  
Capital formation, 361, 441  
Capital intensity, 479–482, 484, 485, 486, 489  
Capital-labor ratio, 492, 493, 496, 497  
Capital-output ratios, 341, 479  
Capital stock, 230  
Cash, 84, 143–145  
Cash hoarding, 88, 95, 252–256, 262  
Cash holdings, 75, 80, 82, 86, 87  
Cassel, G., 314  
Cauchy expansion, 213  
Cauchy theorem, 51n, 58  
Central planning, 366n, 371, 492, 494  
Certainty equivalence property, 386  
Chaikin, C. E., 238n, 240  
Champernowne, D. G., 335  
Cheap money, 88, 261–262  
Chenery, Hollis B., 408n, 409  
Chipman, John S., 303, 406n, 420n  
Chronics, 266–268, 270–283  
Clark, Paul G., 408n  
Classical economics, 61–65, 124–127, 127–129, 132, 287n, 481, 489  
Coase, R. H., 403  
Cobb-Douglas technology, 480  
Cobb-Douglas type function, 177–178, 182  
Cobweb theorems, 399–403  
Constant returns to scale, 301–312, 315, 413  
Construction, 11–12

- Consume, propensity to, 71, 135, 148, 436  
 Consumption  
   in closed input-output model, 348–349  
   and golden rule turnpike property, 490  
   in multiple-region theory of income and trade, 205–206  
   in multi-sector inventory model, 414  
   optimum, in a sequential utility analysis of accumulation of risky capital, 439–440  
   and optimum growth paths within a finite horizon, 496  
 Consumption function, 150–152, 236–237, 415n, 436, 443–445  
 Consumption-savings plan, 105–106  
 Credit and banking monetary theory, 74  
 Credit inflation, 17–18  
 Cycles, 19–60, 331n, 380–381, 402–403.  
*See also* Business cycles
- Dean, G. W., 399  
 Debreu, Gérard, 420, 437n  
 Decentralization, 269–270, 279–281, 284, 285–287  
 Deficit spending, 486, 487  
 Deflation, 72, 134–135, 487, 489  
 Demand and supply, joint, 75, 76, 78  
 Demand in modified von Neumann model, 331–332  
 Deposits, active and idle, 90–91, 94–95  
 Depreciation, 365n, 366, 371, 480  
 Depression, 16, 69, 230, 233, 234, 236, 237  
 Determinate system, 75, 77, 350, 352  
 Diminishing returns, 80, 311  
 Disconnected economy, 317  
 Disturbances. *See also* Fluctuations  
   and cobweb theorems, 400  
   and dynamic feasibility, 417n  
   and inventory speculation, 392, 394–396, 397  
   and multi-sector analysis of the inventory cycle, 418  
   random, 386, 402  
   and rational expectations, 386, 387–389, 390–391  
   and summation of random causes as the source of cyclic processes, 45–46  
 Divisia, F., 74, 186  
 Divisia index numbers, 171, 173, 177  
 Domar, Evsey D., 364, 366n  
 Dorfman, R., 342, 346, 451, 452, 490  
 Dresch, Francis, 170, 171–177  
 Duesenberry, James S., 241n  
 Dynamic models, 341, 385
- Efficiency, 271, 284–291, 450
- Efficient chronics, 291–293  
 Efficient paths, 452, 455, 467  
 Efficient program, 362  
 Eisner, Robert, 364  
 Employment. *See also* Full employment; Unemployment  
   under balanced budget, 148, 150  
   and capital accumulation, 155–167  
   in classical economics, 61–62, 63, 64  
   as equilibrium determinant, 121  
   and flexible wages, 128  
   in Keynesian economics, 66, 68, 69  
   multiple-region theory of income and trade, 201, 206–207, 217  
   and ratio of national income to productive capacity, 158  
 Enthoven, Alain C., 428  
 Equation of exchange monetary theory, 74  
 Equilibrium  
   in asset theory, 75n  
   and interest rate, 248  
   long-run, 117–118, 144–145, 481, 489  
   in Keynesian system, 105  
   monetary, 105, 117–118  
   in monetary economic growth model, 489  
   in multi-sector inventory model, 409  
   and nonlinear acceleration, 231, 232, 235, 239  
   in nonmonetary economic growth model, 481  
   and process analysis, 93–100  
   and quantity theory of money, 124–127  
   real, 121–122  
   short-run, 489  
   underemployment, 122–124, 131  
 Equilibrium systems, macroeconomic analogue of, 178–180  
 Euler's theorem, 306–307  
 Expansion rate. *See also* Growth rate  
   and aggregation, 329  
   and interest rate, 347  
   maximum, 327  
   minimum, 327  
   Neumann, 314–315, 316, 455  
 Expectations. *See also* Cobweb theorems;  
   Inventory behavior  
   ex ante analysis of, 384  
   and interest rate, 245, 249–256  
   and multi-sector analysis of inventory cycle, 405–429  
   and portfolio behavior, 489  
   and price movement theory, 384–403  
   and the theory of interest and money, 102  
   and slump economics, 72

- Exports, 205–206  
 Ezekiel, M., 400, 403
- Fei, John, 479  
 Ferguson, T., 386n  
 Fertility-mortality schedules, 303  
 Fetter, Frank A., 287  
 Firms, 110–111, 406, 408–411  
 Fisher, Irving, 77, 80, 83, 296, 416n, 478, 487  
 Florence, S., 83  
 Flow variable, 499, 504  
 Flows, 117–118  
 Fluctuations, 10–15, 64–68, 380–381. *See also* Disturbances  
 Foreign investment, 483  
 Foreign trade, 218, 219, 244  
 Foreign trade multiplier, 217–218  
 Fourier's analysis, 35, 37  
 Fowler, R. F., 403  
 Free disposability, 470–475  
 Frisch, Ragnar, 1n, 89, 229, 241, 380  
 Frobenius matrices, 307, 420, 460, 464, 465  
 Frobenius root, 460  
 Frobenius theory, 459  
 Full employment  
     and capital accumulation, 156–157, 166  
     and ex ante substitution possibilities, 366, 372  
     in generalized classical economics, 72  
     in Keynesian economics, 104  
     and interest, 116, 160, 244–245  
     and investment growth, 160  
     and junking process, 164  
     and nonlinear acceleration, 242n  
     and the theory of interest and money, 122, 123  
 Functional dependence, theory of, 173, 175  
 Functional equations, 7, 438–439  
 Funds on money market, 91–93. *See also* Money, quantity of  
 Futures, 76, 393
