 - Latin America and, 216–219
 - liberalization and, 209, 214–215, 219–220
 - managed, 231–234
 - parameters and, 240
 - policy and, 232–234

- Structural adjustment (cont.)
 productivity cleansing and, 219–220
 rigidity and, 215–216, 219, 238
 sclerosis and, 212–213, 220
 segmented labor and, 220–222
 simple linear model for, 208–212
 unbalanced restructuring and, 213–215
 unemployment and, 211–215, 220–222, 231–232
 wage differentials and, 235–236
 welfare and, 236–238
- Sullivan, Daniel G., 199
- Sutton, John, 69
- Svasov, Dmitriy, 65
- Swamy, Anand, 66
- Synchronization, 9–10
 inefficient restructuring and, 121
 opportunism and, 105–107
 reallocation and, 106–107
 recessions and, 105–106
- Tariffs, 47
- Taxes, 17, 50
- Technology, 3, 11–12, 273
 appropriability and, 289–305
 balanced specificity and, 256–257
 Beveridge curve and, 126–131
 constraint qualification and, 256
 directed change and, 261
 dynamic factor substitution and, 300–305
 excess substitution and, 259–260, 262–264
 exogenous progress and, 87–89
 factor rewards and, 68–69
 factor substitution and, 300–305
 gross flows and, 15–38
 hyperkinesis and, 131, 144
 inefficient economy and, 254–256
 information technology (IT), 36, 42
 innovation and, 16–17
 knitted garment industry and, 161
 labor exclusion and, 296–298
 Leontief, 208
 manufacturing sector and, 19, 22
 market response and, 253–265
 net appropriation regions and, 256–257
 optimization and, 254
 putty-clay, 285, 300–305
 sclerosis and, 131–138, 142
 specificity and, 6, 8–9, 61–62
 Tobin's q and, 73–74
 weak/strong insiders and, 141–144
- Thailand, 182
- Thesmar, David, 45–46
- Thomas, Jonathan, 60
- Tirole, Jean, 65
- Tobin's q , 73–74
- Topel, Robert, 199
- Total factor productivity (TFP)
 growth, 182
- Townsend, Robert M., 182
- Transparency, 4
- Trefler, Daniel, 47
- Turbulence, 304
- Tybout, James R., 220
- Underemployment, 134–135, 159
- Unemployment, 70–72, 74, 146–147
 appropriability and, 293–305
 average distortions and, 131–138
 depressed restructuring and, 181, 183–193
 dynamic restructuring model and, 178–180
 efficient, 127–129
 France and, 275–282
 frictional, 231–232
 Germany and, 306
 gross flows and, 199–200
 inefficient, 129–131
 institutional rigidity and, 250
 opportunism and, 97–112
 overemployment and, 134–135
 sclerosis and, 134–138
 search costs and, 98
 structural adjustment and, 211–215, 220–222, 231–232
 turbulence and, 304
 underemployment and, 134–135, 159
 weak/strong insiders and, 132–138
