

Index

- Abel–Dini Theorem, 18
- Amplifier, saturating, 156
- Anomaly, eccentric and mean, 175
- Assumptions A1, 9
 - A1'–A5''', 10
 - B1–B5, 84
 - C1–C6', 92
 - D1–D5, 99
 - E1–E6', 104
 - F1–F5, 126
 - G1–G3, 141
 - H1–H5, 185
- Batch processing, 104, 124
- Burkholder, D. L., 5, 11, 35, 37, 39
- Central Limit Theorem, Liapounov's, 168
 - Lindeberg's, 43
- Conditioning, 111, 136
- Continuity, modulus of, 47
- Convergence, scalar-parameter, 11, 23
 - modes of, 39
 - rates of, 28
 - vector-parameter, 92
- Cramér–Rao Inequality, regularity conditions for, 66
- Differential corrections procedure, 2
- Efficiency, asymptotic, 60, 65, 72
- Efficiency for certain non-Gaussian residuals, 70
- Estimates, CAN and CANE, 67
- Gain sequences, adaptive, 21
 - deterministic, 17
 - modified, 22
 - optimum for linear regression, 109, 117
 - “quick and dirty,” 115, 121
 - restricted, 27
- Initial state, estimation of, 153
- Intervals, confidence, large-sample, 72
- Kalman filtering, 183
- Kiefer–Wolfowitz procedure, 5
- Kronecker Lemma, 17
- Linearity, asymptotic, 51, 61
- Linear system, estimating parameters of, 161
- Linearization, method of, 122, 183
- Matrix, elementary, 83
- Maximum Likelihood, 65
- Newton's method, 2, 36
- Normality, asymptotic, 39

- Recursion, truncated, 9, 102
 typical computational cycle of, 178
 Regression, exponential, 25
 nonlinear polynomial, 18
 recursive linear, 109
 time-homogeneous, 148
 trigonometric, 24
 Regression function, definition of, ex-
 tended by linearity, 10, 38
 Robbins–Monro process, 5, 35, 36

 Sequential experimentation, 140

 Stochastic approximation, 5, 6, 35, 37
 general theorem on, 58
 Surfaces, response, 139

 Toeplitz Lemma, 50
 Transformation of parameter space,
 61
 Trajectory, estimating parameters of,
 172

 Variances, large-sample, 48

Frequently Used Symbols, and Where Defined or Redefined

| | | | |
|----------------|--------|-------------------------|--------------------|
| $[\cdot]_a^b$ | 9 | Δ_k | 87, 95, 101, 108 |
| d_n | 10 | \mathbf{T}_k | 87, 95, 108 |
| b_n | 10 | \mathbf{Q}_k | 87, 95, 101 |
| B_n^2 | 10 | τ | 84, 92, 99, 104 |
| \dot{F}_n | 10 | ρ | 84, 92, 99, 104 |
| e_n^2 | 16, 93 | α | 84, 92, 99, 104 |
| β_n | 29 | ν_k | 84, 92, 99, 104 |
| $g_n(\cdot)$ | 39 | p_k | 84, 92, 99, 104 |
| c | 48 | \mathcal{P} | 103 |
| $V(\cdot)$ | 49 | $[\cdot]_{\mathcal{P}}$ | 103 |
| \mathbf{F}_n | 82 | \mathbf{B}_n | 110, 111, 112, 130 |
| $\ \cdot\ $ | 82 | κ_m | 133, 135 |
