

## INDEX

---

- Absorption by,
  - Atmosphere, 42-43
  - Photovoltaics, 34, 45
  - Pollution, 42
- Batteries, 87-89
  - Primary, 97, 125
  - Reserve, 126
  - Secondary, 98, 126
- Bibliography, 147
- Business Opportunities, 129-147
- Cadmium Sulfide,
  - Absorption, 43, 45
  - Band Structure, 68
  - Cell Construction, 71, 81
  - Cells, 66
  - Degradation, 73
- Cadmium Telluride, 76
- Coal Resources, 14, 20
- Concentrators, Sunlight, 83-87
- Contents, v
- Conversion Units, 7
- Costs,
  - Electricity, 106
  - Photocells, 56, 79, 113, 131-135
  - Reduction of, 79-91
  - Steam Generators, 116
- Cuprous Sulfide, see Cadmium
- Demand,
  - Electricity, 10, 12, 98-109, 140
  - Energy, 3-12
  - Photovoltaic Arrays, 137
- Economic Considerations, 92-147
- Efficiency,
  - Cadmium Sulfide Cells, 72
  - Heat Collectors, 27
  - Silicon Cells, 59, 63
  - Theoretical, 50
- Electric Cars, 122
- Electrical Storage, 28, 56, 87
- Electricity,
  - Cost, 100
  - Demand, 10, 12, 98-109, 140
  - Generation, 102, 105
  - Storage, 28, 87
  - Usage, 100
- Electrolysis, 87
- Energy, 1
  - Band Structures, 33
  - Conversion Units, 7
  - Demand, 3-12
  - Electrical, 10, 98
  - Flows, 10
  - Resources, 20
  - Solar, 22, 38
  - Supply, 13-21
  - Usage, 1-21
- Federal Funding, 129
- Figures, list, vii
- Flywheels, 88
- Forecasts,
  - Business Opportunities, 138
  - Electricity Costs, 109
  - Energy Costs, 108
  - Energy Demand, 6
  - Energy Supply, 21
  - Photovoltaic Markets, 137
  - Photovoltaic Technology, 135
- Fuel Cells, 87-91

- Gas Resources, 15, 20  
Geothermal Resources, 17, 20  
Growth Rates,  
    Energy Use Sectors, 9  
    Electricity Usage, 9, 90-100  
Heating, 120  
Holes, 32  
Home Use of Photovoltaics, 118  
Hydroelectric Energy, 18, 20  
Illustrations List, vii  
Import Requirements, 4, 21  
Interfuel Substitutability, 102  
Introduction, 1  
Junction, p-n, 31-33  
Light,  
    Flux, 47  
    Spectrum, 41  
Manufacturing Factors,  
    Cadmium Sulfide, 70  
    Silicon Cells, 50  
Markets,  
    Conventional Electricity, 114  
    Photocells,  
        1960s, 61  
        Future, 137  
    Photovoltaic Electricity, 109  
        Watt Level, 125  
        KiloWatt Level, 118  
        MegaWatt Level, 115  
    World, 142  
Mechanisms, Solid State, 30-47  
Microwave Transmission, 29  
Natural Gas Resources, 15, 20  
NSF Funding, 130  
n-Typing, 30  
Nuclear Resources, 16, 20  
Objectives of Book, 3  
Oil Resources, 15, 20  
Opportunities,  
    Business, 129  
    Technological, 79  
Output **Characteristics**,  
    Of Photocells, 52  
    Of Photocells **with**  
        Concentrators, 85  
Peak Power Usage, 116  
Petroleum Resources, 15,  
    20  
Photocells, see Photo-  
    voltaic Devices  
Photon,  
    Flux in Sunlight, 47  
    Spectrum in Sunlight, 41  
Photovoltaic,  
    Conversion Technology, 55  
    Devices,  
        Cadmium Sulfide, 66  
        Costs, 113, 131-135  
        Development Factors, 112  
        Other Inorganic, 75  
        Other Organic, 78  
        Silicon, 56  
        Schottky Barrier, 77  
Economics, 92-147  
Efficiency, 50, 59,  
    63, 72  
Electricity Demand, 109  
Materials, 75  
Principles, 30  
Pollution,  
    Abatement, 11  
    Effects of, 42, 65  
Predictions, see Forecasts  
Preface, xv  
Price,  
    Electricity, 106  
    Photocells, 113, 131-135

- p-Typing, 30
- Pumped Water Storage, 87
- Reflectivity, 34
- Remote Photocell Usage, 123
- Resources of Energy, 20
- Schottky Barrier Devices, 77
- Silicon,
  - Absorbance, 43
  - Band Structure, 33
  - Cells, 56
- Solar,
  - Concentrators, 85
  - Energy, 22, 38
    - Average Incidence, 22
    - Distribution, 24
  - Flux, 47
  - Heat Collectors, 27
  - Spectrum, 38, 41
- Spectral Considerations,
  - Absorbance of Semiconductors, 43
  - Sky Radiation, 43
  - Sunlight, 38
- Storage, Electrical, 28, 56, 87
- Sunlight, see Solar
- Supply,
  - Energy, 13-21
  - Sunlight, 22
- Tables, List, xi
- Technological Advancement, 79-91
- Technological Problems,
  - Cadmium Sulfide, 74
  - Silicon Cells, 65
- Temperature Dependence of
  - Photocells, 53
- Theory, 31-54
- Usage,
  - Electricity, 100
  - Energy, 1-22
  - Utility Use, 115
- Windmills, 124
- World Markets, 142
- Units of Conversion, 7
