

## INDEX

- Adjoined mass, 535-536
- Angle, of deviation of the flow, 367
  - of inflow, 371
  - of maximum range, 650
  - of spreading of jet boundary layer, 217
  - of thickness of boundary layer, 39
  - of thickness of mixing zone, 153
- Archimedean buoyancy force, 567, 570, 576
- Area, effective discharge, 555
- Bernoulli equation, 437
- Borda-Carnot formula, 630
- Boundary of constant mass flow, 159, 287
- Boundary layer, 5, 52, 170, 172
  - of finite thickness, 5
  - of infinite thickness, 5
  - inner edge, 4, 63, 161
  - laminar jet, 3
  - outer edge, 4, 63
  - thermal and dynamic, 66
  - turbulent jet, 3, 148, 391
- Circulation zone, 409, 410, 428
- Coefficient, of angle of jet thickness, 274
  - of contraction, 554
  - of discharge, 555
  - of drag, 209, 530
  - of dynamic viscosity, 55
  - of ejection, 634
  - of field, 641
  - of heat transfer, 293, 611, 618
  - of initial nonuniformity, 189, 219
  - of kinematic viscosity, 144, 145
  - of labyrinth drag, 622, 627
  - of molecular diffusion, 60
  - of pressure, 212-213, 558
  - of stoichiometric weight, 348
  - of thermal conductivity, 56, 241, 265
  - of transition, 193, 200, 309
  - of tube bundle drag, 628
  - of turbulent viscosity, 51, 103
  - of velocity, 269, 325
- Combustion, diffusion, 346, 354
  - in jets, 345
  - kinetic, 346, 352, 354
- Compressibility, high speed, 293, 302
  - temperature, 302
- Concentration, of admixture by weight, 23, 59,
  - difference, 24, 88, 93, 102
  - of gas in a mixture, 594
- Condition of stability of turbulent flame front, 366
- Constant, of jet structure, 62
  - of turbulence, 445, 645
- Contour, of constant mass flow, 65, 287, 391
  - of "half-velocity," 127
  - of zero velocity, 160, 392, 407, 464
- Core, of constant mass, 530
  - of constant velocity, 4-5, 162, 172, 530
  - of initial mass, 516
  - potential, of jet, 4, 162, 400
  - of undisturbed (potential) flow, 162, 269
  - of viscous flow, 263
- Correlation, 43, 45, 49
- Cross section, critical, 540
  - of jet, central, 232
  - of jet, initial, 4
  - of jet, transitional, 4, 203
  - of wake, initial, 245
- Curtain of air, 556
- Defect in velocity profile, 128, 210
- Degree of turbulence, 38, 43
- Direction of flow, 149
- Drag, of a body, 132, 208, 212
  - form pressure, 212
- Dynamic pressure, 116, 212, 385
- Eddies, 3, 89, 240
- Ejectors, 633
- Energy, of activation, 351
  - chemical, 348
  - in forward flow, 397
  - kinetic, 513
  - in reverse flow, 397
- Enthalpy, total, 345, 348
- Equation, of axis of curtain, 559, 560
  - of axis of jet, 544
  - of Bernoulli, 437
  - of conservation of admixtures, 59
  - of conservation of heat content, 643
  - of conservation of mass, 643-644
  - of continuity, 52, 54, 237
  - of diffusion, 60, 61, 92
  - of energy, 241

- Equation, of enthalpy transfer, 349  
 of heat balance, 87, 96  
 of motion in boundary layer, 52, 54  
 of planar motion of viscous gas, 238  
 of propagation of jet, 268
- Equilibrium dissociation in boundary layer, 346
- Factor of compressibility, 248, 258
- Flame, acetylene-air, 385  
 combustion, 361  
 diffusion, 361, 376, 386  
 of spray nozzles, 586
- Fluctuation, of coefficient of viscosity, 263  
 of concentration, 61  
 mean square, of temperature, 45, 48  
 mean square, of velocity, 45, 47  
 of temperature, 44, 58  
 of velocity, 10, 55  
 of vorticity, 89, 240
- Force, aerodynamic, 546  
 of Archimedean buoyancy, 562, 570, 576  
 gravitational, 580
- Formula, of Borda-Carnot, 630  
 of Ivanov, 544  
 of Prandtl, turbulent friction, 55  
 of Shandorov, 543
- Friction, "apparent," 55  
 in laminar flow, 103  
 in turbulent flow, 103, 420
- Front, flame, 345, 352, 354  
 kinematic combustion, 356  
 of normal combustion, 352  
 primary, of flame, 357, 358  
 secondary, of flame, 357
- Görtler solution, 148
- Heat content, 20, 58
- Heat transfer in turbulent jets, 611
- Intensity, of heat transfer, 120  
 of mean vorticity, 89  
 of transverse heat transport, 120, 145  
 of turbulence, 120  
 of turbulent momentum transfer, 145
- Isovels (lines of constant velocity), 13, 62, 369
- Isotherms, 20
- Ivanov formula, 544
- Jet, 9  
 air-water, 608  
 annular, 624  
 axially symmetric, 6, 8  
 cooling, 585  
 convective, 568, 570, 575  
 in counterflowing stream, 36
- Jet, curved, 583  
 in a deflecting flow, 541  
 fan, 621  
 fictitious, 470  
 gas-liquid, 600  
 of high-temperature gas, 262  
 horseshoe, 543  
 plane, 7, 193  
 semicontained, 475  
 submerged, 4, 505  
 subsonic, 248  
 supersonic, 276  
 of supersonic isobaric gas, 254, 342  
 turbulent, 5, 25  
 turbulent, in coflowing stream, 25  
 turbulent, in dead-end channel, 444  
 two-phase, 586
- Kinetic energy, 529
- Kuethe theory, 148
- Law, of decay of concentration difference on jet axis, 25, 101  
 of decay of velocity defect on axis of wake, 133, 139  
 of decay of velocity difference on jet axis, 15, 16, 75  
 of drop of temperature difference on jet axis, 21, 59, 642  
 of growth of jet, 11, 38  
 of growth of wake, 127, 132, 209  
 of "one-seventh," 478
- Length, of axially symmetric circulation zone, 434, 443  
 of initial region of jet, 174, 223  
 of transition, 206, 224  
 of two-dimensional circulation zone, 416, 419
- Mach number, influence of, 255, 261, 340
- Mattioli theory, 50
- Method of Zhukovskiy, 403
- Mixing length, 11, 47, 56
- Momentum, 16, 77, 78
- New eddies, 543
- Nozzle, fictitious, 467
- Off-design flow, 335
- Parameter, of compressibility, 269, 297, 333  
 of off-design discharge, 342
- Penetration of jet, 339
- Plasma, 262
- Pole, jet, 333  
 of the jet boundary layer, 208  
 of the main region, 208
- Potential, complex, 403
- Prandtl-Görtler theory, 51, 104, 108
- Prandtl, formula, 56

- Prandtl, theory, 50, 90, 103, 120  
 Prandtl-Tollmien theory, 51  
 Pressure, in jet, 15  
   in mixing zone, 164  
 Profile, of concentration in initial region, 94, 177  
   of concentration in main region, 23, 31, 98  
   of temperature in initial region, 18, 30, 94  
   of temperature in main region, 19, 29, 98  
   of temperature in wake, 134, 143  
   of velocity in initial region, 9, 28, 64, 107  
   of velocity in main region, 7, 26, 74, 110
- Radiation of heat, 263  
 Range of curtain, 557  
 Region, of chemical reaction, 345  
   first, of circulation zone, 393  
   first, of flow in dead-end channel, 445, 461  
   of forward flow, 392  
   initial, of jet, 4, 302  
   main, 4, 195  
   of preheating of mixture, 345  
   of reverse flow, 32, 33, 392  
   second, of circulation zone, 402  
   second, of flow in dead-end channel, 452, 466  
   transitional, 4  
 Reichardt theory, 50, 113, 120  
 Resistance, of a labyrinth, 625  
   of a tube bundle, 628
- Scale of turbulence, 43  
 Schlichting's theory, 128  
 Seal, labyrinth, 625  
 Separation, tangential, 3  
 Shandorov's formula, 543  
 Similarity, of concentration profiles, 24, 31, 183  
   of jets, 53  
   of pulsations, 46  
   of temperature profiles, 17, 19  
   of velocity profiles, 6, 8, 10  
 Solution of Görtler, 148  
 Source, of axially symmetric turbulence, 76  
   of plane turbulence, 68  
 Stoichiometric relation, 348, 376  
 Stream function, 65, 69, 77  
 Stress, normal, 238, 239  
   tangential (shear), 55, 238  
   turbulent shear, 55, 78, 91, 239  
 Surface of tangential separation, 3
- Temperature, average, 21, 22  
   of combustion, 247  
   of combustion, 20, 66, 85, 87, 97  
   stagnation, 244  
 Theory, of flame, 345  
   of jet or free turbulence, 50  
   of Kuethe, 148  
   of Mattioli, 50  
   new, of Prandtl, 103  
   of normal propagation of flames, 345  
   old, of Prandtl, 50  
   of one-dimensional laminar combustion, 345  
   of Prandtl, 120  
   of Prandtl-Görtler, 51, 104, 108  
   Prandtl-Tollmien, 51  
   of Reichardt, 50, 113, 120  
   of Schlichting, 128  
   semi-empirical turbulence of gas jet, 267  
   of Taylor, 50, 89  
 Thickness, of boundary layer, 40, 42  
   boundary-layer displacement, 219, 427  
   of circulation zone, 427  
   of mixing zone, 39  
   momentum, 212, 214  
   of thermal wake, 136  
   of two-dimensional wake, 129  
   of wake, 138  
 Turning center, 450  
 Turbulence, of external flow, 659  
   of jet, internal, 661  
 Turbulent mixing, 164
- Velocity, arithmetic average, 22  
   average, 10, 22  
   characteristic, 128  
   of ejected stream, 636  
   fluctuation, 10  
   mean square, 22  
   of propagation of flame, 345, 352  
   transverse fluctuation, 10  
 Vortex pair, 543  
 Vorticity, 3, 89, 240
- Wake, axially symmetric, 138, 140-141  
   behind blunt bodies, 126  
   dynamic, 136, 142  
   plane, 129, 141  
   thermal, 133, 136, 142  
 Wake flow, 51, 126  
 Wind tunnel, with cylindrical cross section, 526  
   with elliptical cross section, 528  
   sealed, 528
- Zhukovskiy method, 403  
 Zone, active reaction, 353  
   of "burn-through," 345, 352  
   of circulation, 391, 393  
   of combustion, 345  
   of mixing, 148, 287
