# *Subject Index*

- ARPA (Advanced Research Projects Agency), 21–22, 70–72
- Artificial intelligence, 275–314  
challenges ahead in, 308–314  
commercialization of, 286–287  
complexity of common abilities and, 279–285  
defined, 276  
knowledge representation and, 285–286  
research in, 277–279  
speech and, 280–284
- Automation, impact of, 200–208
- Bandwidth, input-output, 105–108
- Batch processing, 75–76, 80
- Charge-coupled device, 14
- Command languages, 118–120
- Communication systems, 171–199
- Communication technology  
merging of, with computers, 24–29  
satellite transmission and, 27
- Computer(s)  
anticipated developments in, 54–73  
and consumer information services, 184–190  
in defense, 39–41  
in education, 42–47  
in farming, 35–36, 324–331  
“friendliness” of, 149–152  
generations of, 15–19  
interaction of, with people, 74–88  
in management, 41–42  
in manufacturing, 36–38  
merging of, with communication technology, 24–29  
and natural language, 129–137  
new components of, 56–60  
personal, 17–18, 76, 158, 166  
programming of, 257–274
- in research, 47–50  
research and development efforts in, 67–73
- in retailing, 38–39
- types of, 15–19
- Computer-aided X, 167–170
- Computer architecture  
ILLIAC-IV, 62–63
- MIMD (Multiple Instructions Multiple Data), 62  
new, 60–67
- SIMD (Single Instruction Multiple Data), 62
- Computer-based message technology, 171–181
- EUGRAM, 173–175
- Hermes, 173
- Computer components  
Josephson junction, 57–58  
transphasor, 58–59
- Computer-mediated conferencing, 181–184
- Computer networks, 19–24
- Computer programming  
ability for, 259–260  
cognitive consequences of, 267–268  
cognitive demands of, 258–265  
cognitive prerequisites for, 265–267  
productivity of programmers, 268–272
- Computer technology  
major trends in, 9–11  
miniaturization and, 11–14  
research challenges in, 315–320
- Data-management packages, 153–156
- Defense, computers in, 39–41, 70–72, 105, 235–236

- Disabled people, computers and, 107–108, 144, 338–346
- Editing tools, 85–86, 124–125, 156–167
- DECspell, 160–162
- Einstein Writer, 162
- EPISTLE, 163–164
- Writer's Workbench, 162
- EDSAC (Electronic Delay Storage Automatic Calculator), 31–32
- Education, computers in, 42–47, 331–338
- EDVAC (Electronic Digital Variable Automatic Computer), 31
- Electronic mail, 25, 171–181
- ENIAC (Electronic Numerical Integrator and Calculator), 12, 31
- ESPRIT (European Strategic Program for Research and Information Technology), 69
- ETIT (External-Task-to-Internal-Task analysis), 85–86
- Expert systems, 287–298
- codification of expertise and, 298–302
  - defined, 287
  - evaluation of, 302–305, 307–308
  - examples of, 288–293
  - need for theory of expertise, 305–306
- Farming, computers in, 35–36, 324–331
- Fifth Generation Computer Project, 68–69
- Gates, in computers, 11
- Graphics, computer, 96–105
- video display terminals, 99–101, 241
  - videodisk, 98–99
  - windowing, 101–102
- Handicapped people, computers and. *See* Disabled people
- IMPs (interface message processors), 21
- Information
- organization of, 113–118
  - presentation of, 113–118
  - retrieval of, 190–194
- Information systems, 171–199
- computer-based message technology, 171–181
  - computer-mediated conferencing, 181–184
  - consumer, 184–190
  - EUGRAM, 173–175
  - Hermes, 173
  - office, 213–220
  - privacy and, 194–199
  - users of, 50–53
- Information technology, and jobs, 200–212, 219–220, 240–241
- Input devices
- CAT, 96
  - keyboards, 90–91
  - light pen, 91–94, 93
  - manual, 90–96
  - mouse, 95–96
  - tablet and stylus, 94–95
- Input errors, users as source of, 245–246
- Integrated circuit, introduction of, 12
- Intelligence, of machines, 307–308
- Interaction, defined, 77
- Interactive system(s), design of, 221–239
- formal specifications for, 230–231
  - guided evolution and, 231–234
  - guidelines for, 225–230
  - standardization of, 234–239
  - for users, 221–225
- Interactive system(s), user acceptance of, 242–244
- Interface, cognitive, 112–152
- Interface, defined, 89
- Interface, individual, 109–110
- Interface, physical, 89–111
- Interface message processors (IMPs), 21
- Jobs
- information technology and, 200–212, 219–220, 240–241
  - quality of, 210–212
  - telecommuting, 208–210
- Josephson junction, 57–58
- Languages, command, 119, 124–129, 191
- Languages, programming, 120–123, 237–238
- Linked-node diagrams, 115–116

- Livermore Loops Benchmarks, for comparing computer speeds, 17
- Magnetic-bubble memory, 14
- Management, computers in, 41–42
- Manufacturing, computers in, 36–38
- Megaflops, defined, 16
- Menus, 106–107, 118–120, 224
- Microprocessor, development of, 12
- Military applications of computers. *See* Defense, computers in
- Miniaturization, and computer technology, 11–14
- Names, in programs, 124–129
- National Superspeed Computer Project, 68
- Natural-language interfaces, 114–115, 129–137
- Networks, 19–24
- Office information system(s), 213–220
- productivity and, 217–219
- Office tools, computer-based, 214–216
- Packet radio, 25–27
- Packet switching, 25–26
- Parallel processing, 15, 60–67
- Person-computer interaction, study of, 78–83
- experimental approach to, 83–86
- modeling approach to, 78–79
- observational approach to, 79–83
- Privacy, and data banks, 194–199
- Program, debugging of, 262–264
- Programming, of computers, 257–274
- ability for, 259–260
- cognitive consequences of, 267–268
- cognitive demands of, 258–265
- cognitive prerequisites for, 265–267
- productivity of programmers, 268–272
- Research, computers in, 47–50
- Resource sharing, 19–24
- ARPA (Advanced Research Projects Agency) and, 21–22
- ARPANET and, 21–22
- “closed-shop” approach to, 19–20
- development of network approach to, 21–24
- time-sharing approach to, 20–21
- Response time, 81–83
- Retailing, computers in, 38–39
- Software, increasing cost of, 268–269
- Software tools, 153–170
- computer-aided *x*, 167–170
- data-management packages, 153–156
- editing, 156–167
- Speech, and computers, 137–147
- Speed, computing, 56–60, 67–68, 81–83
- Storage capacity
- advancement of, 13–14
- charge-coupled devices, 14
- magnetic-bubble memory, 14
- optical disks, 13
- Standardization, 234–239
- Supercomputers, 15–16
- Technology
- and disabled people, 107–108, 144, 338–346
- and education, 331–338
- and food and nutrition, 324–331
- perspective on, 348–360
- and quality of life, 321–347
- weighing effects of, 321–324
- Telecommuting, 208–210
- Time-sharing, 20–21, 75–76, 80
- TIPs (terminal message processors), 21
- Transphasor, 58–59
- User, computer
- acceptance of interactive systems by, 242–244
- attitudes of, 240–242
- classification of, 50–53, 254–255
- issues of, 240–256
- levels of skill of, 253–256
- manuals and, 250–253
- on-line aids and, 250–253
- as source of input errors, 245–246
- training, 242, 246–250
- use of metaphors by, 246–250
- workload of, 244–245

- Very Large Scale Integration, 15
- Video display terminals (VDTs), 99–101, 241
- Virtual office, 214
- Word processors, 156–167
- Workstation, 18–19, 52
