

Index

The index contains three types of entries. There are technical terms, whose page references are given in italics to show where the meanings of the terms are explained. There are names of people and kinds of organisms, whose page references include all pertinent discussions of the people or kinds of organisms in question. Finally, there are entries intended to help the reader locate quickly discussions of particular aspects of the sociobiology controversy.

- Accidental factors in evolution, 42, 43, 49, 74, 221–226. *See also* Drift
- Adaptation. *See also* Adaptationism; Natural selection
- Darwin's insight into, 40
- efficiency of, 130, 184, 207, 243
- evolutionary study of, 56–57
- resilience of, 129, 184, 206–207, 243
- sociobiological commitment to, 108, 127
- Adaptationism, 213–239, 242, 288, 328, 329
- in pop sociobiology, 236–239, 242
- Ad hoc hypotheses, 152, 242, 296
- Adoption, 273–274, 296, 304–305
- Agnostic buffering, 155
- Albon, S., 199, 200
- Alcock, J., 226
- Alexander, R., 7, 14, 15, 21, 58, 59, 116, 130, 188, 238, 258, 281–301, 303–307, 329, 400, 420. *See also* Alexander's program
- Alexander's program
- central thesis of, 281–282, 292–293
- conservative interpretation of, 285–288, 290–291, 306–307, 314–315, 329, 400–402
- different from early Wilson program, 281–283
- predictive power of, 293–298
- radical interpretation of, 289–291, 329, 400–402
- Allee, W. C., 78
- Allele, 19
- Allometry, 57, 227, 232
- Altruism, 113, 115, 159–160, 219, 244, 396–406. *See also* Reciprocal altruism; Self-sacrifice
- effective, 398, 405
- "hard-core," 401
- role of intentions in, 397–398
- in scrub jays, 141
- "soft-core," 401, 405
- Anthropomorphism, 183–201, 250
- Ardrey, R., 3, 5, 13, 34, 35, 124
- Aristotle, 395
- Asch, T., 308
- Austen, J., 326
- Avunculate, 284, 293, 299–307
- Axelrod, R., 99, 101, 102, 103, 265
- Ax fight, 307–315
- Baboons. *See* Hamadryas baboons; Olive baboons
- Bachmann, C., 97
- Barash, D., 5, 6, 14, 15, 24, 28, 121, 158, 159, 175, 178–180, 185–189, 195, 200, 216, 217, 227–229, 237, 239, 252–256, 350, 399, 405, 406, 410
- Bateson, P., 270, 276
- Beatty, J., 50, 51, 232–233
- Behavior genetics, 33, 139, 243, 246–249
- difficulties of, 34
- Bengtsson, B., 275
- Bernds, W., 239

- Bertram, B., 124, 151, 152, 399
 Biogeographical distribution, 39, 55, 56, 62–63, 113–114
 Bishop, D., 92
 Block, N., 34, 201
 Bock, K., 30, 32, 204, 346
 Bodmer, W., 279
 Bonner, J., 70
 Boorman, S., 79
Bourgeois, 94, 94–95, 121
 behavior of hamadryas baboons, 96–97
 behavior of speckled wood butterflies, 97
 Boyd, R., 335
 Bradbury, J., 156–157
 Brahe, T., 133
 Brockmann, H. J., 87
 Brown, W. L., 65
 Bruce, K., 188
 Bugos, P., 307–309, 311–314
 Bull, J., 87
 Burt, C., 2, 3
- Calpurnia*, 302, 303–304, 306
 Cannings, C., 92
 Caplan, A., 23
 Caraco, T., 237
 Carlson, E., 343
 Carpenter, F., 65
 Cavalli-Sforza, L., 279, 335, 336, 350, 393
 Chagnon, N., 14, 15, 16, 120, 283, 284, 293, 307–315, 329, 368, 370, 371
 Charlesworth, B., 105
 Charnov, E., 317
 Chimpanzees
 female transfer in, 189, 270
 mating system of, 192–193
 as model for *Homo sapiens*, 158–159
 sexually assertive behavior of female, 173–174, 180
 Clutton-Brock, T., 181, 199, 200
 Coevolutionary circuit, 350, 359–366, 377–393
 Coevolutionary equation, 360, 362, 365
 Combat, animal forbearance in, 178–179
 Cracraft, J., 114
 Crow, J., 218, 393
 Cultural determinism, 24, 410, 411. *See also* Determinism; Genetic determinism
 Culture
 analyzed by Lumsden and Wilson, 338–339, 340, 343–350, 394
 as a “force,” 30, 32, 183, 184, 201–202, 203–205, 209
 impact of, on evolutionary rates, 378–391
 interaction with genes, 334, 353, 359, 370, 376
 need for an evolutionary theory of, 332
 Culturgen, 338, 339, 342, 343–350, 353, 354–356, 359, 360, 364–367, 369, 372, 375, 377–379, 382, 383, 385–388, 390, 391
 Dahl, N., 423
 Darwell, S., 433
 Darwin, C., 37–42, 45, 47, 54, 57, 59, 61, 73, 74–75, 84, 85, 87, 114, 118, 175, 230
 achievement of, 38–40, 54
 Darwin, F., 37, 87
 Darwinian histories, 55, 56, 57
 confirmation of, 66–72, 121–125, 134, 219–220, 231–233
 possible versus actual, 72–75, 86–87, 97, 103, 107, 115
 testing of, 62–65
 Darwinism
 ambitious, 56–57, 58, 68–70, 114, 117, 134, 218, 242
 cautious, 56, 58, 68, 114, 119
 Davies, N. B., 97, 136, 137, 138, 141, 185, 188, 192, 233, 234
 Dawkins, R., 15, 78, 102, 173, 189, 199, 257, 276, 399
 Decision making, and socially costly error, 9–10, 435, 436
 Defense, 159–165, 180
 Derrickson, S., 187–188
 Determinism, 406–407, 408. *See also* Cultural determinism; Genetic determinism
 psychological, 406–407, 409
 Wilson’s definition of, 415
 Dickemann, M., 283, 293, 315–329
 Dobzhansky, T., 67
 Dominance (of alleles), 41
 Dominance (of animals), 155, 159, 161, 162, 180, 193, 197–201, 197, 235
 Drift, 221–226, 227
 Ducks
 forced copulation in, 185–189
 monogamy in high-latitude species, 153
 Dunbar, R., 124–125, 127, 164

- Dung flies, 135–141, 176, 180, 234
 optimal copulation time for female, 139–140
 optimal copulation time for male, 137
 Parker's experiments on, 136
- Durham, W., 335
- Dusek, V., 58
- Dworkin, G., 34, 201, 398, 412
- Early Wilson program, 15, 21, 125–127, 256, 269–270, 280, 281, 350. *See also* Wilson's ladder
 different from Alexander's program, 281–283, 290–291
 intelligibility of, 29
 overview of flaws in, 241–243
- EFP, 286, 287–288, 298, 307
- Egoism, 396–406
- Ehrhardt, A., 208, 249
- Ehrman, L., 33
- Eibl-Eibesfeldt, I., 78
- Eldredge, N., 114
- Eleven-plus examination, 1, 2, 11
- Emlen, S. T., 141, 143, 144, 146, 147, 148, 150
- Epigenetic rules, 332, 339, 340, 341, 347, 351–353, 354, 359, 365, 368, 370, 377, 384
 primary and secondary, 351
 rigidity of, 351–353
- Estep, D., 188
- Ethics, 395, 417–434. *See also* Meta-ethics; Naturalistic fallacy
 biologization of, 417–418, 420, 427, 429, 433
 historical explanation of, 418–419
 normative, 426–431
 objectivity of, 420, 422–426, 432–434
- Ethnographic curve, 354–356, 357, 366, 367, 369, 371, 374
- Evolutionarily stable strategies (ESSs), 89, 90–95. *See also* Game theory; Prisoner's Dilemma; TIT FOR TAT
 conditions for, 91
 confirmation of hypotheses about, 122
 applied to desertion of young, 168–173
 global optima and, 89–90
 heritability and, 93–94
 role of, in sociobiology, 116, 177
 stable polymorphisms and, 92–93
 supplanting behavior and, 197
- Evolutionary theory. *See also* Darwinian histories
 adaptationism in, 213
 allegedly tautological, 50
 confirmation of, 65–72
 main ideas of, 37–41
 relation of, to sociobiology, 117–121
 structure of, 54–58, 61–62
 testing of, 64–65
- Fagen, R., 177
- Falsifiability, 58–61
- Feinberg, J., 398
- Feldman, M., 335, 336, 350, 394
- Feller, W., 356
- Fields, scientific, nature of, 113–114
- Fisher, R., 53, 82, 393
- Fitness, 47, 50–53. *See also* Adaptationism; Inclusive fitness; Natural selection; Optimality models
 apparent reduction of, 72–74, 81–82, 85–87, 104, 107, 115, 118
 choice of criteria for, 228–229
 classical versus inclusive, 108
 culturgen use and, 358–359
 economic success and, 317–318, 319–325
 ethics and, 429
 idealization in analysis of, 109, 140
 inclusive, 77, 79–80, 81
 mean, maximization of, 218–220
- Fitzpatrick, J., 141
- Flanagan, O., 392
- Flinn, M., 284
- Fokker-Planck equation, 354, 356, 357
- Folk psychology, 285, 286–288, 297–298, 304–307, 314–315, 328–329, 400–402.
