

Index

-
- Adler, A., 15, 21–22
- Agnosia
 history of, 1–4
 integrative, 78–80
 knowledge impairments and, 139–154
 types of, 4–5 (*see also specific types*)
- Aguirre, G. K., 10, 122
- Albert, M. L., 71
- Alexia-simultanagnosia, 46–47
- Allegranza, A., 29
- Alzheimer's disease, 140, 142, 146
- Andersen, E. S., 146
- Angelergues, R., 29, 34
- Ansink, B. J. J., 63
- Apperceptive agnosia, 11
- Associative visual agnosia
 case description of, 69–71
 factor-referenced testing of, 77–79
 general characteristics of, 71–72
 mnemonic impairment and, 72–76
 neuropathology of, 88–89
 object representation and, 76–82
 optic aphasia and, 128–129
 perception speed and, 79–80
 visual subsystems and, 82–88
- Attention, 156, 158–159
 object- vs. space-based, 33
 spatial localization and, 31–33, 156–157, 158–159
- Avanzini, G., 29
- Balint's syndrome, 27
- Bateman, A., 83–84
- Bauer, R. M., 112, 128
- Bay, E., 1–2, 25
- Bayesian approach, 19, 156
- Baylis, G., 28, 40
- Beauvois, M. F., 123–126, 131–133
- Behrmann, M., 45–46, 50, 103–104, 109
- Bender, M. B., 1–3
- Benson, D. F., 11–12, 15–16, 69–71, 127–128
