

# Index

- activity flags, 163.
- adaptive thresholding, 80.
- Asada, H., 63.
  
- Besag, J., 11.
- Brady, J.M., 63, 93.
- boundary condition, 56, 85, 183-184, 187, 189, 203, 211.
  
- calculus of variations, 40, 51, 183, 189, 203.
- Canny, J.F., 72, 200.
- circulant matrix, 134, 209-211.
- circular symmetry, 75, 191-193, 205.
- Cole, W.S., 167.
- complexity, 129.
- continuity, 5-6.
- contrast threshold:
  - continuous data, 52, 58, 60, 64, 97, 100, 102.
  - discrete data, 139, 216.
- convergence:
  - decay time, 159, 161.
  - measure of, 158.
  - optimum SOR, 159, 161.
  - proof of, 152-155.
- convexity, 11-12, 43-47, 110, 122, 132, 207-208.
- cooperativity, 5-8, 110.
- corner rounding, 77-78.
- cost function, 40-43, 112.
- crease discontinuity, 9, 20, 26, 32, 97, 99, 101-102, 107-108.
  
- curve description, 33-35.
  
- data compression, 4.
- depth map, 3, 28-29.
- Derin, H., 167.
- descent algorithms, 49, 121-124, 152-157.
- double edges, 61-62, 64, 80-81.
- dynamic programming, 128-129.
  
- edge detection, 18, 21-23, 78, 80-83.
- effective step height, 57-58.
- eigenvalue, 133-135, 158, 209-211.
- energy minimization, 7, 40.
- Euler Lagrange, 67, 85, 183, 189, 203, 204, 214.
- extremal energy, 7, 11, 40, 55, 68.
  
- Fahle, M., 85.
- finite elements, 40, 111, 114-119.
- first order plate, 98, 106, 120.
- Fourier transform, 55, 184-185, 190, 204.
- Frisby, J.P., 168.
  
- Gaussian curvature, 109.
- Gauss Seidel iteration, 122, 124, 159.
- Geman, D., 13, 127, 169.
- Geman, S., 13, 127.
- global schemes, 21.
- gradient difference threshold, 97, 101.

- gradient limit: 52, 62-63, 97.  
     remission, 95.  
 Graduated Non Convexity (GNC):  
     46-50, 125, 131-151.  
     correctness of, 142-151, 213-219.  
 granularity 163, 165, 216-217.  
 Green's function, 55-56, 60, 75, 183, 185, 190, 203.  
 Grimson, W.E.L., 25, 99, 107, 121.  
 Hessian, 132, 207-208.  
 Hinton, G.E., 5.  
 Hopfield, J.J., 127.  
 hyperacuity, 84-86.  
 hysteresis, 52, 87-90, 105-106.  
 interacting steps:  
     variational results, 52, 100.  
     correctness of GNC, 146, 148-149.  
 iteration schemes:  
     convex problems, 121.  
     multigrid methods, 122.  
     sparse data, 123.  
     weak string, 156.  
     weak membrane, 157.  
 Ising model, 7.  
 Julesz, B., 7.  
 lightness computation, 7, 167.  
 line process, 42, 112-114, 119.  
 linear filter, 21, 52.  
 local interaction, 7, 47, 49.  
 localisation:  
     compared to linear operator, 67, 71, 200-201.  
     in noise, 52, 63-72, 195-198.  
 Markov Random Field (MRF), 11, 13-15, 80, 167, 169.  
 Marr, D., 2, 4, 5, 27.  
 Marroquin, J., 28.  
 Mayhew, J.E.W., 168.  
 mechanical model, 15, 168-169.  
 MIMD, 168.  
 Montanari, U., 126.  
 Morgan, M.J., 171.  
 multigrid relaxation, 122-125.  
 Mumford, D., 52, 67-68.  
 neural networks, 127.  
 noise:  
     effect on localisation, 52, 63-72, 195-198.  
     effect on convergence, 151.  
     rejection by GNC, 149-150.  
     spurious response to, 52, 72, 198-200.  
 parallelism, 7.  
 penalty functions:  
     1D, 39, 51, 99.  
     2D, 73, 99.  
     numerical, 42-43, 112-116.  
 perceptron, 10.  
 Poggio, T., 10, 85.  
 Pollard, S.B., 168.  
 preservation of topology, 76-78.  
 probabilistic model, 13, 168-169.  
 quadratic variation, 99, 107, 109, 119.  
 ramp data, 62, 101-104, 186.  
 range data, 3, 29.  
 regression, 8-9.  
 Reichardt, W., 10.  
 relaxation, 7.  
 run length encoding, 4.  
 scale:  
     parameter, 40, 52, 53, 55, 75, 99, 214.  
     space filtering, 33-36, 63-72.

- sensor frame noise, 93.
- Shah, J., 52, 67-68.
- simulated annealing, 46, 126.
- sparse data, 81, 120, 121, 123, 136.
- splines, 8-10, 98.
- spurious response, 52, 72, 198-200.
- square Laplacian, 99, 107, 109, 119.
- stable description, 3.
- step data, 40, 58.
- step discontinuity, 9, 39.
- stereopsis, 3, 5, 21.
- Successive Over Relaxation (SOR),  
122, 123, 152-161.
- surface reconstruction, 21-33.
  
- T junctions, 35, 37, 78-79.
- template fitting, 21.
- Terzopoulos, D., 25, 111, 121, 122.
- tessellation, 117.
- top hat data:
  - 1D, 58-60.
  - 2D, 75-76, 192, 205.
  
- Ullman, S., 2.
- uniformity, 63-72.
  
- viewpoint invariance, 4, 90-94, 107-110.
  
- Watt, R.J., 171.
- weak continuity constraint, 5, 17, 39.
- weak membrane, 18, 72-90, 114-117.
- weak plate, 18, 97, 117-120.
- weak rod, 17, 20, 97.
- weak string, 17, 19, 39-72, 112.
- wobble, 90.
  
- Yuille, A.L., 93.
