

Analytic subject index

- arrhythmias 182
- Belousov-Zhabotinsky reaction 1, 5, 13, 21, 33, 40, 47, 90, 125
- bistability 177
- bromide electrode 33
- bursting 114
- cell movement 224
- cellular automata 75, 240
- chemical front 141, 161, 170, 177
- chemical instability 161
- chemical patterns 5, 40
- chemical vortices 1, 75, 107
- chemical waves 5, 21, 40, 47, 52, 75
- chemotaxis 224
- chlorite-iodide-malonic acid reaction 161
- compound rotation 75, 98
- coupled lattice map 240
- curvature 82, 98, 125
- curved surface 71
- defect turbulence 141
- development 214
- Dictyostelium discoideum* 224, 233
- diffusion system 177
- dispersion curve 125
- dispersion relation 33
- Escherichia coli* 214
- excitable medium 1, 5, 13, 21, 52, 61, 71, 75, 82, 98, 107, 114, 161, 170, 233, 240, 247
- feature detection 247
- Field-Koros-Noyes mechanism 33
- FitzHugh-Nagumo model 107, 125
- gel medium 5, 40
- heterogeneous excitable medium 13, 21, 47, 75, 107
- image processing 240, 247
- immobilized catalyst 13, 71
- inhibition 52
- machine vision 247
- meandering 75
- morphogenetic regulation 214
- myocardium 125
- nullcline model 61
- obstacles 52
- optical density waves 224
- optical mapping 182
- Oregonator 125
- oscillating front 141
- oscillatory medium 52
- pattern detection 33
- pattern formation 161, 214
- periodic cell aggregation 233
- Proteus mirabilis* 214
- reaction 177
- reaction-diffusion system 5, 52, 61, 82, 90, 107, 114, 161, 170
- robotics 247
- rotating spirals 90
- rotor 125
- scroll ring 125
- simulation of waves 61
- simulations 114
- spatial interactions 198
- spatiotemporal coherence 198
- spiral patterns 233
- spiral waves 5, 13, 21, 52, 71, 82, 90, 98, 182, 224
- squid giant axons 198
- stability of nuclei 170
- supernormal 125
- synchronous concurrent algorithm 240

tachycardia 182
Turing pattern 141, 161

voltage-sensitive dyes 182
vortex ring 1, 125
vortices 1, 75, 107, 125

wave velocity 233
wavefront interaction 47, 98
