## Subject Index

- 2001: A Space Odyssey*, 115
- Accents, 12–13, 40, 48, 114  
Australian, 62, 65–66  
Boston, 68  
British, 62, 68  
Brooklyn, 68  
children and, 61–63  
consistency and, 71–72  
creating, 67–68  
economics and, 68, 71–72  
elitism and, 68  
experiments in, 65–67  
identification of, 67–68  
infants and, 63  
interfaces and, 67  
labels and, 68–70  
neutralization and, 62  
Pittsburgh, 71  
place of origin and, 61–72  
race and, 62–72  
*shibboleth* test and, 62  
Southern, 68
- Accidental Tourist, The* (film), 44
- Age, 69  
emotion and, 94–95  
faces and, 139  
specialist voice and, 106–107
- Aladdin* (film), 128
- Alignment, 177–178  
semantic, 177  
syntactic, 178
- Allen, Woody, 44
- Amobarbital sodium, 93–94
- Amazon.com, 101
- Ananova, 116, 129
- Arnott, John L., 86
- Artificial facial signals, 135
- Asimov, Isaac, 115
- AT&T, 103
- Attention. *See* Cognition
- Auction Web sites study, 52–55
- Audio lineups, 99
- Australians, 62, 65–66
- Back story, 54–55
- Baldi, 129–132
- Bandwidth, 11
- Barge-in technique, 180–181
- Barney & Friends* (TV series), 71
- Behavior  
consistency and, 50–59  
emotion and, 73–84 (*see also* Emotion)  
humor and, 145–147, 149–150, 153–155  
innate-affinity response and, 75–76  
input types and, 157–169  
labels and, 68–70  
machine gender and, 11–17  
masculine vs. feminine, 15–16  
modesty and, 171–174  
multiple-source effect and, 100–105  
oystercatchers metaphor and, 113

- Behavior (cont.)  
 personality and, 33–45  
 recording and, 159–169  
 social identification and, 10–11  
 stereotyping and, 19–31  
 BMW, 31, 55  
 Body shape, 33  
 Brain, human, 184  
 age and, 139  
 amobarbital sodium and, 93–94  
 consistency and, 50–59, 95  
 cortex, 75–76  
 crowds and, 109–110  
 decision making and, 75–76  
 emotion and, 73–76, 85–87  
 faces and, 127–128, 139–140  
 gender and, 9–31  
 hemispheres of, 85–86, 93–94, 139–140  
 identity and, 99, 108–109  
 language and, 47–51 (*see also* Language)  
 lateral temporal lobe, 85–86  
 social cues and, 2–5  
 speech organ for, 1  
 Stroop effect and, 50  
 thalamus, 75–76  
 voice activation and, 1–5  
 voice differentiation and, 97–100  
 Brando, Marlon, 147  
 British, 62, 68  
 Brown, Charlie, 42, 128  
 Bugs Bunny, 41–42, 137  
  
 Cadence, 97  
 Carrey, Jim, 83  
 Cars, 31  
 emotion and, 78–84  
 road rage and, 78  
 voice interfaces and, 55–57, 78–84  
 Cartoons, 42, 127–128, 137  
 Casting study, 44, 50  
 CD players, 109  
 Cell phones, 64  
 Channing, Carol, 40  
  
 Chat-bots, 135  
 Children  
 accents and, 61–63  
 deaf, 65  
 language and, 47–48  
 self-reference and, 121  
 Clarity, 40  
 conversational maxim of, 182  
 design for, 147–148  
 e-mail and, 147, 151–152  
 recorded voices and, 147–148, 151–152  
 Cocktail party effect, 97  
 Cognition. *See also* Brain, human  
 driving and, 78–84  
 emotion and, 73–84  
 humor and, 153  
 mood bias and, 77–84  
 multiple-source effect and, 100–105  
 negative halo effect and, 107  
 video conferencing and, 126–127  
 Cognitive economy/effort/load, 10, 81, 83, 98, 107, 120, 148, 153, 168, 171, 180  
 Communication contexts  
 barge-in technique and, 180–181  
 constrained, 166–167  
 face-to-face, 157–158, 168  
 long-distance, 157–158  
 maxim of quantity and, 180–181  
 misrecognition and, 171–182  
 question modality and, 165–166  
 recording and, 159–169  
 Computer rage, 77  
 Computers, 3–4, 184  
 accessibility to, 48  
 accuracy and, 144  
 gender stereotypes and, 23–24  
 humor and, 145–147, 153–155  
 modesty and, 172–174  
 Moore's law and, 64  
 multiple voices and, 100, 103–104  
 navigation systems, 31, 55–57  
 talking faces and, 129–130

- Turing test and, 135
- visual interfaces and, 64–65, 129–130
- Consistency, 94
  - accents and, 71–72
  - auction-site study and, 52–55
  - brain and, 95
  - emotion and, 81, 86–87
  - faces and, 129–130
  - maximization and, 148–149
  - similarity attraction and, 50–59
  - social information and, 71–72
- Conversational maxims, 179
  - quantity as, 180–181
  - relevance as, 181
  - clarity as, 182
- Copernican revolution, 141
- Cortex, 75–76
- Costello, Lou, 44
- Creativity, 160–164, 168
- Crowds, 109–110
- CSLU Toolkit, 131
- Cues, 2–5
  - accents as, 61–72
  - emotion, 85–86
  - facial, 125–142
  - human voice and, 134–135
  - labels and, 70
  - machine gender, 11–17
  - paralinguistic, 85–86, 88, 92, 167–168
  - skin color as, 139
  - stereotypes and, 68 (*see also* Stereotypes)
  - textual, 49
- Darth Vader, 44
- Darwin, Charles, 85, 141
- Deaf children, 65
- Decision making, 58
  - driving and, 78–84
  - Duncker's candle task and, 77
  - emotion and, 75–78
- Descartes, René, 114, 119–120
- Design, 6–7, 183–184
  - accuracy and, 144
  - back story and, 54–55
  - car voice-interfaces and, 81–84
  - consistency and, 50–59
  - contrast-highlights-failure principle and, 150–152
  - facial interfaces and, 137–142
  - feature bloat and, 143–144
  - flexibility and, 143–144
  - gender stereotypes and, 28–31
  - homogeneity and, 149–150
  - humor and, 145–147, 149–150, 153–155
  - making users try harder, 178–179
  - maximization and, 148–153
  - misrecognition issues and, 177–181
  - mixed synthetic and recorded voices, 143–155
  - modesty and, 171–174
  - multiple-voice interfaces and, 105–112
  - navigation systems and, 55–57
  - personality and, 40–44, 51–52, 54–60
  - personas and, 84
  - race issues and, 62–72
  - realism and, 145
  - recording and, 168–169
  - seriousness and, 145–146
  - smarter-seems-dumber principle and, 152–153
  - social information and, 4–5
  - voice clarity and, 147–148
- Dialects, 62–63
- Diaphragm, 98
- Dimensional approaches, 93
- Disclosure, 162–164, 168
- Drugs, 93–94
- Dual-tone multifrequency (DTMF), 115, 121
- Duncker's candle task, 77
- DVD players, 109
- Dyads, 171–177
- Ears, 1, 97, 99, 140
- Earwitness, 99
- Eastwood, Clint, 43
- E-commerce, 104
  - gender stereotypes and, 24–25, 30–31

- Economics, 104, 111. *See also* Design
- accents and, 68, 71–72
  - humor and, 155
  - multiple voice interfaces and, 105–109
  - negative halo effect and, 107
  - personality issues and, 40–44
  - similarity attraction and, 52–59
  - specialist voices and, 105–108
- Ectomorphs, 138
- Education
- context for experiments, 21–23, 104–105
  - dyadic, 171–177
  - gender stereotypes and, 21–28
- Ekman, Paul, 140
- Elitism, 68
- Eliza, 135, 179
- E-mail, 48, 51, 68
- clarity and, 147, 151–152
  - emotion and, 89–91
  - specialist voice and, 107–108
- Emoticons, 90–91
- Emotion, 2, 4, 13, 47, 114, 183–184
- amobarbitol sodium and, 93–94
  - articulated musculature for, 142
  - attention and, 77
  - basic, 76–77
  - brain and, 73–76, 85–87
  - car voice-interfaces and, 78–84
  - categorical approach toward, 93
  - central role of, 85
  - computer rage, 77
  - consistency and, 81, 86–87
  - contagion of, 93–94
  - decision making and, 75–78
  - defining, 74–76
  - detecting, 81–82
  - as dimensions, 93
  - Duncker's candle task and, 77
  - e-mail and, 89
  - environmental effects and, 73–74
  - faces and, 128, 136, 139–140, 142
  - gender and, 94–95
  - hedonic preference and, 91–92
  - humor and, 145–147, 149–150, 153–155
  - infants and, 85
  - innate-affinity response and, 75–77
  - interpretation of, 87
  - language and, 89–91
  - learned, 76–77
  - limbic system and, 76
  - mood bias and, 77–84
  - perceived traits and, 94–95
  - performance and, 77–78, 113
  - personas and, 84
  - Pollyanna effect, 92
  - primary, 75
  - road rage, 78
  - technology and, 88–91
  - textual manipulation and, 92
  - thought and, 74
  - Uncanny Valley and, 145
- Endocrine system, 98
- Endomorphs, 138
- Ethnicity, 113, 139
- accent and, 63
  - experiments in, 65–67
  - humor and, 153
  - labels and, 68–70
  - race and, 64–72
- Evolution, 2–3
- emotion and, 85
  - identity and, 98–99
  - multiple voices and, 100
  - similarity attraction and, 34–38
  - social identification and, 10–11, 157
- Experiments
- auction Web sites, 52–55
  - car interface, 55–57
  - casting study, 44
  - constrained speaking contexts, 166–167
