- Telomere terminal transferase, 94, 98

## TERT

- first isolated, 147, 182–185
  - first isolated in humans (*hTERT*), 147, 194
  - sequence of, 193–194
  - transcribed into different types of mRNA, 209
- TERT
- binding to ancillary proteins, 196–197
  - binding to RNA component, 191 (fig. 8.2), 192
  - excess of, stimulating stem cell proliferation in mice, 321–322
  - role in enzyme's activity, 193–195
- Tetrahymena thermophila*. *See also* Telomerase, activity first demonstrated in vitro; Telomere, first sequenced in
- cell senescence induced in, 120–122
  - characteristics of, 45, 46–47, 69, 84, 121
  - E.B.'s feelings for, 46–47
