abstraction, xv, 283-285, 287, 303
                                           Affective Resonance Account,
action, theory of, 321, 362, 363,
  365
                                           age, 221, 236, 238
acts, 215, 231, 294, 308
                                           agency
adaptation(s)
                                            and cheating detection, 157
 as constant, 43
                                            harm infliction, 329, 346, 363
                                            and inference, 66-69
 versus creation, 437
 and incest, 177-182, 185-188, 197,
                                            and moral norms, 362
  200
                                            and nativism, 321, 362, 363
 and kin-directed altruism, 175
                                            non-naturalist view, 7
 moral virtues as, 251-258
                                            and social contracts, 74n, 108, 149,
 and sexual selection, 212-215, 223,
                                             151 - 155
  233-235
                                            symbolic thought, 287, 310
 and social behavior, 69-71, 286
                                           aggression
 and third-parties, 167-169, 206
                                            and conflict resolution, 251-258
 values as, 437
                                            and domain specificity, 58
 See also fitness consequences
                                            lack of, 294
adaptive problems
                                            and sexual selection, 223
 domain differences, 58, 77, 115
                                            symbolic extention, 288
 and ecological rationality, 65-69, 82
                                            and vicarious distress, 374
 and inbreeding, 178-182, 205-207
                                           agnosticism, 21n7
 and social exchange, 65-69, 77, 82,
                                           agreeableness, 224, 227, 229, 239
  115
                                           altruism
addictions, 212
                                            and aesthetics, 233
adolescents, 221, 238, 322
                                            and animals, 254, 400-402
advantage, 5, 52n
                                            genetic transmission, 224
 See also benefit
                                            kin-directed, 175, 179, 190n6, 214
aesthetics, 232, 253, 257, 282
