Johnston, John Harvey, 1947–

The allure of machinic life : cybernetics, artificial life, and the new AI / John Johnston
p. cm.

Includes bibliographical references and index.

ISBN 978-0-262-10126-4 (hardcover : alk. paper)

1. Cybernetics. 2. Artificial life. 3. Artificial intelligence. I. Title.

- Abrahamsen, Adele. *See* Bechtel
- Abstract machine, 105, 286
computer as, 8, 61
in DeLanda, 127, 129
in Deleuze and Guattari, 119–120, 152–153, 289
- Ackley, David, 15, 267–270
ccr, 268–269
evolutionary reinforcement learning, 236
Lamarckian evolution, 418n43
and “living computation,” 267–270
- Adami, Christoph, 2, 20, 246–253, 260
Avida, 246–253
on complexity, 250–252
information and the genome, 249–253
on robot self-modeling, 411
- Agent theory, 339–340, 347, 361–363, 386–387, 393–394
agent-based emergence, 14, 341–342
multiagent systems, 14, 232–234, 256–260
- Agre, Philip, and David Chapman
deictic representation, 355
Pengi, 354–356
- AI. *See also* New AI
Brooks’s critique of, 343, 346–347
classical (symbolic) AI, xii, 15, 287, 290–302, 313, 337–338
and cognitive science, 281–286
cognitivism and “mind as computer” model, 297–302
and computer games, 388
expert or smart systems, 298, 348, 386–387
importance of chess in, 293, 387, 450n4
origins, 287–297
physical symbol system hypothesis in, 293–296
Searle’s critique of, 333–335, 395
strong and weak, 434n1
symbolic AI versus connectionism, 313–319, 337–338
three ten-year stages, 298
as top-down model of human intelligence, 8, 173, 337
- Algorithm, 69, 70–71, 172, 364, 396
- ALife
and connectionism, 173
as emergent, self-organizing system, 13
and games, 434n77
genotype and phenotype, 176–177
influence on AI, 15, 338, 343, 347–348, 365
Langton versus Varela, 197–199, 201, 215
manipulation of genome in, 18, 246–248, 254–256
strong theory of, 1, 166, 180, 215, 401
synthetic approach, 176
versus AI, x, 173
wetlife approach, 270–274
- Amoeba, 253–260
- Animats, 15, 353
- Artificial chemistry, 200–201
- Artificial intelligence. *See* AI
- Artificial life. *See* ALife
- Artificial protocells, 15, 270–274
top-down versus bottom-up approach, 270–271
- Ashby, W. Ross, 1, 2, 8–9, 30, 31–34, 50, 384
coupled dynamical systems, 31, 40
cybernetics as a theory of machines, 30, 40
Design for a Brain, 30, 40, 44, 45
homeostat machine, 30, 40–47
Introduction to Cybernetics, 30, 40
Markovian machines, 31, 424n27
self-organizing machines, 53–55
