ACKNOWLEDGMENTS

During the long process of researching and writing this book, John L. Sprague (grandson of Frank J. Sprague) provided invaluable assistance in the form of ideas, recommendations, contacts, and access to material not readily available from public sources. These included his personal recollections, family papers, and especially the six letterbooks (now available at the Williams College Chapin Library) that were presented to Frank Sprague on his seventy-fifth birthday in 1932. While respecting my independent critical analysis absolutely, he has corrected any number of factual errors in early drafts.

My friend and mentor Davis Dyer supplied continuous guidance in framing (and re-framing!) the project, as well as constant encouragement in seeing it through. Without his support, this book would never have been completed.

ACKNOWLEDGMENTS

W. Bernard Carlson offered input and contextual perspective at an early stage in the project, and vital encouragement along the way as my ideas slowly cohered.

Robert F. Dalzell, Jr., has read drafts of chapters and provided helpful input, combining the rigor of a scholar and the sensitivity of a father.

Electrical/Railway Engineering Historian Joseph J. Cunningham lent his encyclopedic knowledge of Sprague's inventions and their enduring relevancy. Robert J. Lobenstein, General Superintendent of Power Operations for the New York City Transit (subway) System, also provided critical insight, testifying to the enduring legacy of Sprague's multiple unit control systems in New York's subway to this day. Robert W. Walker, Director of Operating Capital Project for the Metro-North Railroad, provided information on numerous systems, where Sprague's work continues to hum. M. Julian Pepinster, President of the Association d'Exploitation du Material Sprague, offered detailed information concerning the Sprague-Thomson subway cars used in the Paris Metro Line, *Le Sprague*. Piers Conner, former President of the London Underground Railway Society, also lent invaluable expertise, including a series of articles published in the (London) *Underground News* starting in 2005.

Finally, Mary-Elise, Abby, and Molly have added vital love, support, and faith. To everyone who helped, but particularly to these last three: Thank you.
