## Acknowledgments

We thank Dan Aaronson, Dale Belman, Jared Bernstein, Carolina Briones, Mike Campolieti, Kenneth Couch, Wendy Cunningham, David Fairris, Fernando Galinda-Rueda, Harry Holzer, David Lee, Andrew Leigh, William Maloney, Alan Manning, Tom Michl, Michael Reich, Joseph Sabia, and four anonymous reviewers for helpful comments on this manuscript, and especially Jennifer Graves and Smith Williams for their careful editing and assistance. We are most grateful to Scott Adams, Wendy Cunningham, Olena Nizalova, Mark Schweitzer, and Lucas Siga for collaboration on some of the research described in this book. Neumark benefited greatly from support as a Visiting Scholar at the Federal Reserve Bank of Cleveland. The Employment Policies Institute (EPI, Washington, D.C.) and the Show-Me Institute (St. Louis, Missouri) have provided some funding to Neumark for writing nontechnical summaries of our research findings for dissemination to a wider audience; the only research funding received from the EPI was support for Neumark's work on our 2007 working paper on minimum wages and the Earned Income Tax Credit (EITC) discussed in chapters 3 and 5.

Chapter 3 is an abbreviated and updated version of our much lengthier review:

Neumark, David, and William L. Wascher. 2007. Minimum Wages and Employment. *Foundations and Trends in Microeconomics* 3, nos. 1–2: 1–182.

The views expressed in this book are our own, and do not necessarily reflect the views of the Federal Reserve Board, the Public Policy Institute of California, or other organizations with which we are affiliated or that have provided support.
