Mindell, David A.

Digital Apollo : human and machine in spaceflight / David A. Mindell.

p. cm.

Includes bibliographical references and index.

ISBN 978-0-262-13497-2 (hardcover : alk. paper) 1. Human-machine systems. 2. Project Apollo (U.S.)—History. 3. Astronautics—United States—History. 4. Manned spaceflight—History.

## Index

- Accelerometers, 1
  - Apollo program and, 97, 109–110, 119, 132, 174, 194, 201
- AC Spark Plug, 110, 127, 134, 137
- Adams, Mike, 59–61
- Adaptive control systems, 57–61, 77
- AGC (Apollo guidance computer), 259
  - Apollo 4 and, 174–175
  - Apollo 5 and, 175
  - Apollo 7 and, 177
  - astronaut input and, 159
  - Block II and, 137–138
  - digital autopilot and, 139–142
  - display and keyboard (DSKY) unit and, 165–169
  - Eagle and, 220
  - landings and, 191, 193, 208
  - lunar module (LM) and, 200, 220
  - reliability issues and, 123–143
  - weight of, 143
- AGE models, 106
- Agna, 85
- Aiken, Howard, 100
- Aiming at Targets* (Seamans), 97
- Airbus, 267
- Airliners, 267
- Airmen school, 21–23
  - Apollo and, 160–161
  - X-15 and, 46–49, 63, 66, 68
- Airplanes
  - airmen vs. chauffeurs and, 21–23, 46–49, 63
  - control and, 19–22
  - F-80 Shooting Star, 45
  - F-104 Starfighter, 45
  - SR-71, 45
  - stability and, 19–22
  - U-2, 45
  - X-1, 44, 46
  - X-15, 6 (*see also* X-15)
- Air-pressure gauges, 24
- Aldrin, Edwin “Buzz,” 1–4, 8, 86
  - Eagle and, 217–232
  - Medal of Freedom and, 232
- Alonso, Ray, 100, 102, 126, 157–158, 166
- Altimeters, 24–25, 110, 201, 222
- American Institute of Aeronautics and Astronautics (AIAA), 263
- Ames Research Center, 28, 31, 43, 103
- Angle of attack, 47–48, 56–59
- Antares, 244
- Apollo program, 1, 49, 62–63, 66, 264, 269
  - airmen school and, 27–28, 39
  - American imagery and, 12
  - announcement of, 92
  - astronaut integration and, 105
  - automation and, 92, 94, 105–109, 119–121, 139–142, 177–180, 243, 258
  - Battin and, 100–103
  - beginnings of, 91–93
  - black Friday and, 171
  - changing nature of, 112–114
  - Chilton and, 91–93, 96, 104

- Apollo program (cont.)
  - Christmas Eve mission and, 178
  - computers and, 104–106, 123–143 (*see also* Computers)
  - congressional support of, 96
  - cost of, 5, 106, 109, 143, 251
  - deaths and, 173
  - decision points and, 103
  - early missions and, 174–177
  - firmware and, 154–157
  - G&N System Panel and, 148–149, 160
  - Gemini and, 86
  - guidance systems and, 102–114, 174–180, 243
  - gyro culture and, 96–97
  - human factors and, 14–15, 160–166 (*see also* Human factors)
  - Instrumentation Laboratory and, 96, 105–121 (*see also* Instrumentation Laboratory)
  - J-missions and, 249–250
  - Kennedy and, 5–7, 12, 61, 91, 95, 104–105, 107, 111, 134, 251, 270
  - landings and, 181–215
  - management conflicts and, 133–137
  - optics issues and, 114–119
  - Polaris and, 104–105, 110
  - project management and, 169–174
  - project-oriented histories of, 9–10
  - safety requirements and, 134–135
  - simulators and, 2–3, 51, 54 (*see also* Simulators)
  - social effects of, 8–10
  - software and, 145–180 (*see also* Software)
  - sole-source contract and, 107–108
- Apollo 1, 173
- Apollo 4, 174–175
- Apollo 5, 175–176, 233
- Apollo 6, 176
- Apollo 7, 176–177
- Apollo 8, 177–180
- Apollo 10, 190, 217, 256
- Apollo 11, 9–10, 251, 261
  - computer alarms and, 221–227
  - descent orbit insertion (DOI) and, 217–218
  - Eagle landing and, 1–4, 7–8, 217–232
  - human factors and, 217–227
  - lack of accuracy and, 235
  - Medal of Freedom and, 232
  - pilots' reasons for manual control and, 259
  - pitch over and, 220–221
  - powered descent and, 217–220
  - scientist resignations and, 257
  - simulators and, 217, 220
- Apollo 12, 261
  - accuracy and, 235–237
  - Conrad and, 236–243
  - DELTAH and, 237
  - goal of, 235–236
  - improvements on, 236
  - landing point designator (LPD) and, 237–238
  - lunar module (LM) of, 236–237
  - Noun 69 and, 236–237, 242–243
  - pilots' reasons for manual control and, 259
  - pitch over and, 238
  - powered descent initiation (PDI) and, 237
  - procedural changes in, 236–237
  - reaction control system (RCS) and, 237–238
  - simulators and, 238
  - velocity indicator and, 241–242
- Apollo 13, 9, 186, 243
- Apollo 13* (film), 9
- Apollo 14, 233
  - backup systems and, 248–249
  - hardware failure and, 243–248
  - pilot skills and, 248–249
  - pilots' reasons for manual control and, 260
  - pitch over and, 251
  - powered descent initiative (PDI) and, 245–247
- Apollo 15, 250
  - pilots' reasons for manual control and, 260
  - pitch over and, 251–255
- Apollo 16, 250–251, 255, 260
- Apollo 17, 251
  - pilots' reasons for manual control and, 260
  - pitch over and, 258
  - scientist-astronauts and, 256–257
- Apollo 18, 251

- Armstrong, Neil, 1–3, 213, 241–242, 259  
 airmen school and, 29, 31  
 Apollo 11 and, 217–232  
 confusion of, 226  
 digital computers and, 87  
 Eagle landing and, 217–232  
 Gemini and, 85  
 gimbal reliability and, 120  
 instrumentation and, 35, 181, 295n53  
 Johnsville tests and, 70–72  
 Lunar Landing Training Vehicle (LLTV) and, 214  
 Medal of Freedom and, 232  
 pilot role and, 80  
 Society of Experimental Test Pilots (SETP) and, 224, 226  
 X-15 and, 49, 58–59, 61  
 Army Ballistic Missile Agency, 66  
 Artificial horizons, 24  
 AS-202, 172  
 AS-204, 171  
 AS-501, 174–175  
 ASPO, 134–135, 139  
*Astronautical Guidance* (Battin), 100–101  
 Astronauts  
   active role of, 65  
   age of systems and, 38–41  
   automation and, 158–166  
   as calibrators, 105  
   computers and, 66, 160–166  
   constraints for, 159–160  
   control and, 65–66  
   dangerous actions and, 159–160  
   deaths of, 173  
   deployable optics and, 117  
   digital autopilot and, 139–142  
   displays for, 165–169  
   Eagle landing and, 1–4, 217–232  
   Explorers Club and, 271  
   future of, 263–271  
   Gemini and, 83–88  
   “go to moon” interface and, 160–161  
   human interface and, 4–8, 160–166 (*see also* Human factors)  
   information flows and, 162–163  
   Instrumentation Laboratory courses and, 158–159  
   landings and, 181–215 (*see also* Landings)  
   literature by, 9  
   lunar module (LM) design and, 184–186  
   manual reentry and, 160  
   masculinity and, 13–14  
   Mercury and, 73–83  
   moonwalks and, 83, 268–269  
   pilot transitions and, 161–166 (*see also* Pilots)  
   replacement of, 158  
   rockets and, 65–66  
   scientist-astronauts and, 256–257  
   user errors and, 160  
   women and, 13  
 Astronomical Guidance course, 101  
 AT&T, 37  
 Atlas rocket, 18, 72–77  
 Atomic frequency standards, 138  
 Attitude, 47–48, 77  
   Adams’s death and, 59–61  
   eight ball and, 159  
   landing point designator and, 204–206  
   pitch over and, 251–255  
 Automation, 6, 12  
   adaptive control systems and, 57–61  
   airliners and, 267  
   Apollo and, 92, 94, 105–109, 119–121, 139–142, 177–180, 243, 258  
   astronaut input and, 158–166  
   booster rockets and, 72  
   computers and, 123–143 (*see also* Computers)  
   Eagle landing and, 221–227  
   future of, 263–271  
   Gemini and, 86–88  
   human factors and, 4–8 (*see also* Human factors)  
   landings and, 181–215 (*see also* Landings)  
   lunar module (LM) and, 193–197, 199–201  
   Mercury and, 73–83  
   pilots and, 17–21, 26, 43, 66–69, 73–83, 139–142, 259–260  
   Soviet space program and, 88–90, 93–94

- Automation (cont.)  
 stability augmentation system (SAS) and, 55–57, 60  
 systems engineering and, 36–41  
 Unmanned Aerial Vehicles (UAVs) and, 267
- Aviation  
 airmen vs. chauffeur school and, 21–23  
 control and, 17–22  
 faster-and-higher goal and, 44  
 High Speed Flight Station and, 43–44  
 Kitty Hawk and, 44  
 National Advisory Committee on Aeronautics (NACA) and, 6, 26–28  
 pilot's role and, 17–21 (*see also* Pilots)  
 skill and, 22–23  
 stability and, 17–22  
*Aviation Week and Space Technology*, 179, 267
- B-2 bomber, 266–267  
 B-17 bomber, 75  
 B-52 bomber, 47–48, 50, 54, 63  
 Bales, Steven, 3, 222  
 Ballistic flight paths, 44  
 Barnstormers, 10, 20  
 Basic (Apollo computer language), 149  
 BASIC (Dartmouth computer language), 149  
 Bassett, Preston, 43  
 Battin, Richard, 104, 127, 170, 194  
 Apollo 8 and, 178  
 computer errors and, 232  
 decision points and, 103  
 lunar mission and, 102–103  
 orbital transfers and, 101–102  
 project management and, 170  
 Q-guidance technique and, 100  
 recursive estimation of, 102–103  
 software and, 145–146, 151, 158  
 Bean, Alan, 236–237, 240  
 Becker, John, 44–45  
 Bell Aerosystems, 210–211  
 Bellcomm, 135  
 Bellman, Donald, 210  
 Bell Telephone Laboratories, 37, 263  
 Bennett, Floyd, 241, 251, 300n47  
 computer alarms and, 225–226  
 Exceptional Service Medal and, 240  
 landing design and, 187–188, 192, 207  
 technical project summation of, 242–243  
 Bickle, Paul, 90  
 Black boxes, 34–36, 39, 54, 57, 135  
 Blackburn, Al, 35, 39–40, 68  
 Black Friday, 171  
*Blade Runner* (film), 13  
 Blair, Charles, 40–41  
 Blair-Smith, Hugh, 126, 149  
 Blind flying, 24–26, 53–54  
 Bode, Henrik, 33  
 Boeing, 92, 267  
 Bomarc missile, 18, 61  
 Bonestell, Chesley, 111  
 Borman, Frank, 84, 169, 179  
*Boston Globe*, 248  
*Boston Herald*, 179  
 Bowditch, Philip, 114  
 Bronson, Charles, 62  
 Brown, Alexander, 101  
 BURNBABY, 218  
 Bush, Vannevar, 98  
 Butler, Rhett, 28
- Cape Canaveral, 134  
 Capsule Communicator (CAPCOM), 218, 222  
 Carpenter, Scott, 81, 121  
 Centrifuge tests, 70–72  
 Century series jets, 32–33  
 Cernan, Gene, 251, 256–260  
 Cessnas, 267  
 Chance-Vought, 30  
 Charles Stark Draper Laboratories, 96–97  
 Chauffeur school, 21–23  
 Apollo and, 160–161  
 X-15 and, 46–49  
 Cheatham, Donald, 186–187, 204  
 Cherry, George, 189  
 Chilton, Robert, 264  
 Apollo computer and, 128

- guidance systems and, 96, 104–107
  - pilot role and, 75–77, 91–93
  - Cockpit, The* (magazine), 31
  - Cockpits, 24–29
  - Cohen, Aaron, 88, 112–113, 136–137, 142
  - Colliers* magazine, 111
  - Collier Trophy, 61
  - Collins, Michael, 1, 10, 265
    - Columbia and, 217–218
    - guidance systems and, 116, 121
    - Medal of Freedom and, 232
    - pilot role and, 82, 87, 93
    - simulators and, 209
    - symbolism and, 11
  - COLOSSUS, 151
  - Columbia space shuttle, 49, 217–218, 264–265
  - Command and service module (CSM), 1, 33,
    - 135, 146
  - AGC interface and, 168
  - Apollo 12 and, 236–237
  - COLOSSUS and, 151
  - Columbia and, 217–218
  - digital autopilot and, 139–142
  - docking and, 186, 192–193
  - future of, 265–266
  - gimbal reliability and, 120–121
  - guidance systems operation plan (GSOP) for,
    - 151–152
  - lunar module (LM) and, 186, 192–193
  - P40 program and, 150
  - radar and, 191
  - simulators and, 208–209
  - software for, 146
- Communications, 2, 15, 77
- Eagle and, 221–227
  - jamming and, 97, 104, 138
  - landings and, 190–191, 221–227
  - teleprinter and, 108–109
- Compasses, 24
- Computers, 15
- AGC, 126–128, 133, 137, 143 (*see also* AGC [Apollo guidance computer])
  - Alonso and, 100, 102
  - analog, 52–54, 57–58
  - Apollo 4 and, 174–175
  - Apollo 5 and, 175
  - Apollo 7 and, 177
  - Apollo 11 and, 221–227
  - Apollo 14 and, 243–249
  - astronaut’s view of, 66, 158–166
  - B-2 stealth bomber and, 266–267
  - Block I AGC, 123–136, 143, 172
  - Block II AGC, 136–143, 149, 154, 171, 175–176
  - core logic and, 125–126
  - crashes and, 123–124
  - digital, 62, 87, 139–142
  - displays and, 152, 165–169
  - Eagle landing and, 1–4, 6, 221–232
  - electrical noise and, 2–3
  - embedded assumptions of, 13–14
  - ENIAC, 98
  - firmware and, 154–157
  - FORTTRAN and, 99
  - future of, 263–271
  - G&N System Panel and, 148–149
  - Gemini and, 87–88
  - general-purpose, 123
  - “go to moon” interface and, 160–161
  - guidance systems and, 104–106, 114, 123–142
  - human-machine relationship and, 4–8 (*see also* Human factors)
  - humidity effects and, 137–138
