Index

- Acemoglu, D., 69–78
- Acquisitions, 1, 5, 32
- efficiency and, 26
 - greenfield case and, 25–26
 - merger gains and, 33–34
 - OECD data and, 30–31
 - oligopoly model and, 25–31
 - price-cost margin and, 28–29
 - synergy and, 26
 - trade liberalization and, 29–30
 - UNCTAD and, 25–26
- Agglomeration
- benchmarking methods for, 90, 95
 - break analysis and, 103–106, 112–114
 - core-periphery outcome and, 89–90
 - equilibrium and, 93–94
 - Forslid-Ottaviano model and, 95–110
 - government spending and, 89–110
 - Nash equilibrium and, 91
 - positive externalities and, 93–94
 - production factors and, 89–90
 - race-to-the-bottom hypothesis and, 92–95
 - symmetric equilibrium and, 100–103
- Aghion, P., 69–78
- Alabama, 259
- Amerighi, Oscar, 117–153
- Amiti, M., 201
- Andersson, F., 90–91, 96
- Anselin, Luc, 180, 188
- Antras, P., 68
- Arm's length principle, 260
- Italians and, 199, 220
 - oligopoly model and, 117–126, 131–132, 137–142, 145, 147
- Asset specificity problem, 5
- Association of Austrian Social Insurance, 236, 249
- Austria, 7
- capital stock and, 254
 - Feenstra-Hanson model and, 235–241
 - integration of, 227
 - outsourcing and, 225–232, 236–241, 248–249
 - relative employment regressions and, 240–241
 - research and development (R&D) and, 237–241
 - skilled labor and, 227–232, 236–241, 248–249
- Autarky, 29–30, 98, 156–157
- Autoregressive patterns
- constant returns to scale (CRS) and, 175, 177–178
 - empirical specification and, 178–181
 - inbound FDI and, 173–194
 - inverse distance function and, 180–181
 - OECD data and, 174, 181–186
 - omega effect and, 180, 186
 - partial equilibrium model and, 174–194
 - spatial lag and, 180–192
 - spillover and, 181
- Average treatment effect on treated (ATT), 207–208, 217, 218–220
- Aw, B., 203
- Backward induction, 124–125
- Balassa index, 31
- Baldwin, Richard E.
- agglomeration and, 89–91, 93, 96–97, 100, 110
 - liberalization and, 39
 - new economic geography and, 89–90
