Index

- Abatement costs. *See* Greenhouse gas (GHG) reduction costs
- Acid rain
coal industry and, 87–88, 144
denial of problems of, 87–88
emissions trading and, 133, 139
- Ackerman, Bruce A., 164–165
- Adaptation
competing strategies, 285–286
defined, 278
economics and, 282–286
efforts to address
international, 280–281
national and local, 281–282
estimating costs of, 278–279
ideal plan, 292–293
justice and, 286–293, 304
matching funds and, 283–284, 290
measures, 187, 207
vs. mitigation, 291
urgency, 277, 303
- Adaptation COP, 282, 290
- Adaptation Fund, 280, 283
- Adaptive efficiency, 6
- “Additionality,” 140, 142
- Aggregate social welfare. *See* Efficiency, Kaldor–Hicks
- Agricultural output, decrease in, 35, 36, 198
- Air pollutants, defined, 38n1
- Air pollution, 89–90
monitoring of emissions trading, 132
- Allocative efficiency, 3
- α -Precaution, 173
- Alternative energy, 164, 219, 263, 266, 268, 270. *See also* Environmental competition statute; Regulatory history of dirty energy; Renewable energy
- Alternative energy industry, 109
- American Electric Power Company, 214
- American Enterprise Institute. *See* Think tanks, American Enterprise Institute
- Antiregulatory litany, 85–87, 300
- arguments in
“I can’t help it,” 89–90
“It’s not my fault,” 88–89
“It’s not worth it,” 90–91 (*see also* Cost-effectiveness)
“Prove it,” 87–88, 97 (*see also* Uncertainty(ies))
“That’s not fair,” 91–92, 96–97 (*see also* Distributional inequities)
- continues despite change in corporate culture, 99–100
- government attachment to, 100–101
- use of, to thwart regulation, 92–93
industry’s, 93–94
- Arctic National Wildlife Refuge (ANWR), 50
- Arcuri, Alessandra, 176
- Army Corps of Engineers, U.S., 282
- Arrhenius, Svante, 203
- Asphalt formulations, switching, 132
- Assurance problem, 156, 157

- Atmosphere, 242
 absorptive capacity, 242
 warming of, 30 (*see also* Climate change)
 Automobile industry, 219, 258, 267, 270, 301
 Automotive pollution, 89–92

 “Backstop technology,” 66
 Baer, Paul, 73
 “Baseline” state of the world predictions, 215–217
 Bears, 37
 Berkeley Energy and Resources model, 222
 Berkeley study, 222–224, 227
 “Best guess” estimates, 62
 “Binding collective undertaking,” 156, 159
 Biodiversity. *See* Species threats and losses
 Bingaman, Jeff, 228
 Biofuels, 53. *See also* Renewable energy
 Black Lung Act, 54
 Bounded rationality, 186
 Brown Weiss, Edith, 247–249
 “Bubble” programs, 131–138
 Bush, George H. W., 4, 133, 289
 Bush, George W., 1, 12, 53, 138, 206
 administration, 163, 288
 information control by, 98, 163, 206
 uncertainties of climate change and, 177
 on energy consumption and the economy, 52
 equality principle and, 239, 289
 Kyoto Protocol and, 1, 26–27, 61, 95, 138, 177, 206, 238, 281, 289
 Montreal Protocol signed by, 28
 new energy rhetoric, 52
 Business-as-usual (BAU) paths for emissions, 8, 32, 61, 67, 68, 207
 incentives to pursue, 111–112
 Business Roundtable, 24, 93
 Byrd, Robert, 88
 Byrd–Hagel resolution, 26, 110

 California Air Resources Board, 258
 California Climate Change Center, University of California, 222.
 See also Berkeley study
 California’s GHG reduction programs, estimating costs of complying with, 222–224
 Cap-and-trade programs, 216, 226–229, 266, 302, 303. *See also* Caps on greenhouse gas emissions; Dirty input limits; Emissions trading
 allocating entitlements, 227–228
 emissions trading and, 138, 139, 141 (*see also* Emissions trading)
 recycling revenues and, 220, 227
 safety valves and, 221
 vs. “sector-specific command-and-control” requirements, 224
 vs. “technology-forcing” requirements, 219
 Capitalism, 23–25. *See also* Free market ideology; Neoliberalism
 Caps on greenhouse gas emissions, 76, 133, 139, 240, 244–246. *See also* Cap-and-trade programs; Emissions trading
 Carbon capture technology, 268
 viability of, 228, 268
 Carbon credits, 164
 Carbon dioxide (CO₂), 30–31, 34, 164, 203
 Carbon footprint, 46
 ways to reduce one’s, 124n41, 208
 Carbon limits, 110–111
 Carbon sinks, 99, 134, 137, 278
 Carbon tax, 163–164, 216, 219–220, 227, 233n41. *See also* Emissions tax; Energy tax; Taxes
 John Dingell and, 213, 214
 European Union and, 138
 globally uniform, 116
 likelihood of implementation, 225–227
 optimal, 61, 62, 71
 Carcinogens, 89. *See also specific carcinogens*
 Cartagena Protocol on Biosafety, 188
