Index

- Aboriginal metatraditions, 166–168
- Academic publishing, fashion versus selection in, 125–133
- Academic vocabulary
- frequencies of through time, 126, 129–131
 - frequency distributions of, 126, 132–133
 - random copying of, 125–126
 - turnover of, 127, 128–129
- Adaptation. *See also* Cumulative adaptive evolution
- arrival of fittest and, 33–34
 - creation of, 260–261
 - versus evolution, 59–61
 - in evolutionary biology, 84
 - mutations underlying, 91
 - origins of, 29
 - patterns of in diverse environments, 100–101
- Adaptive landscape
- concept of, 183
 - multimodal
 - cultural transmission in, 11
 - innovation spread in, 182–188
- Adoption
- in archaeological record, 240
 - cultural interconnectedness in, 103–107
 - definition of, 238–239
 - of new products, social-influence models of, 193–213
- Africa
- early modern humans in, 139
 - Upper Paleolithic transition in, 138
- Agency-based cultural variation model, 258–259
- Aggrandizer model, 247
- Agricultural diffusion, in United States, 211–212
- Aitken, H. G. J., 242
- Akrich, M., 217
- Albert, R., 127
- Alcheringa*, 168
- Algoe, S. B., 112
- Allen, J., 139, 140
- Altruism, group selection of, 117n.3
- Ambrose, S. H., 140
- American archaeology, innovation in, 5
- American Southwest, spread of Salado ceramic tradition across, 251–262
- Amish
- metatraditions of, 164–166
 - as “People of Preservation,” 161–162
- Ammerman, A., 179–180
- Anagenesis, 12
- Analogy, argument by, 22–24
- Anasazi
- attempt to unite, 257
 - region of, 252
 - Salado ceramic tradition in, 251
- Anatomical novelty, emergence of, 54–55
- Ancestral Law, Australian Aboriginal, 166–168
- Ancrenaz, 40
- Animal innovation, 37–38, 48
- case studies of, 42–47
 - defining, 40–41
 - ecological and evolutionary significance of, 38–40
 - experimental studies of, 41
- Anthropology, units of culture in, 5–6
- Antibiotics, discovery of, 111
- Antipsychologism, 85
- Apesteguija, J., 102
- Apprenticeship institution, 112–113
- Archaeological studies, of invention processes, 235–248
- Ariew, A., 24
- Aristotle, 21
- Arnold, S. J., 11, 183, 243
- Arrow-Debreu formalization of competitive equilibrium, 89
- Art, first appearance of, 138
- Artifacts
- change in types and frequencies of, 235–236
 - designs of, 183
 - properties of, 182
 - typologies of, 240
 - unique or rare, 240
- Asch, S. E., 102

- Asocial learning
 in captive birds, 48
 in foraging innovation, 43
- Association patterns, in spread of solving, 43–44
- Ast, G., 59
- Atran, S., 7
- Aunger, R., 7, 73, 175–176
- Australia
 aboriginal, metatraditions of, 166–168
 cultural patterns of early modern humans in, 140
 dearth of technological complexity in, 107
 early modern humans in, 139
 foragers in, 109
 Upper Paleolithic transition in, 138
- Aztec system, 258
- Bacterial cultures, 110
- Bagwell, E. A., 240
- Bamforth, D., 21, 23–24, 25, 30–31, 76
- Bandura, A., 101
- Banfield, E. C., 115
- Bar-Yosef, O., 137–138
- Barabási, A.-L., 127
- Barnett, H. G., 3, 176
- Barnett, S. A., 46
- Baron, R. J., 102
- Basalla, G., 6, 109, 110, 111
- Bass, F. M., 193, 194–195, 210, 213
- Bass diffusion model, 193, 210–213
 combined with dual-inheritance model, 204–208
 versus dual-inheritance model, 198–199
- Bass model of innovation diffusion, 194–195
- Bastian, Adolf, 5
- Bateson, W., 55, 62
- Baum, W. M., 176
- Baumol, W. J., 84, 88–89
- Bauvais, S., 226
- Bayus, B. L., 209, 210
- Behavior change
 versus novel behavior, 41
 technological change as, 236
- Behavioral-drive hypothesis, 39–40
- Behavioral flexibility
 in animals, 37–38
 ecological and evolutionary implications of, 39
- Behavioral norms, cultural evolution of, 116–117
- Belmont Radio, 244
- Bentley, R. A., 9, 10–11, 121–124, 126, 127, 132, 134
