Acknowledgments

This book represents over a decade of work in thinking, researching, and writing about exchange rate regimes. Along the way, in both producing this book during the last year, and in generating the research that has gone into it over the last decade, many people have helped us. It is a pleasure to acknowledge them, and to thank them for their support.

First and foremost, we would like to thank our fellow scholars, many of whom had a hand in generating the research discussed in this book. Various chapters draw on joint work with Julian di Giovanni, Philip Lane, Nancy Marion, Maurice Obstfeld, and Alan Taylor. We thank them for working with us, and, more broadly, for contributing to our understanding and appreciation of these issues. In addition, the work in this book was presented at numerous seminars and conferences, and we owe a great deal to seminar participants and discussants, as well as to others who offered comments on our research papers and drafts of this book, including Sven Arndt, Christian Broda, Menzie Chinn, Barry Eichengreen, Charles Engel, Jeff Frankel, Allen Isaac, Richard Levich, Paolo Mauro, Volker Nitsch, Andy Rose, Lars Svensson, Linda Tesar, Eric van Wincoop, and John Williamson. Other colleagues and friends also gave advice regarding both presentation and empirical strategies, and we thank Steven Block, Eric Edmonds, James Feyrer, Jeff Frieden, Linda Goldberg, Matt Kahn, Doug Irwin, Chris Meissner, Nina Pavcnik, and Doug Staiger. Of course, in thanking all these people we do not mean to implicate them for any shortcomings in this book.

Jane Macdonald at the MIT Press has been a wonderful guide through the process of getting this book to publication, and we thank her, the marketing staff, and production team for their efforts. In addition five anonymous reviewers gave us very useful feedback on an initial draft of the book.

We thank our teachers at various stages of our own academic careers for their guidance and support in helping us explore our intellectual interests, and for teaching us how to develop our ideas and share them with the world. In particular, we would like to thank Maury Obstfeld. Maury was the dissertation advisor to each of us, albeit at two different times and on two different coasts of the United States. We both greatly value his mentoring and friendship over the years.

Most of all, we thank our families for their encouragement, support, and patience as we crafted this manuscript. Parents, siblings, spouses, and children have all played essential roles in helping us reach the point where we could write this book, and in providing the time and encouragement for us to complete it.
