

## Index

- Access stage (retrieval), 383
- Acetylcholine (ACh), 64–65, 79–81, 116, 258, 267
- Acetylcholine receptors (AChRs), 65
- Action potentials, 46
- Active and inactive memories, 35–36
- Acts without Words I* (Beckett), 327–328
- Addis, Donna Rose, 245, 279, 283
- Adrenaline (epinephrine), 18, 176, 233–234
- Aesthetic Autobiography: From Life to Art in Marcel Proust, James Joyce, Virginia Woolf and Anaïs Nin* (Nalbantian), 271n2
- Aesthetics, 339, 351. *See also* Art; Musical form
- Aizawa, Kenneth, 208–209, 214n34
- Alberti, Leon Battista, 349
- Alpha-calcium-calmodulin kinase II ( $\alpha$ CaMKII), 44
- Altenmuller, Eckhart, 386–387
- Alvarez, Pablo, 17
- Alzheimer's disease, 316
- acetylcholine receptors and, 65
  - brain images, 120f, 121f
  - clinical features, 118–119
  - nature of, 65
  - neurological features, 120f, 121–122, 121f
  - pharmacological treatments, 115–116, 242
- Alzheimer's patients
- autobiographical memory, 218
  - music and, 388–389
- Amaral, David, 146
- Amnesia. *See also* Alzheimer's disease; Anterior communicating artery; HM; Propofol
- anterograde, 221, 240, 247, 396–398, 408 (*see also* Korsakoff's syndrome)
  - in film, 395–398, 402, 406–409
  - retrograde, 102, 140–141, 396, 397–398, 405, 408
  - transient global, 117
- Amygdala, 103, 103f, 104f, 180f, 347. *See also* Lateral amygdala
- central, 156–158, 161
  - connectivity and synaptic mechanisms, 169
  - convergence of conditioned and unconditioned stimulus sensory information in, 158
  - fear memory and, 155
  - lateral nucleus (*see* Lateral amygdala)
  - overview, 155
  - plasticity, 158, 165
  - and processing emotions, 157, 158, 265
  - PTSD and, 233–234
- Amygdala memory trace, 166–167, 169
- Aneurysm of the anterior communicating artery, 221–223
- cognitive features, 222

- Anterior cingulate cortex (ACC), 112
- Anterior communicating artery (ACoA), aneurysm of, 221–223
- Anterior temporal cortex, 134–135
- Apollinaire, Guillaume, 267–268
- Art, 7–8, 258. *See also specific topics*
- mirror theory and, 342
  - neuroscience and, 337–341
  - reinforcing memory, 346
- Artistic creation and memory storage, 66–68. *See also* Autobiographical literature
- As-if body loop, 341
- Associationist psychology, 281, 282
- Associative memory, 261, 262, 405–406
- Associative processing, 260–261
- in REM and NREM sleep, 87, 88f
- Auditory perception, 377. *See also* Musical form; Musical memory
- Auditory processing, local vs. global, 380
- Auditory thalamus, 156
- Austen, Jane, 287–288
- Autobiographical literature, 255–256, 271, 298. *See also* Literary memoirs
- episodic memory and, 10, 258, 297
  - labiality of memory and, 266–270
  - memory as approximation and, 270–271
  - stability of memory and, 257–262
  - variability of memory and, 262–266
- Autobiographical memory, 218–220, 235–236, 243, 323, 325
- music and, 382–383, 385–386, 389
- Autobiographical memory syndrome (hyperthymestic syndrome), 243–245
- Autonoetic awareness, 5
- Baars, Bernard, 4, 63, 319
- Bach, Johann Sebastian, 361, 362–364, 362f
- Baddeley, Alan, 14, 109, 378
- Baddeley-Hitch model, 14
- Bain, Alexander, 30–31
- Bartlett, Frederic, 129, 322
- Basal forebrain lesions, 229
- Basolateral amygdala, 157
- Battaglia, Fortunato, 350
- Bechtel, William, 200, 205, 207
- Beckett, Samuel, 315–316, 328
- Gerald M. Edelman and, 325, 327, 329–331
- Beethoven, Ludwig van, 359, 362, 364, 368–370, 372, 374
- Fifth Symphony, 361, 365, 366, 367f, 372, 373f
  - sense of time and memory, 364–368
- Bergson, Henri, 12–13
- Berthoz, Alain, 262
- Bickle, John, 4–5
- Blade Runner* (film), 402
- Bliss, Timothy, 17, 211
- Block, Ned, 207
- Bodily movement. *See* Gestures; Movement and memory
- Body-based memory, 259, 327, 346, 352
- Bonhoeffer, Karl, 217
- Bonnefoy, Yves, 66
- Borges, Jorge Luis, 23, 38, 122–123, 270–271
- Bourdieu, Pierre, 61
- Bourne Identity, The* (film), 407–408
- Bourne Ultimatum, The* (film), 408, 410
- Bower, Gordon H., 386
- Brain
- architecture, 8–10, 56, 130
  - as intentional organ, 68
- Brain injury and specific memory deficits, 100–102
- Brain organization. *See also* Epigenetic variability and brain complexity
- variability, 57–58
- Brainstorm* (film), 403
- Brain surface anatomy, 9, 11f
- Breton, André, 267–270

- Broca, Pierre Paul, 109
- Brock, Timothy, 289
- Bruner, Jerome, 315
- Bruno, Giordano, 316–317
- Buckner, Randy, 281, 283
- Burkholder, J. Peter, 373
- “Butterflies” (Nabokov), 308
- Calvo-Merino, Beatriz, 351–352
- cAMP-response element-binding protein (CREB), 45–49, 160, 208–210
- CREB protein “switch,” 19
- drugs targeting, 242, 243
- ERK and, 160
- nature of, 204
- protein kinase A (PKA) and, 208, 209
- Cancrizans*, 364, 365
- Candidate memories, heuristic vs. systematic checking of, 228
- Canons (music), 360–361
- Capgras syndrome, 5
- Carroll, Daniel, 281
- Catastrophic interference, 145, 146, 147
- Cerebral cortex, microanatomy of, 130, 131f
- Changeux, Jean-Pierre, 4, 20, 58–60, 61–63, 258, 267–268, 339
- Cholinergic hypothesis, 64–65
- Churchland, Patricia, 195–199
- Churchland, Paul, 196, 197
- Cities of the Interior* (Nin), 264
- Cognitive map theory, 107
- Cold Spring Harbor Laboratory, vii, 92
- Coleridge, Samuel Taylor, 278, 282–284
- Collingwood, R. G., 340
- Commemoration and precision in Nabokov, 301–310
- Complementary learning systems, cooperation of
- in memory for meaningful materials, 144
  - in repeated recall of an initially unfamiliar story, 144–145
- Complementary learning systems theory, 130, 141–145
- neuroscientific evidence and the tenets of, 146–147
  - questions for, 145–149
  - schematic diagram of network underlying, 137, 138f
  - “Conclusive evidence,” 309
- Conclusive Evidence* (Nabokov), 301–303, 307. *See also* *Speak, Memory*
- Concord Sonata (Ives), 372–373, 373f, 374
- Confabulation, 173, 217–218, 230–231, 275n42, 321. *See also* Korsakoff’s syndrome
- aneurysm of the anterior communicating artery and, 221–223
  - categories of theories about, 226–227
  - defined, 224
  - diagnostic criteria, 224–225
- Connectionism, 136, 197
- Connectionist systems modeling of memory, 269–270
