Subject Index

- Abstract reasoning, 132–133
- Academic achievement, 87–88
teacher empathy and, 88–89
- Accurate empathy, 57. *See also* Empathic accuracy
benefits and limitations of, 154–156
- Acquaintanceship effect, 64
- Actualizing tendency, 102
organismic influence of, 102–103
- Adolescent adjustment, empathic accuracy in
peer relations and, 63
- Aesthetic empathy, 6, 7
- Affective component of empathy, 153–154.
See also Empathy, components/dimensions
- Affective empathy, 6, 215, 218–220, 226, 227.
See also Emotional contagion; Emotional empathy; Simulation
- Affective mentalizing, 223. *See also* Mentalizing
- Affective resonance, 71, 77, 184, 185, 200, 201.
See also Empathic resonance
- Affective responsiveness, 87
- Affective sharing, 109, 185, 189
- Affinity continuum, 160–161
- Agency, sense of, 206
- Aggression, 86–87. *See also* Anger; Violent husbands
regulation of, 86
- Alexithymia, 160
- Altruistic behavior, 85, 203. *See also* Imitation,
prosocial effects of being imitated
- Altruistic concern, 161
- Altruistic motivation, 9
- Amygdala, 128, 141, 174, 228
cognitive empathy and, 224
conditioning and, 144
emotion representation and, 188
facial expressions and, 140, 141, 174, 201, 207
fear and, 140, 141, 204
and mediation of emotional experiences, 227
morality and, 144
pain and, 77
selective sociality, neuropeptides, and, 178, 179
sex differences and, 179
simulation and, 226, 228
- Analogical reasoning, 209
- Anger, emotional empathic responses to
and reasoning about conventions, 145–146
- Anger-mediated aggressive behavior, 87
- Angry expressions, 141
- Animals. *See also* Evolution
empathy and emotional contagion in, 25, 71, 169
- Anterior attention system, 74
- Anterior cingulate cortex (ACC), 38, 77, 78, 127, 186, 189, 201, 224–227
- Anterior insula, 38, 77, 186, 187, 189, 190, 201, 225. *See also* Insula
- Anterior paracingulate cortex, 141
- Anterior temporal cortex, 128
- Antisocial behavior, 143–144
regulation of, 86

- Anxiety. *See also* Fear
 social, 224, 225 (*see also* Social phobia)
- Appeasement displays, empathic responses to, 147–148
- Appraisal theory, 202
- Approach-avoidance reactions, 176, 177
- “As if” condition, 103, 125, 126
- Asperger syndrome (AS), 219, 224, 225
- Attachment processes, 78–79
- Attentional disengagement, 61
- Attentional resources, 141
- Audience design hypothesis, 47, 52
- Audition and social communication, 172
- Auditory communication, 172
- Auditory mirror neuron systems, 131
- Autism, 26, 60, 146–147, 180, 190–192, 224, 225
- Automatic imitation, 32
- Automatic mimicry, 200
- Automatic/uncontrolled vs. deliberative/
 reflective/controlled empathic reactions, 157
- Automatic vigilance, 113
- Autonomic nervous system (ANS) activity.
See also Evolving autonomic and social
 nervous system
 facial feedback and, 23
- Balanced Emotional Empathy Scale (BEES), 189
- Basal ganglia, 205
- Belief-reasoning errors, 220
- Bilateral insulae, 77
- Bilateral insular cortices, 204
- Bipolar disorder, 145, 224, 225
- Body-oriented perspective. *See* Embodied
 empathy
- Borderline personality disorder (BPD), 61, 224,
 225
- Brain damage and empathic abilities, 217–219.
See also specific regions of brain
- Brow muscle region, 21
- “Burnout,” 156
- Canonical neurons, 24
- Caregiving, interest in, 153
- Caring, 86

See also specific topics
- Empathic resonance, 134. *See also* Affective resonance; Resonating
in psychotherapy, 114–118, 125
- Empathic responding, modulation of, 206–209
- Empathic understanding, 102–104, 109, 119, 134, 155
- Empathic Understanding Responses, 101
- Empathy
as answer to two different questions, 3–4, 8–11
components/dimensions of, 91, 103, 117–118, 133, 153–154 (*see also* Cognitive-affective model of empathy)
conditions for (*see under* Psychotherapy)
consequences of showing, 33–34 (*see also* Imitation)
definitions/uses of the term, 19, 31, 43, 71, 85, 103, 104, 125, 126, 139, 183–185
concept 1: knowing another’s internal state, 4, 8–11
concept 2: adopting the posture/expression of an observed other, 4, 8–10
concept 3: coming to feel as another feels, 5–6, 9–11 (*see also* Emotional contagion)
concept 4: intuiting/projecting oneself into another’s situation, 6, 7, 9, 10
concept 5: imagining how another is thinking/feeling, 7, 9–11
concept 6: imagining how one would think/feel in the other’s place, 7, 9, 10
concept 7: feeling distress at witnessing another’s suffering, 7–11
concept 8: feeling for another who is suffering, 8–11
implications, 8–11
evolutionary history and the capacity for, vii
factors modulating, 132–134
function of, 86–88
levels of, 71
lost in translation, 31–32
measurement of, 105, 189 (*see also* Empathic accuracy measures)
