## Acknowledgments

The foundation for this book came from my doctoral thesis at the Economics Department of the Free University of Berlin. During the work on this manuscript, I was affiliated with the Hamburg Institute of International Economics, where I was a DekaBank Fellow, and Yale University, where I was a Fox International Fellow and Max Kade Scholar. Since I joined the German Development Institute in August 2007, I held visiting positions at Aoyama Gakuin University, Tokyo; the University of Oxford; and the European Central Bank. The research I conducted at these institutions helped me to produce the book that you now hold in your hands.

I am indebted to the generous support and help of a number of people and organizations that supported the research for this book. First, I would like to thank my supervisor Professor Manfred Nitsch from the Free University of Berlin, who granted me a lot of freedom in conducting my research but was always there to guide me and help me order my thoughts. I also thank Professor Ulrich Basseler, my second examiner at the Free University. Professor Koichi Hamada of Yale University almost became a second supervisor, and I owe him a great deal for supporting my research and continually challenging my work and thus helping me to sharpen and refine my thoughts. Special thanks go to Koichi Hamada also for kindly agreeing to write the preface for this book. Moreover I thank my former colleagues at the Hamburg Institute, especially Carsten Hefeker, Katja Michaelowa, Beate Reszat, and Thomas Straubhaar, for their support and advice.

My research benefited a lot from discussions and exchange with friends and colleagues who challenged my methods and ideas or who commented on earlier versions of various parts of this work. In addition to those listed earlier I would like to mention in person Joshua Aizenman, Mumtaz Anwar, Chris Bowdler, Cai Penghong, Giovanni Capannelli, Yin-Wong Cheung, Menzie Chinn, Ethan Chua, Reid Click, Benjamin Cohen, Joshua Felman, Michael Fidora, Marcel Fratzscher, Manabu Fujimura, Yukiko Fukagawa, Dong He, He Fan, Randy Henning, Heiko Hesse, Jean Imbs, Hiro Ito, Masahiro Kawai, Heungchong Kim, Julian Krause, Alexander Kriwoluzky, Inpyo Lee, Guonan Ma, Julie McKay, Robert McCauley, Ronald McKinnon, Arnaud Mehl, Naoko Munataka, Shigeto Nagai, Françoise Nicolas, Volker Nitsch, Eiji Ogawa, Maria Oliva Armengol, Michael

Plummer, Michael Pomerleano, Federico Ravenna, Jimmy Reade, Alvaro Santos Rivera, Waltraud Schelkle, Gunther Schnabl, Lotte Schou-Zibell, Eva Söbbeke, Hyun Song Shin, Christian Thimann, Yunjong Wang, Xu Mingqi, Matthew Yiu, Naoyuki Yoshino, Yu Yongding, Zhang Bin, Zhang Haibing, Zhang Liqing, Zhang Yongsheng, and the late Zhang Jikang. I also received helpful comments and suggestions from numerous other colleagues on presentations that I gave at conferences, workshops, and seminars at the Free University, Yale, Harvard, Oxford, the University of California Santa Cruz, the University of British Columbia, Fudan University Shanghai, the Central University of Finance and Economics, Aoyama Gakuin University, Waseda University, Keio University, University of Barcelona, Trinity College Dublin, Maastricht University, centre ifri Paris, the Asian Development Bank Institute, the Hamburg Institute, the German Development Institute, the European Central Bank, DekaBank Frankfurt, as well as at conferences organized by the Japan Economic Policy Association, the International Economic Association, the American Committee for Asian Economic Studies, the Western Economic Association International, and the Royal Economic Society. I also thank the anonymous referees for MIT Press on detailed suggestions on how to improve the manuscript. For reasons of completeness I should mention that all errors and shortcomings of this study are solely my own fault and that the views expressed in this book do not necessarily reflect those of any institution I was or am affiliated with.

Besides my economic research I tried to learn about East Asian societies and their histories in order to avoid producing a narrow-minded economist's work that fails to live up to the real world. In this context I thank especially Ben Kiernan from whom I learned a lot about the rich history of Southeast Asia. I would in particular like to thank my friend Yuichiro Hirano for tutoring me on the Sinocentric tribute trade system. The many informal discussions and conversations with friends from East Asia—academics, government officials, journalists, students, and “normal” people—about the political and cultural relations between various East Asian countries (especially those between Japan, China, and Korea) and their views on East Asian regionalism helped me to get a feel for and understand (or at least think to understand) what is happening in East Asia these days. Some of these thoughts made their way into the last chapter of this book and my thanks go to all who shared their time and thoughts on this topic with me.

My research was made possible through the generous financial support of scholarships of the German Merit Foundation (*Studienstiftung des Deutschen Volkes*); the German Academic Exchange Service (DAAD); DekaBank, Frankfurt; the Fox International Fellowship at Yale University; the Max Kade Foundation, New York; and the Japan Society for the Promotion of Science. I received conference grants from Yale University, HWWA, DekaBank, and the Royal Economic Society. I hope these organizations will feel that their money was not completely wasted. Whether or not, I thank them for their support, without which I could not have sustained my research. Moreover I thank Shahnaz Khalil-Khan, Jenny Plaul, Andrei Popovici, Maja Rode, and Wendy Soh, each of whom has proofread

bits and pieces of the manuscript. Johanna Danielson, Björn Dransfeld, Denise Hassenklöver, Jenny Heithaus, Florian Mölders, Maja Rode, Oliver Schweinzger, and Lars Vogel at times also facilitated my work by providing valuable research assistance. Larisa Satara, the Director of the Fox Fellowship Program, helped me to make the most of my time at Yale. Thanks to all of them. I would also like to thank Jane MacDonald, my editor at MIT Press, for her encouragement and dedication to this project.

It goes without saying that the work on such a project cannot be sustained without the love and moral support of friends and family. Sebastian, Julian, Eva, Tristan, Richard, Flo, Alex, Justine, Kalyan, and many others (who will please forgive me for not listing them) gave me encouragement, love, and strength. My brother Peter and his girls Shahnaz, Isfahan, and Hanan comforted me whenever I needed it, and my deep-felt gratitude goes to them. But more than anyone else, I would like to express my deepest gratitude to my parents for their never-ending love and support. I dedicate this book to them.

Berlin, May 2009
