Index

- Acquired preparedness, 309
- Addiction
 - abstinent, 397, 402
 - additional disorders and, 169
 - adolescence and, 31, 41
 - altruism and, 191
 - animal models of, 56
 - behavioral, 27
 - behavioral economics of, 143
 - behavioral inhibition and, 272
 - behavioral vs. neural, x
 - behavioral therapies and, 170
 - choice and, 4, 171–173, 178, 183, 185, 207
 - as a chronic or relapsing disease, 163–165
 - circuit models of, 367
 - commonsense notion of, 357
 - comorbidities and, 360
 - cost of, 1
 - cravings as a definition of, 397, 399, 401
 - cultural organizing principle, viii
 - definition of, 409, 410, 412, 413, 415
 - diagnostic criteria for pathological gambling and, 377–379, 388
 - disease model of, viii, 354, 358, 364, 429
 - DSM categorization and, 357
 - economic models of, 131, 133, 145
 - etiology of, 291
 - executive functions and, 9, 13–14
 - expected utility maximization account of, 133
 - gambling, 140, 141, 143
 - genetics of, 53, 69, 74, 78, 368
 - genetic vulnerability to, x
 - heroin, 400
 - hijacking of reward system and, 139
 - impulsive system and, 3
 - interaction of brain systems and, 2
 - irrational action and, 391
 - as a latent property of the rules of choice, 159
 - medical models of, 353–358, 361, 364, 368, 372
 - J. S. Mill and the concept of, 414, 423
 - molecular vulnerabilities to, 364
 - multispectrum disorder, 111
 - natural science approach to, 159
 - neural signature of, 135, 139, 140
 - neural systems hypothesis and, 5
 - neurobiological model and, 361–363, 367, 369
 - neuroeconomics of, 137, 142
 - neuroscience research on, 269, 270
 - nicotine, 391
 - onset of, 365, 371
 - pathological gambling and, 27, 34
 - pathological gambling as primary form of, 131–132, 148, 149, 150, 152
 - pathology of discounting and, 149
 - pharmacotherapies and, 170
 - picoeconomic models of, 146, 148
 - prohibition and, 428
 - public policy and, xi, 428
 - public policy debates and abuse of the concept of, 411
 - rates of, 168
 - recovery from, 272, 281–282
 - reward system and, 396, 399

- Addiction (cont.)
 - social vs. biomedical, viii
 - social factors in, 368
 - social role theory and, x
 - steady state of, 138
 - susceptibility to, 112–113
 - thresholds for and variance across
 - individuals, 365
 - time course of, 160, 185
 - tobacco and, viii, 112
 - unitary phenomenon of, ix–x
 - values and, 425
 - voluntary drug use and, 162
 - vulnerability to and decision making, 99–101, 105, 113–114
- Addictive drugs, 173, 180–181, 184, 186
 - legal, 167
- Agency
 - the formation of rules and, 146
 - of pathological gambling, 131
 - unified vs. divided, 134
- Alcohol, 6, 137, 139, 167, 185
 - addiction to, 113
 - cues, 313–315, 317–318
 - expectancies, 311–319
 - genetic variation affecting the pharmacodynamics of, 70
 - genetic variation and the pharmacokinetics of, 67
 - implicit memory processes and, 313
 - k*-value and, 249, 250
 - pathological gambling and dependence on, 336, 337, 338
 - placebo effects and, 292, 319
 - priming, 317
 - primrose path model and, 195
 - psychoactive effects of, 70
- Alcoholics Anonymous, xi, 113, 170, 183, 186, 342, 370
- Alcoholism, 31, 34, 37, 40, 41, 53, 179
 - diagnosis of, 61
 - evidence of polygenic genetic influences on, 54–56
 - expectancy theory and, 293
 - familial history and, 33, 54–55, 64, 71
 - familial rituals and, 369
 - genetic influences on, 53–54, 56, 59–62, 70, 73, 74–76, 78, 368
 - intermediate phenotype approach to the genetics of, 60
 - opportunity cost and, 132
 - risk of, 57, 63, 69, 71, 76, 311
 - vulnerability to, 61
- ALDH2, 62, 67–68, 73, 77, 310–311
- Allostasis, 293
- Altruism, 11
 - addiction and, 191
 - definition of, 193
 - self-control and, 195, 197–198, 200
 - social cooperation and, 194–195
 - social discounting measures of, 200
- Amygdala, 2–3, 31, 65, 139, 363, 366, 369
- Animal model of addiction, 54–56, 79
- Anticipation/prediction, 101–104, 107, 216, 218, 225, 232, 253, 292–297, 303–304, 306–307, 309, 312–319
- Assessment
 - implicit, 312–313, 316, 320
 - instruments of, 382
 - risk/benefit, 30
- Bed nucleus of the stria terminalis (BNST), 363
- Beta–delta discounting (see Quasi-hyperbolic discounting), 145–147
- Blood-oxygen-level dependent (BOLD) signal, 360
- Choice
 - and addiction, 4, 171–173, 178, 183, 185, 207
 - addictive, 105, 111
 - addictive behavior, defections and, 197
 - bundling, 260
 - categorical, 253
 - change in situations and, 109

- competing processes of, 359
- cooperation and, 192
- costs associated with, 100
- as a description of addiction, 159, 162, 169, 171
- desires as revealed by, 392
- discrete, 234
- disposition to bundle, 247, 251–252
- distributions, 182, 185
- drug-related, 110
- executive system and, 4
- freedom of, 413–414, 420–421, 424, 426, 427
- future, 103, 211, 217, 252–253, 255
- gambling and incorrect, 99
- groupings of, 261
- healthy and unhealthy, 1, 148
- human and nonhuman, 230–231
- hyperbolic discounting and, 219, 222, 233, 252–253
- hypothetical, 271
- immoral, 420
- impulsivity and, 211, 213–215, 217, 251–253, 259
- initial impulsive, 256
- nonimpulsive, 260
- paradigms of, 100
- preference reversal and, 229
- rational, 213, 233–234, 270
- self-controlled individuals and, 5
- self-prediction and, 253
- temporal pattern of, 175
- temptation as a, 147
- theory of rational, 211, 213
- Choices as precedents, 148, 254
- Cigarette smoking, 269, 274–275, 277, 279–281
- Classical conditioning paradigms, 214–216, 218
- Cocaine, viii, 4–6, 33, 35–37, 41, 70, 108, 113, 137, 159, 168, 358, 361, 365
 - animals, experiments and, 112
 - brain signatures and addicts of, 132
 - dopamine, reward system and, 396
 - neuroeconomic model of addiction to, 142
 - receptor sites and, 184
 - recovery in rats and use of, 138
- Cognitive
 - behavioral therapy, 342
 - bundling, 260
 - control, 270, 280
 - framing (or distorted cognition, or perspective phenomenon), 211, 214, 229–230, 232–237
 - gambling behavior, 388
 - impairment, 309–310
 - improvement from alcohol use, 309
 - map, 102, 231
 - processing, 280, 317
 - psychology, 258, 304, 314
 - strategies, 344
 - tasks, 273–274, 305
- Commitment, 271
 - cognitive games and, 232
 - to liberal values, 421–422, 426
 - soft, 206
 - tactics in children, 230
- Conditioned
 - craving (or conditioning, or craving, or conditioned appetite), 214–215, 217–218, 222, 224–225, 237, 310, 321, 402
 - reinforcer, 248, 253
 - responses, 214, 269, 272, 310, 321
 - stimuli, 214, 236
 - withdrawal, 269
- Cooperation, 10, 192, 195, 197
 - altruism and social, 194, 198
 - self-control and social, 201, 205–207
 - social, 195, 203–204
- Cravings, x, 27, 65–66, 397–403
 - abstinent addicts and, 398
 - alcohol, 66
 - cocaine, 36, 273
 - conditioned, 224
 - as constituting addiction, 397, 399, 401

- Cravings (cont.)
 - cues and, 140
 - cue-conditioned, 402
 - cue-elicited, 41, 107, 216–217, 219
 - differential, 280, 281
 - expectancy of reward and, 107
 - expectations and, 281
 - interpretation of, 401–402
 - relapse and, 112
 - suppressing of, 273–274
 - temporary, 213
 - underestimation of future, 147
 - withdrawal and, 138
- Decision making
 - anomalies in, 273
 - breakdown in, 99–101, 104, 113–114
 - gambling and, 29, 37
 - impulsive, 30
 - mathematical models of games and, 298
 - prefrontal cortex and, 359
 - risky, 5, 360
 - as stochastic, 306
 - taxonomy of systems of, 105
 - ventromedial prefrontal cortex and, 4
 - voluntary control of addictive behavior and, 270–271
- Delay discounting, 37–38, 200–201, 247
- Development
 - of addiction, 3
 - adolescence, 30
 - age and behavior, 2, 8
 - of alcoholism, 66, 75
 - of behaviors incompatible with gambling, 344
 - brain, 5, 9, 10
 - of executive function, 12, 14
 - of gambling, 39, 337
 - impulsive behaviors and, 8
 - of language, 293
 - memory and cortical, 304–305
 - in pattern of discounting, 7
 - social network, 342
 - of treatment, 335
- Diagnostic criteria for pathological gambling, 377–379, 382, 384
- Discounting
 - addiction as a pathology of, 149
 - adolescence and, 7
 - age and, 7–8
 - altruism and social, 200–201
 - brain regions and, 8
 - deficits in processes of, 110
 - delay, 37–38, 339–340, 343–344
 - developmental pattern and, 7
 - differences in, 73
 - executive control and, 9
 - experiential task, 249, 254
 - exponential, 214, 218, 220–221, 236, 237, 248
 - high rate of temporal, 5, 7–8
 - hyperbolic intertemporal, 143–146, 148–150, 152, 180, 213, 216–219, 222, 229, 232–237, 247, 249–250, 253–254, 257–258
 - hyperconcave, 216, 221, 234
 - overfast processes of, 105
 - probabilistic, 203
 - prospection and, 11
 - subadditive, 233–234, 236
 - temporal, 5
 - theory of conditioning and exponential, 220
- Dopamine, 3–4, 30, 32, 57, 66, 70, 73, 108, 393, 395
 - concentration in NAcc, 139
 - receptors, 250, 364
 - reuptake of, 362
 - signals, 104, 107, 135, 142, 152, 362, 366, 396
 - system, 136, 140, 142, 148, 150–151, 250, 371–372, 396
- Dopamine circuit, 33, 152. *See also* Reward system, neural
- Dopamine neurons, 269, 361, 363–366
