  - market for distressed, 173–80
  - prices and liquidity premia, 90–93
  - short-term and long-term, 172–74
- Banking, shadow, 232–35
  - panic and, 235–38
  - regulatory weaknesses and, 238–41
- Bonds
  - government, 122–24
  - liquidity premia and, 89–90
  - spreads, corporate, 80–81, 90
  - state-contingent, 124–27
  - superiority of contingent over noncontingent bonds, 124–27
- Boom–bust cycles 76–77
- Borrowing, net
  - aggregate shocks and, 68–69
  - independent shocks and, 69–72
- Bubble, 4, 232
- Clearing House Inter-bank Payment System (CHIPS), 235
- Collateral. *See also* Liquidity
  - constraint, 102–103
  - definition, 7
  - efficient use of, 234–35
  - government supplied, 117
  - housing and, 86–87
  - international, 146–50, 152–54, 160–63
  - repo and, 234
  - shortage of, 67, 88, 239
  - subprime crisis and, 234–35, 239
  - tail risk and, 128
- Comparative advantage, government’s, 125–27
- Conglomerates, 45
- Constrained efficient equilibrium, 103, 113–14
- Consumers
  - competition with firms, 81–84
  - liquidity demand, 44, 49–59
  - optimal public supply of liquidity with risk averse, 129–31
  - reinterpreting firms using Diamond–Dybvig model of, 55–59
- Contingent bonds, 124–27
- Contrarian firms, 91, 96
- Corporate bond spreads, 80–81, 90
- Countercyclical policy, 121
- Covenants, loan, 22
- Credit default swaps (CDS), 34, 63
- Credit lines, 34–36, 161–62
- Credit rationing, 15–18
  - second-best solution and, 39
- Cross-subsidies, 57–58
- “Dead capital,” 5
- Development, financial market, 86–88
- Diamond–Dybvig model, 44, 49–50
  - consumer liquidity demand, 52–53, 81–84
  - reinterpreting firms as consumers using, 55–59
- Distressed assets market, 173–80
- Diversification, 21
- Diversion, second-best contracts and, 45–49
- Dollar goods, 146–47
- Effective unit cost of investment, 74–75
- Efficiency, constrained, 103, 113–14
- Employment, 132–34

- Endogenous supply of liquidity, 84
- Entrepreneurial rents, 16–18
- Equilibrium  
 existence, 110–13  
 general case, 96–104  
 high-price, high-production, 136–37  
 long-maturity, high-liquidity,  
   high-employment, 133–34
