Index

- Adjusted factor price equalization, 38–39
- Aggregation problem, viii, 46–56
proof of proposition 1.2, 123–24
- Aghion, Philippe, 106
- Amiti, Mary, 43, 44
- Antràs, Pol, 7–8, 8
- Argentina, depression in, 92
- Austria, unemployment impact of offshoring in, 91
- Autor, David, 27, 30
- Baldwin, Robert, 47
- Baldwin regression, 47, 50, 52, 55, 56
- Ball, Larry, 75–76
- Bergin, Paul, 61, 74, 78, 124
- Berman, Eli, 13
- Bhagwati, Jagdish, 13, 30, 59
- Blinder, Alan, 91
- Blomstrom, Magnus, 43
- Borjas, George, 13
- Bound, John, 13
- Brazil, depression in, 92
- Buch, Claudia, 61
- Bureau of Labor Statistics (BLS)
export price index from, 94
import price deflators of, 96
import price indexes from, 95
Laspeyres price index formula of, 95, 98 (*see also* Laspeyres price index)
terms-of-trade index from, 97
- Business cycle volatility, viii, 59, 61–75, 103
- California, offshoring industries
volatility in, 67, 70, 71, 72
- CES demand, 76
- CES expenditure function, 77
- CES preferences, 63
assumption of, 60
- CES production function, 110–11
- CES technologies, 46
- Chile, depression in, 92
- China
in competition with Mexico for US market, 80–83
as deflation exporter, 75
and exchange rate pass-through to US prices, 60
and global prices, 76
and multilateral exchange rate, 83–90
as offshoring source, 103

- Choice of effort, endogenous, 110–18
- Common elasticities of substitution. *See at* CES
- Comparative advantage
kaleidoscopic (Bhagwati), 59
and offshoring model, 101, 102
- Computer use and investment, 12, 26, 45, 57n.7
and productivity statistics (Solow), 94
- Costinot, Arnaud, 108–109
- Covariance, between offshoring margin and world demand (offshoring model), 65
- Deardorff, Alan, 46
- Deflation, as imported to Japan from China, 75
- Delphi (US manufacturer), Mexican plant turnover of, 71
- Demand shocks, 61–62, 65, 74
- Denmark, unemployment impact of offshoring in, 91
- Depressions
Great Depressions, University of Minnesota project on, 91–92
modern-day, 91–93
- Diewert, Erwin, 93
- Domestic outsourcing, 5
- Easterly, William, 61
- Employment
decrease in (early 1980s and 2000s), 105–106
factors determining (offshoring model), 64–65
impact of offshoring vs. technological change on, 31
impact of service offshoring on, 44
of low-skilled labor, 37
of nonproduction/production workers, 10–11, 12, 30, 31, 104
of nonproduction workers, 12
and offshoring, 45
for production workers in Mexican and US offshoring industries, 67, 68–70
of skilled workers, 3, 11
after 2000, 104–106
- Endogenous choice of effort, 110–18
- Equilibrium, high- vs. low- vs. zero-effort, 114–18
proof of propositions 3.1 and 3.2, 124–27
- Europe, offshoring between West and East in, 74–75
- Exchange rate(s), viii, 60
with China, 81, 83
with Mexico, 81
- Exchange rate pass-through
and imports from China, 60, 80, 83, 103
multilateral, 83–90
- Expenditure function, reduced form, 77–79
proof of proposition 2.1, 124
- Factor bias of technological change, vs. sector bias, 14–18
- Factor content of trade, viii, 4, 46–56
proof of proposition 1.2, 123–24
- Factor price equalization, adjusted, 38–39
- Factor prices
impact of offshoring or skill-biased technological change on, 25–26
as motive force for offshoring, 102
Stolper–Samuelson theorem on, 3, 16
- Federal Reserve Bank
researchers at, 80
2006 meeting of (Jackson Hole), 36

- Feenstra, Robert C., 8, 19, 23, 44, 61
 and factor prices, 25
 and GDP, 93, 96–98
 and mandated wage structure, 24
 on mismeasurement of terms of trade, 93–94, 96
 and ownership structure, 9
 and real wages, 28
 on reduced-form expenditure function (proposition 2.1), 78, 124
 and skill-biased technological change, 40
 and “tasks” vs. “activities,” 32
 and volatility of Mexican *maquiladoras*, 74
- Finland, depression in, 92
- Foreign outsourcing, 5, 6, 8
- Foreign outsourcing model, 8. *See also* Offshoring model of Feenstra and Hanson
- Fragmentation, 1–2, 37, 96
- Friedman, Milton, 60, 75
- GDI (gross domestic income), 93
- GDP, nominal vs. real, 92–93
 and price deflator, 93, 97–98

 and inflation, 75–76, 90
 and price–exchange rate relationship, 60
 and productivity, 103
 technology spread through, 2
- Golden age of trade, first, 1, 119
- Golden age of trade, second, 1–2, 119
- Great Depressions, and University of Minnesota project, 91–92
- Grossman, Gene, viii, 6
- Grossman–Rossi–Hansberg model, viii, 8–9, 32, 42, 102–103
 and definition of “offshoring,” 6
 and factor bias, 18
 and free trade equilibrium, 121
 and labor-supply effect, 40
 and low-skilled wages, 34, 37
 and offshoring costs across sectors, 33
 and productivity effect, 38, 104
 and “trade in tasks,” 4
 and wages of nonproduction workers, 41
- Hanson, Gordon, viii, 3, 8, 19, 23, 44, 61, 101. *See also* Offshoring model of Feenstra and Hanson
 and factor prices, 25
 and mandated wage equation, 24
 and ownership structure, 9
 and real wages, 28, 36
 and skill-biased technological change, 40
 and “tasks” vs. “activities,” 32
 and volatility in Mexican *maquiladoras*, 74
- Hart, Oliver D., 6
- Heckscher, Eli, 1
- Heckscher–Ohlin (HO) model, vii, viii, 2, 4–5
 and Baldwin regression, 47
 and detailed factor requirements, 51
 factor content calculations from (Krugman), 17
 and factor requirements, 50
 Feenstra–Hanson specification of, 3, 19–23, 101
 and Krugman–Leamer debate, 3
 and Leamer on workers’ choice of effort, 110
 and shift toward skilled workers, 13
