Foreword by Raymond S. Nickerson xv  
Preface xix  
Acknowledgments xxiii

## I Building Memory Representations 1

I.1 Introduction to Part I 3  
I.2 Levels of Scientific Inquiry 3  
I.3 Mathematical Models and the Study of Memory 5  
    I.3.1 Some Features of a Good Model 6  
    I.3.2 Scientific Hypotheses and Models Are  
        Approximations 8  
I.4 Organization of Part I 8

## 1 Habituation and Sensitization 11

1.1 Overview of the Chapter 11  
1.2 Introduction 11  
    1.2.1 Distinguishing Habituation from Other Phenomena 12  
1.3 Habituation and Sensitization Effects 14  
    1.3.1 Groves-Thompson Model 18  
1.4 Neural Model for Habituation/Sensitization 20  
    1.4.1 Basic Neuron Anatomy 20  
    1.4.2 Kandel's Model for Habituation/Sensitization 23  
1.5 The Curious Case of the *Stentor* 28  
1.6 System Model for Habituation and Sensitization 29  
1.7 A Mathematical Representation for  $\zeta_k$  31  
    1.7.1 Fundamental Habituation Model 31  
    1.7.2 Fundamental Sensitization Model 35

1.7.3	Spontaneous Recovery Model	35
1.7.4	The Strength Threshold	37
1.7.5	The Effect of Similarity	38
1.7.6	Emotional State	39
1.7.7	Differences with Other Models	40
1.8	Summarizing Nonassociative Memory	41
<b>2</b>	<b>Associative Conditioning</b>	<b>45</b>
2.1	Overview of the Chapter	45
2.2	Elementary Conditioning Definitions	46
2.2.1	Classical Conditioning: Operations and Terminology	46
2.2.2	Operant Conditioning: Operations and Terminology	49
2.3	The Information-Theory Challenge	51
2.3.1	Blocking Effect	51
2.3.2	Zero-Contingency Effect	52
2.4	Rescorla-Wagner Model	52
2.4.1	Problems with the Rescorla-Wagner Model	54
2.5	How Cognitive Is Pavlovian Conditioning?	59
2.5.1	The Temporal-Learning Hypothesis	59
2.5.2	Issue of Awareness for Pavlovian Conditioning	60
2.5.3	Pavlovian Conditioning and General Anesthesia	61
2.5.4	Critique of Research on Subliminal Conditioning	64
2.5.5	Can Postacquisition Conditioning Become Unconscious?	70
2.6	Pavlovian and Instrumental Comparisons	74
2.7	Concluding Comment and Chapter Summary	82
<b>3</b>	<b>Memory: Biology to Cognition</b>	<b>85</b>
3.1	Overview of the Chapter	85
3.2	The Biological Factors of Trace Storage	85
3.2.1	Specialized Computations	86
3.2.2	Memory and the Hippocampus	88
3.2.3	Retrograde Amnesia	92
3.2.4	Long-Term Potentiation (LTP) and Depression (LTD)	93
3.2.5	Memory and Neurogenesis	95

3.3	Emerging Cognitive Theories of Forgetting	95
3.3.1	Atkinson-Shiffrin Model and Working Memory	96
3.3.2	Forgetting for the SAM and REM Models	102
3.3.3	Consolidation Theory: Early Form	103
3.3.4	Classical Interference Theory	105
3.3.5	Consolidation Theory Revival	109
3.3.6	Reconsolidation Theory	113
3.3.7	Two-Trace Hazard Model	115
3.4	Memory Types	118
3.5	Chapter Summary	124
<b>4</b>	<b>Information-Processing Framework</b>	<b>127</b>
4.1	Chapter Overview	127
4.2	Propositional Encoding	127
4.2.1	Framework for Propositions and Concepts	128
4.3	Temporal/Feature-Binding Memory Framework	134
4.4	Syntactic-Pattern Recognition	136
4.4.1	Is Visual-Pattern Memory a Feature-Space Model?	136
4.4.2	A Divergent Approach: Syntactic-Pattern Recognition	137
4.4.3	Is There Merit to Syntactic-Pattern Recognition?	138
4.5	How Much Is Remembered?	144
4.6	Memory Is Encoded Information	150
4.7	Summary of Chapter	151
<b>5</b>	<b>Memory: Myths and Truths</b>	<b>153</b>
5.1	Chapter Overview	153
5.2	A Few Misconceptions about Memory	153
5.2.1	Myth of Static Memory	153
5.2.2	Myth of the Recovery of Lost Information via Hypnosis	154
5.2.3	The Myth of Videotape Memory	157
5.2.4	The Penfield Hypothesis of Recovered Memories	162
5.2.5	Myth of Permanent Memory	163
5.3	Content-Addressable Memory	170
5.4	Overview of Part I	177

<b>II</b>	<b>The Measurement of Memory</b>	<b>179</b>
	Introduction to Part II	181
<b>6</b>	<b>Historical Lessons</b>	<b>183</b>
6.1	Chapter Overview	183
6.2	Introduction to Physical Measurement	183
6.3	Brief History of Temperature Measurement	184
6.4	Measurement Approaches Not Taken	187
6.4.1	Multiple-Item Test Theory	187
6.4.2	Magnitude Estimation	189
6.4.3	Abstract Measurement Theory	191
6.4.4	Unsuitability of Experimental Double Disassociation	192
6.5	Rationale for Model-Based Measurement	196
6.6	Chapter Summary	199
<b>7</b>	<b>Measuring Storage and Retrieval</b>	<b>201</b>
7.1	Chapter Overview	201
7.2	Introduction to Storage-Retrieval Measurement	201
7.3	Chechile and Meyer (1976) Task	202
7.4	Recall Tests: Defining Storage and Retrieval	204
7.4.1	Defining Sufficient Storage as a Probability Mixture Rate	204
7.4.2	Defining Retrieval for the Recall Task	205
7.5	Storage-Retrieval Separation	207
7.5.1	Issues for Proper Recognition Protocols	207
7.5.2	Generic Recognition Trees for the Chechile-Meyer Task	209
7.5.3	Chechile (2004) Models	211
7.6	Example: Letter-Shadowing Experiment	216
7.6.1	Introduction and Method of Experiment	216
7.6.2	Overall Categorical Data and Confidence Analysis	217
7.6.3	Is the 6P Model Applicable?	218
7.6.4	Model 7B versus Chechile and Meyer (1976) Model 3	218
7.6.5	Individual Differences and Further Model 7B Analyses	219
7.6.6	Statistical Issues for Model Estimation	222
7.6.7	Discussion of the Letter-Shadowing Condition	225

7.7	Validation Studies for the 6P and 7B Models	226
7.7.1	Independent Latent Measures	226
7.7.2	Search Time Study	228
7.7.3	Acoustic Similarity Effect	229
7.7.4	Paired-Associate Learning	232
7.7.5	Monetary Incentives and Guessing	234
7.8	Population Differences for Storage and Retrieval	236
7.8.1	Developmental Changes in Memory	236
7.8.2	Memory Deficits and Developmental Dyslexia	237
7.8.3	Memory Assessment of Intellectually Disabled Adults	240
7.8.4	Dynamic Memory Changes with Korsakoff Patients	242
7.8.5	Drug Effects beyond State Dependency	245
7.9	Storage and Retrieval for Recall-Based Tasks	248
7.9.1	The Greeno et al. (1978) Model	248
7.9.2	The Roudier and Batchelder (1998) Model	250
7.9.3	The Batchelder and Riefer (1980) Model	254
7.10	General Discussion and Summary	255
	Appendix: Multinomial-Processing Tree (MPT) Models	256
<b>8</b>	<b>What Does Memory Strength Mean?</b>	<b>261</b>
8.1	Chapter Overview	261
8.2	The Problem of Measuring Memory Strength	261
8.3	The Basic Signal-Detection Representation	263
8.4	The Problem with Defining Strength	270
8.5	The Problem of Target-Foil Similarity	276
8.6	The Problem of the Mirror Effect	279
8.7	The Problem of Foil Mixtures	281
8.8	The Problem of Ambiguous ROC Data	288
8.9	Summary Remarks about Memory Strength	290
<b>9</b>	<b>Storage-Retrieval: Animal Model</b>	<b>293</b>
9.1	Chapter Overview	293
9.2	Storage-Retrieval Measurement for Animals	293
9.3	Validation Studies for the Animal Model	301
9.3.1	Encoding Level	301
9.3.2	Retention Interval Effect	302

9.4	Chapter Summary and Discussion	303
	Appendix: Parameter Estimates for the Animal Model	304
<b>10</b>	<b>Implicit-Explicit Separation</b>	<b>307</b>
10.1	Chapter Overview	307
10.2	Implicit-Explicit Storage Measurement	307
10.3	The Extended Process-Dissociation Model	308
10.4	Extended Process-Dissociation Critique	311
10.5	The IES Model	313
10.6	Validation Evidence for the IES Model	320
	10.6.1 Encoding Time Study	320
	10.6.2 Divided Viewing	321
	10.6.3 Effect of Retention Interval	323
10.7	Summary: Explicit-Implicit Memory Measures	325
10.8	Summary for Part II	325
<b>III</b>	<b>Factors Affecting Encoding Quality</b>	<b>329</b>
	Introduction to Part III	331
<b>11</b>	<b>Repetition Effects</b>	<b>333</b>
11.1	Chapter Overview	333
11.2	The Learning Curve	333
11.3	Is Learning Incremental or All-or-None?	334
	11.3.1 The Problem	334
	11.3.2 Continuity Theory or Incremental Strength Theory	334
	11.3.3 All-or-None Theory	338
	11.3.4 The Debate	339
	11.3.5 Dynamic Encoding-Forgetting (DEF) Model	342
11.4	Is Total Study Time Sufficient?	352
	11.4.1 Presentation Time and List Length Trade-off	352
	11.4.2 The Murdock (1960) Learning Function	353
	11.4.3 Hazard Functions for Learning	354
	11.4.4 Total-Time Hypothesis and Its Disconfirmation	359
11.5	Testing Effects	361
11.6	Effect of Spacing	366
11.7	Summary of Repetition Effects	372

**12 Encoding and Context Factors 375**

- 12.1 Chapter Overview 375
- 12.2 Meaningfulness and Ease of Encoding 375
- 12.3 Levels of Processing 377
- 12.4 Contextual Factors 381
  - 12.4.1 Transfer-Appropriate Processing 381
  - 12.4.2 Stimulus Generalization and Encoding Specificity 383
  - 12.4.3 The Effects of the Incidental Context 388
  - 12.4.4 Music-Dependent Memory 390
  - 12.4.5 Drug State-Dependent Context 391
- 12.5 Chapter Summary 392

**13 Generation and Elaboration 395**

- 13.1 Chapter Overview 395
- 13.2 The Effect of Generative Encoding 395
  - 13.2.1 The Contours of a Phenomenon 395
  - 13.2.2 Explaining the Generation Effect 402
- 13.3 Other Generation-Like Encoding Effects 411
  - 13.3.1 Aha Effect 411
  - 13.3.2 Self-Choice Effect 412
- 13.4 Generative Learning in Education 416
- 13.5 The Enactment Effect 418
- 13.6 Distinctiveness and the Production Effect 422
  - 13.6.1 Distinctiveness Defined as a Contrast 423
  - 13.6.2 Problems with Distinctiveness 424
  - 13.6.3 Possible Storage Factor for Distinctive Items 426
  - 13.6.4 Possible Retrieval Factor for Distinctive Items 429
  - 13.6.5 How Should Distinctiveness Be Used? 430
  - 13.6.6 The Production Effect 431
- 13.7 Self-Reference and Survival Effects 434
  - 13.7.1 Self-Reference Effect 435
  - 13.7.2 Survival Effect 437
  - 13.7.3 Philosophical Background 438
  - 13.7.4 Animal Ethology 439
  - 13.7.5 Neurobiological Hardware for Language and Memory 439

13.7.6	Garcia Effect	440
13.7.7	Survival Effect in List Learning	441
13.8	Organizational Factors	444
13.8.1	Evidence of Spontaneous Organization	446
13.8.2	Subjective Organization	448
13.9	Mnemonic Techniques and Imagery	453
13.9.1	The Method of Loci	454
13.9.2	The Substitution Mnemonic	455
13.9.3	Rhyme and Peg-Word Mnemonics	456
13.9.4	Tips for Face-Person Associations	457
13.9.5	Mnemonic Methods in Context	458
13.10	Chapter Summary	459
<b>14</b>	<b>Mood and Emotional Factors</b>	<b>461</b>
14.1	Chapter Overview	461
14.2	The Question of Mood-Dependent Memory	461
14.3	Effects of Arousal and Emotion on Encoding	464
14.3.1	The Questionable Veracity of the Yerkes-Dodson Law	464
14.4	The Easterbrook Hypothesis	468
14.5	Attentional Spotlight, Cognition, and Emotion	469
14.6	Neural Processing of Emotional Stimuli	470
14.7	Negative Affect: The Weapon Focus	471
14.8	Memory of Traumatic Experiences	472
14.9	Positive Affect: Attentional Broadening?	473
14.10	Postencoding Stress and Memory	474
14.10.1	Epinephrine and Memory	475
14.10.2	Delayed Cortisol and Memory Recall	478
14.11	Summary of Affect and Memory	479
14.12	Summary of Part III	480
	Epilogue	483
	Glossary	485
	Bibliography	523
	Index	581
