

CONTENTS

PREFACE	xv
ACKNOWLEDGMENTS	xix
1 GETTING STARTED	1
1.1 Terms Introduced in Chapter	9
2 INTRODUCTION TO PYTHON	11
2.1 Installing Python and Python IDEs.....	13
2.2 The Basic Elements of Python	15
2.2.1 Objects, Expressions, and Numerical Types.....	16
2.2.2 Variables and Assignment.....	19
2.3 Branching Programs	21
2.4 Strings and Input	27
2.4.1 Input.....	31
2.4.2 A Digression about Character Encoding	32
2.5 While Loops	33
2.6 For Loops and Range	37
2.7 Style Matters.....	41
2.8 Terms Introduced in Chapter	42
3 SOME SIMPLE NUMERICAL PROGRAMS	45
3.1 Exhaustive Enumeration	45
3.2 Approximate Solutions and Bisection Search.....	50
3.3 A Few Words about Using Floats	56
3.4 Newton–Raphson	60
3.5 Terms Introduced in Chapter	62

4	FUNCTIONS, SCOPING, AND ABSTRACTION.....	63
4.1	Functions and Scoping	66
4.1.1	Function Definitions.....	66
4.1.2	Keyword Arguments and Default Values.....	70
4.1.3	Variable Number of Arguments.....	72
4.1.4	Scoping	73
4.2	Specifications	78
4.3	Using Functions to Modularize Code.....	82
4.4	Functions as Objects	84
4.5	Methods, Oversimplified.....	86
4.6	Terms Introduced in Chapter	87
5	STRUCTURED TYPES AND MUTABILITY	89
5.1	Tuples	89
5.1.1	Multiple Assignment.....	91
5.2	Ranges and Iterables.....	92
5.3	Lists and Mutability.....	93
5.3.1	Cloning	100
5.3.2	List Comprehension.....	103
5.4	Higher-Order Operations on Lists.....	105
5.5	Strings, Tuples, Ranges, and Lists.....	107
5.6	Sets.....	110
5.7	Dictionaries	112
5.8	Dictionary Comprehension	118
5.9	Terms Introduced in Chapter	121
6	RECURSION AND GLOBAL VARIABLES.....	123
6.1	Fibonacci Numbers	125
6.2	Palindromes	128
6.3	Global Variables.....	132
6.4	Terms Introduced in Chapter	134

7	MODULES AND FILES.....	135
7.1	Modules	135
7.2	Using Predefined Packages	138
7.3	Files.....	142
7.4	Terms Introduced in Chapter	145
8	TESTING AND DEBUGGING	147
8.1	Testing.....	148
8.1.1	Black-Box Testing.....	149
8.1.2	Glass-Box Testing.....	152
8.1.3	Conducting Tests.....	154
8.2	Debugging	156
8.2.1	Learning to Debug	159
8.2.2	Designing the Experiment	160
8.2.3	When the Going Gets Tough	164
8.2.4	When You Have Found “The” Bug.....	165
8.3	Terms Introduced in Chapter	166
9	EXCEPTIONS AND ASSERTIONS.....	167
9.1	Handling Exceptions.....	168
9.2	Exceptions as a Control Flow Mechanism	174
9.3	Assertions	176
9.4	Terms Introduced in Chapter	176
10	CLASSES AND OBJECT-ORIENTED PROGRAMMING.....	177
10.1	Abstract Data Types and Classes.....	178
10.1.1	Magic Methods and Hashable Types	184
10.1.2	Designing Programs Using Abstract Data Types.....	186
10.1.3	Using Classes to Keep Track of Students and Faculty	187
10.2	Inheritance	190
10.2.1	Multiple Levels of Inheritance	194
10.2.2	The Substitution Principle	196

10.3	Encapsulation and Information Hiding	197
10.3.1	Generators	203
10.4	An Extended Example	206
10.5	Terms Introduced in Chapter	212
11	A SIMPLISTIC INTRODUCTION TO ALGORITHMIC COMPLEXITY ..	213
11.1	Thinking about Computational Complexity	214
11.2	Asymptotic Notation.....	218
11.3	Some Important Complexity Classes.....	221
11.3.1	Constant Complexity	221
11.3.2	Logarithmic Complexity	221
11.3.3	Linear Complexity.....	223
11.3.4	Log-Linear Complexity	224
11.3.5	Polynomial Complexity.....	224
11.3.6	Exponential Complexity.....	226
11.3.7	Comparisons of Complexity Classes	228
11.4	Terms Introduced in Chapter	231
12	SOME SIMPLE ALGORITHMS AND DATA STRUCTURES.....	233
12.1	Search Algorithms.....	234
12.1.1	Linear Search and Using Indirection to Access Elements	235
12.1.2	Binary Search and Exploiting Assumptions	237
12.2	Sorting Algorithms.....	241
12.2.1	Merge Sort	243
12.2.2	Sorting in Python	247
12.3	Hash Tables.....	250
12.4	Terms Introduced in Chapter	255
13	PLOTTING AND MORE ABOUT CLASSES	257
13.1	Plotting Using Matplotlib	257
13.2	Plotting Mortgages, an Extended Example.....	263
13.3	An Interactive Plot for an Infectious Disease	271
13.4	Terms Introduced in Chapter	279

14 KNAPSACK AND GRAPH OPTIMIZATION PROBLEMS	281
14.1 Knapsack Problems.....	282
14.1.1 Greedy Algorithms.....	283
14.1.2 An Optimal Solution to the 0/1 Knapsack Problem.....	287
14.2 Graph Optimization Problems	291
14.2.1 Some Classic Graph-Theoretic Problems	297
14.2.2 Shortest Path: Depth-First Search and Breadth-First Search.....	297
14.3 Terms Introduced in Chapter	304
15 DYNAMIC PROGRAMMING.....	305
15.1 Fibonacci Sequences, Revisited	306
15.2 Dynamic Programming and the 0/1 Knapsack Problem.....	309
15.3 Dynamic Programming and Divide-and-Conquer	319
15.4 Terms Introduced in Chapter	320
16 RANDOM WALKS AND MORE ABOUT DATA VISUALIZATION	321
16.1 Random Walks.....	322
16.2 The Drunkard's Walk	323
16.3 Biased Random Walks	331
16.4 Treacherous Fields.....	338
16.5 Terms Introduced in Chapter	340
17 STOCHASTIC PROGRAMS, PROBABILITY, AND DISTRIBUTIONS..	341
17.1 Stochastic Programs.....	342
17.2 Calculating Simple Probabilities	344
17.3 Inferential Statistics.....	346
17.4 Distributions	366
17.4.1 Probability Distributions.....	369
17.4.2 Normal Distributions	371
17.4.3 Continuous and Discrete Uniform Distributions.....	378
17.4.4 Binomial and Multinomial Distributions	379
17.4.5 Exponential and Geometric Distributions	381
17.4.6 Benford's Distribution.....	385

17.5 Hashing and Collisions.....	386
17.6 How Often Does the Better Team Win?.....	389
17.7 Terms Introduced in Chapter	391
18 MONTE CARLO SIMULATION	393
18.1 Pascal’s Problem	394
18.2 Pass or Don’t Pass?	396
18.3 Using Table Lookup to Improve Performance	401
18.4 Finding π	403
18.5 Some Closing Remarks about Simulation Models.....	409
18.6 Terms Introduced in Chapter	411
19 SAMPLING AND CONFIDENCE.....	413
19.1 Sampling the Boston Marathon.....	414
19.2 The Central Limit Theorem.....	422
19.3 Standard Error of the Mean	427
19.4 Terms Introduced in Chapter	430
20 UNDERSTANDING EXPERIMENTAL DATA	431
20.1 The Behavior of Springs	431
20.1.1 Using Linear Regression to Find a Fit	435
20.2 The Behavior of Projectiles	443
20.2.1 Coefficient of Determination	445
20.2.2 Using a Computational Model	447
20.3 Fitting Exponentially Distributed Data.....	449
20.4 When Theory Is Missing.....	454
20.5 Terms Introduced in Chapter	455
21 RANDOMIZED TRIALS AND HYPOTHESIS CHECKING.....	457
21.1 Checking Significance.....	458
21.2 Beware of P-values	466
21.3 One-tail and One-sample Tests	469
21.4 Significant or Not?.....	471
21.5 Which N?.....	474

21.6	Multiple Hypotheses	476
21.7	Conditional Probability and Bayesian Statistics	479
21.7.1	Conditional Probabilities	481
21.7.2	Bayes' Theorem	483
21.8	Terms Introduced in Chapter	486
22	LIES, DAMNED LIES, AND STATISTICS	487
22.1	Garbage In Garbage Out (GIGO)	488
22.2	Tests Are Imperfect	489
22.3	Pictures Can Be Deceiving.....	490
22.4	Cum Hoc Ergo Propter Hoc	494
22.5	Statistical Measures Don't Tell the Whole Story.....	497
22.6	Sampling Bias.....	499
22.7	Context Matters	500
22.8	Comparing Apples to Oranges	501
22.9	Picking Cherries	502
22.10	Beware of Extrapolation	502
22.11	The Texas Sharpshooter Fallacy	503
22.12	Percentages Can Confuse	507
22.13	The Regressive Fallacy	508
22.14	Statistically Significant Differences Can Be Insignificant.....	509
22.15	Just Beware	510
22.16	Terms Introduced in Chapter	510
23	EXPLORING DATA WITH PANDAS	511
23.1	DataFrames and CSV Files.....	511
23.2	Creating Series and DataFrames	514
23.3	Selecting Columns and Rows.....	518
23.3.1	Selection Using loc and iloc	520
23.3.2	Selection by Group	524
23.3.3	Selection by Content	525
23.4	Manipulating the Data in a DataFrame.....	527
23.5	An Extended Example	530

23.5.1	Temperature Data.....	530
23.5.2	Fossil Fuel Consumption.....	541
23.6	Terms Introduced in Chapter	544
24	A QUICK LOOK AT MACHINE LEARNING	545
24.1	Feature Vectors	549
24.2	Distance Metrics.....	552
24.3	Terms Introduced in Chapter	559
25	CLUSTERING.....	561
25.1	Class Cluster.....	563
25.2	K-means Clustering	566
25.3	A Contrived Example	569
25.4	A Less Contrived Example	576
25.5	Terms Introduced in Chapter	583
26	CLASSIFICATION METHODS.....	585
26.1	Evaluating Classifiers.....	586
26.2	Predicting the Gender of Runners	591
26.3	K-nearest Neighbors	593
26.4	Regression-based Classifiers.....	599
26.5	Surviving the <i>Titanic</i>	612
26.6	Wrapping Up.....	618
26.7	Terms Introduced in Chapter	618
	PYTHON 3.8 QUICK REFERENCE	619
	INDEX.....	623
