

Figure 12.1 A simple Lotka-Volterra attractor which shows four (out of an infinite number of possible) limit cycles. The value of the four parameters are equal to 3.029850, 4.094132, 1.967217, and 2.295942, which yields a fixed point at 1.1671, 0.740047.
