Open Economy Macroeconomics in Developing Countries

MIT Press (2013)

Detailed Table of Contents

## 1. The Basic Intertemporal Model

- 1.1 Introduction 11
- 1.2 The Model 13
- 1.3 Solution of the Model 22
- 1.4 Unanticipated Shocks 25
  - Box 1.1 Is Saving Procyclical? 29
- 1.5 Adding Investment to the Basic Model 31
  - Box 1.2 Confronting the Model with the Data 32
  - Box 1.3 The Feldstein-Horioka Puzzle 50
- 1.6 Final Remarks 54
- 1.7 Appendixes
  - Pointwise Optimization 55
  - Proof That Solution Is a Maximum 58
  - Derivation of Trade Balance and Current Account Paths 59
  - Exercises 61
  - References 67

## 2 Capital Market Imperfections

- 2.1 Introduction 69
- 2.2 Financial Autarky 70
- 2.3 Uncertain Output Path 75
  - Box 2.1 How Incomplete Are Markets? 76
- 2.4 No Precommitment 87
  - Box 2.2 How Costly Is To Default? 89
  - Box 2.3 What Explains the Risk Premium in Practice? 96
- 2.5 Final Remarks 102
- 2.6 Appendix: Closed Form Solution for Consumption in an Infinite-Horizon Stochastic Model 102
  - Box 2.4 To Close or Not to Close the Small Open Economy Model? 104
  - Exercises 105
  - References 108

### 3 Intertemporal Prices

3.1 Introduction 111

3.2 The Model 113

3.3 Unanticipated Shocks 116

Box 3.1 How Large Is the Intertemporal Elasticity of Substitution? 121

3.4 Lack of Credibility 124

3.5 Wealth Effects 125

Box 3.2 Do Trade Liberalizations Lead to Productivity Gains? 125

3.6 Distortionary Taxation 133

Box 3.3 Is It Optimal To Reduce Tariffs even in the Presence of Imperfect Credibility? 134

3.7 Terms of Trade Shocks 139

Box 3.4 What Are the Effects of Terms of Trade Shocks on the Current Account? 141

3.8 Final Remarks 142

3.9 Appendix: Intertemporal Elasticity of Substitution 143

Exercises 144

References 147

### 4 Nontradable Goods and Relative Prices

4.1 Introduction 151

4.2 Basic Model with Nontradable Goods 153

4.3 External Deficits and the Real Exchange Rate 161

4.4 Fiscal Policy, Trade Imbalances, and the Real Exchange Rate 166

Box 4.1 How Much Does a Fiscal Contraction Lower the Relative Price of Nontradables? 171

4.5 Resource Reallocation and Relative Prices 177

Box 4.2 How Do Economies Adjust in Practice? 183

4.6 Terms of Trade and the Real Exchange Rate 185

Box 4.3 How Is the Real Exchange Rate Measured in Practice? 187

4.7 Final remarks 194

4.8 Appendix: Conditions for Normality 194

Exercises 196

References 200

## 5 The Basic Monetary Model

- 5.1 Introduction 203
- 5.2 The Basic Monetary Model 204
- 5.3 Neutrality and Superneutrality 216
- 5.4 Equivalence Results 224
- 5.5 Anticipated Money Shocks 229
- 5.6 Money as a Veil in a Cash-in-Advance Model 234
- 5.7 Final Remarks 242
- 5.8 Appendixes
  - Breaking Down the Government into the Monetary and Fiscal Authority 243
  - Accounting in Basic Monetary Model with Jumps in Real Money Balances 245
  - Restrictions on the Rate of Growth of Domestic Credit 247
  - MIUF Model in Discrete Time 249
  - Exchange Rate Regimes in Practice 252
  - What Is the Interest Rate Elasticity of Money Demand? 255
  - Exercises 258
  - References 260

## 6 The Monetary Approach to the Balance of Payments

- 6.1 Introduction 263
- 6.2 The Monetary Approach to the Balance of Payments 265
  - Box 6.1 The Monetary Approach Southern Cone Style 277
  - Box 6.2 IMF's Financial Programming 279
- 6.3 Anatomy of a Devaluation: Devaluation in a Two-Good Model 281
- 6.4 Flexible Exchange Rates 297
  - Box 6.3 How Do Prices Respond to a Large Devaluation? 298
- 6.5 A Currency Substitution Model 299
- 6.6 Final Remarks 305
- 6.7 Appendixes
  - Dynamic Optimization in Continuous Time 306
  - Analytical Solution for the Saddle Path 309
  - Derivation of Price Index 312
  - Computations Underlying Table 6.1 313

Exercises 314  
References 315

## 7 Temporary Policy

- 7.1 Introduction 317
- 7.2 Basic Monetary Model with a Cash-in-Advance Constraint 319
  - Box 7.1 How Do We Measure Credibility in Practice? 327
  - Box 7.2 Booms in Durable Goods Consumption 330
- 7.3 Labor Supply 332
- 7.4 A Transactions Costs Model 341
- 7.5 Monetary Policy under Flexible Exchange Rates 348
- 7.6 Final Remarks 352
- 7.7 Appendixes
  - The Cash-in-Advance Constraint in Continuous Time 353
  - Changes in Consumption and Leisure at  $t = 0$  354
  - Exercises 355
  - References 359

## 8 Sticky Prices

- 8.1 Introduction 361
- 8.2 A Sticky-Prices Model 363
  - Box 8.1 How Sticky Are Prices? 366
- 8.3 Flexible Rates 370
- 8.4 Predetermined Exchange Rates 379
  - Box 8.2 Are Devaluations Expansionary or Contractionary? 383
- 8.5 Overshooting 386
- 8.6 A Model of Sticky Wages 392
  - Box 8.3 To Devalue or Not to Devalue? That Is the Question 393
- 8.7 Final Remarks 406
- 8.8 Appendixes
  - Calvo's (1983) Staggered Prices 406
  - Sticky-Wage Model 408
  - Exercises 408
  - References 409

## 9 Interest Rate Policy

- 9.1 Introduction 413
- 9.2 Price-Level Indeterminacy 414
- 9.3 The Fiscal Theory of the Price Level 418
- 9.4 Interest Rates as an Additional Policy Instrument 424
  - Box 9.1 How Much Government Debt Is Held by Banks? 426
- 9.5 Interest Rate Rules under Sticky Prices 433
  - Box 9.2 Inflation Targeting 439
- 9.6 Real Interest Rate Rules 444
- 9.7 Final Remarks 445
  - Exercises 445
  - References 447

## 10 Optimal Fiscal and Monetary Policy in the Open Economy

- 10.1 Introduction 449
- 10.2 Optimal Fiscal Policy in an Endowment Economy 451
- 10.3 Optimal Fiscal Policy in a Production Economy 457
- 10.4 Optimal Fiscal Policy under Financial Autarky 464
- 10.5 Optimal Fiscal Policy under Uncertainty 470
- 10.6 Procyclical Fiscal Policy 483
  - Box 10.1 How Is Fiscal Policy Actually Conducted? 485
- 10.7 Optimal Monetary Policy 492
- 10.8 Final Remarks 501
  - Box 10.2 How To Deal with Procyclicality? The Chilean Way 502
- 10.9 Appendixes 504
  - Proof of Claim 3 504
  - Proof of Claim 4 505
  - Proof of Claim 5 505
  - Proof of Claim 6 506
  - Proof of Claim 7 506
  - Exercises 507
  - References 508

## 11 Optimal Exchange Rate Regimes

11.1 Introduction 511

11.2 Response to Shocks when Money is a Veil 513

11.3 A Cash-in-Advance Economy 520

11.4 Sticky Prices 529

11.5 Asset Market Segmentation 545

Box 11.1 Do Flexible Exchange Rates Cushion the Economy against Real Shocks? 546

Box 11.2 How Segmented Are Asset Markets in Practice? 548

11.6 Final remarks 559

11.7 Appendices

Mathematica Program on Demand Shocks in Sticky-Prices Model 559

Conditions for a Binding Cash-in-Advance Constraint in the Asset Market Segmentation Model 560

Proof (of condition in text) 563

Proof (of condition in text) 564

Exercises 564

References 565

## 12 Real Anchors

12.1 Introduction 567

Box 12.1 PPP Rules in Practice: How Did It All Begin? 568

12.2 Real Exchange Rate Targeting in a Flexible Prices Model 572

Box 12.2 Is Real Exchange Rate Targeting Inflationary? 577

12.3 Real Exchange Rate Rules in a Flexible-Prices Model 580

12.4 RER Targeting in a Sticky-Inflation Model 581

12.5 Real Interest Rate Targeting 588

Box 12.3 Real Interest Rate Targeting: A Look at the Chilean Experience 590

12.6 Real Targeting and Multiple Equilibria 597

12.7 Final Remarks 603

12.8 Appendixes

Derivations of Constraint in the Model of Section 12.2 603

Path of  $\lambda_t$  604

Roots of System for Real Exchange Targeting under Sticky Prices 604

Exercises 605  
References 607

## 13 Stopping High Inflation

- 13.1 Introduction 609
- 13.2 Chronic Inflation versus Hyperinflation 612
- 13.3 Stopping High Inflation: Stylized Facts 615
  - Box 13.1 What Is the Link between Fiscal Deficits and Inflation? 616
- 13.4 Stopping Hyperinflation 625
- 13.5 Stopping Chronic Inflation: Exchange Rate Based Stabilization 632
  - Box 13.2 Why Did Argentina's Convertibility Plan Fail? 639
- 13.6 Stopping Chronic Inflation: Money Based Stabilization 655
- 13.7 Final Remarks 665
- 13.8 Exercises 667
  - References 668

## 14 Capital Inflows

- 14.1 Introduction 671
- 14.2 Capital inflows: Stylized Facts 673
- 14.3 A Simple Model 675
  - Box 14.1 Capital Inflows: Push or Pull? 676
- 14.4 The Simple Economics of Sudden Stops 681
- 14.5 Sticky-Prices Model 687
- 14.6 Policy Responses to Capital Inflows 705
  - Box 14.2 Throwing Sand in the Wheels 713
- 14.7 Final Remarks 715
- 14.8 Appendix: Proofs of Claims in Section 14.4 716
  - Exercises 717
  - References 719

## 15 Dollarization

- 15.1 Introduction 721
- 15.2 A Basic Model of Currency Substitution 727
  - Box 15.1 How Costly Is It to Give Up the National Currency? 730

15.3	Monetary Expansion and the Real Exchange Rate	737
15.4	Hysteresis	752
15.5	Monetary Policy and Currency Substitution	758
15.6	An Asset Substitution Model	762
	Box 15.2 Does Currency Substitution Undermine Monetary Independence?	763
15.7	Final Remarks	770
15.8	Appendixes	
	Ito's Lemma	771
	Computing Real Rates of Return	772
	Dynamic Optimization in Continuous-Time Stochastic Models	774
	Exercises	776
	References	777

## 16 Balance-of-Payments Crises

16.1	Introduction	779
16.2	The Basic Model	781
16.3	Interest Rate Defense	790
	Box 16.1 Behavior of Nominal Exchange Rate and International Reserves in Major Currency Crises	790
16.4	Exogenous Fiscal Spending	797
16.5	The Dynamics of Balance-of-Payments Crises	798
16.6	A Crisis with No Contemporaneous Fiscal Deficit	803
16.7	Optimal Abandonment Rule	807
	Box 16.2 Second- and Third-Generation Models of Balance-of-Payments Crises	809
16.8	Final Remarks	814
16.9	Appendix: Alternative Derivation of $T$	814
	Exercises	815
	References	816

## 17 Financial Crises

17.1	Introduction	819
	Box 17.1 How Leveraged Were Financial Institutions in the Run-Up To the Financial Crisis?	820
17.2	Basic Arithmetics of Leverage	824
17.3	Determinants of Leverage in a Simple Model	826

17.4	Leverage as Amplification Mechanism	831
17.5	Role of Liquidity in Asset Markets	835
	Box 17.2 Is the Federal Reserve To Blame for the Housing Price Bubble. The Taylor-Greenspan Debate	840
17.6	A Decoupling-Recoupling Model	845
	Box 17.3 The Decoupling-Recoupling Phenomenon	846
17.7	A Twin-Crises Model	854
17.8	Final Remarks	864
	Box 17.4 The Twin Crises	865
	Appendix: Transfers from Government to Banks in Twin-Crises Model	867
	Exercises	867
	References	868
